COURSE ADMINISTRATION

Welcome & Housekeeping

 © 2026 Tertiary Infotech Academy Pte Ltd

Digital Attendance (Mandatory)

1. Trainer displays the SSG digital attendance QR code
2. Scan it with your phone camera (Singpass app)
3. Submit your attendance
4. Repeat for AM, PM and the assessment session

Attendance is taken digitally for every session of a WSQ-funded course; a minimum of 75% attendance is required for assessment and funding.

About the Trainer

Dr. Alfred Ang

Principal Trainer
Tertiary Infotech Academy Pte Ltd

ROLE
Principal Trainer, Tertiary Infotech Academy Pte Ltd

BACKGROUND
PhD — 20+ years of industry and training experience in software, data, AI and digital productivity tools.

DELIVERS
WSQ courses on Notion, Microsoft 365 and Copilot, data analytics, AI and web technologies.

FOUNDER
Founder and lead instructor at Tertiary Infotech / Tertiary Courses.

 © 2026 Tertiary Infotech Academy Pte Ltd

ICE-BREAKER

Let's Know Each Other

1

Who you are

Your name, your organisation and your role in it.

2

Your content today

Where your team's documents, projects and data live right now.

3

Your Notion experience

Never used it, personal use, or already running a team workspace?

4

What you want to build

One thing you would like to manage in Notion by the end of Day 2.

 © 2026 Tertiary Infotech Academy Pte Ltd

HOUSEKEEPING

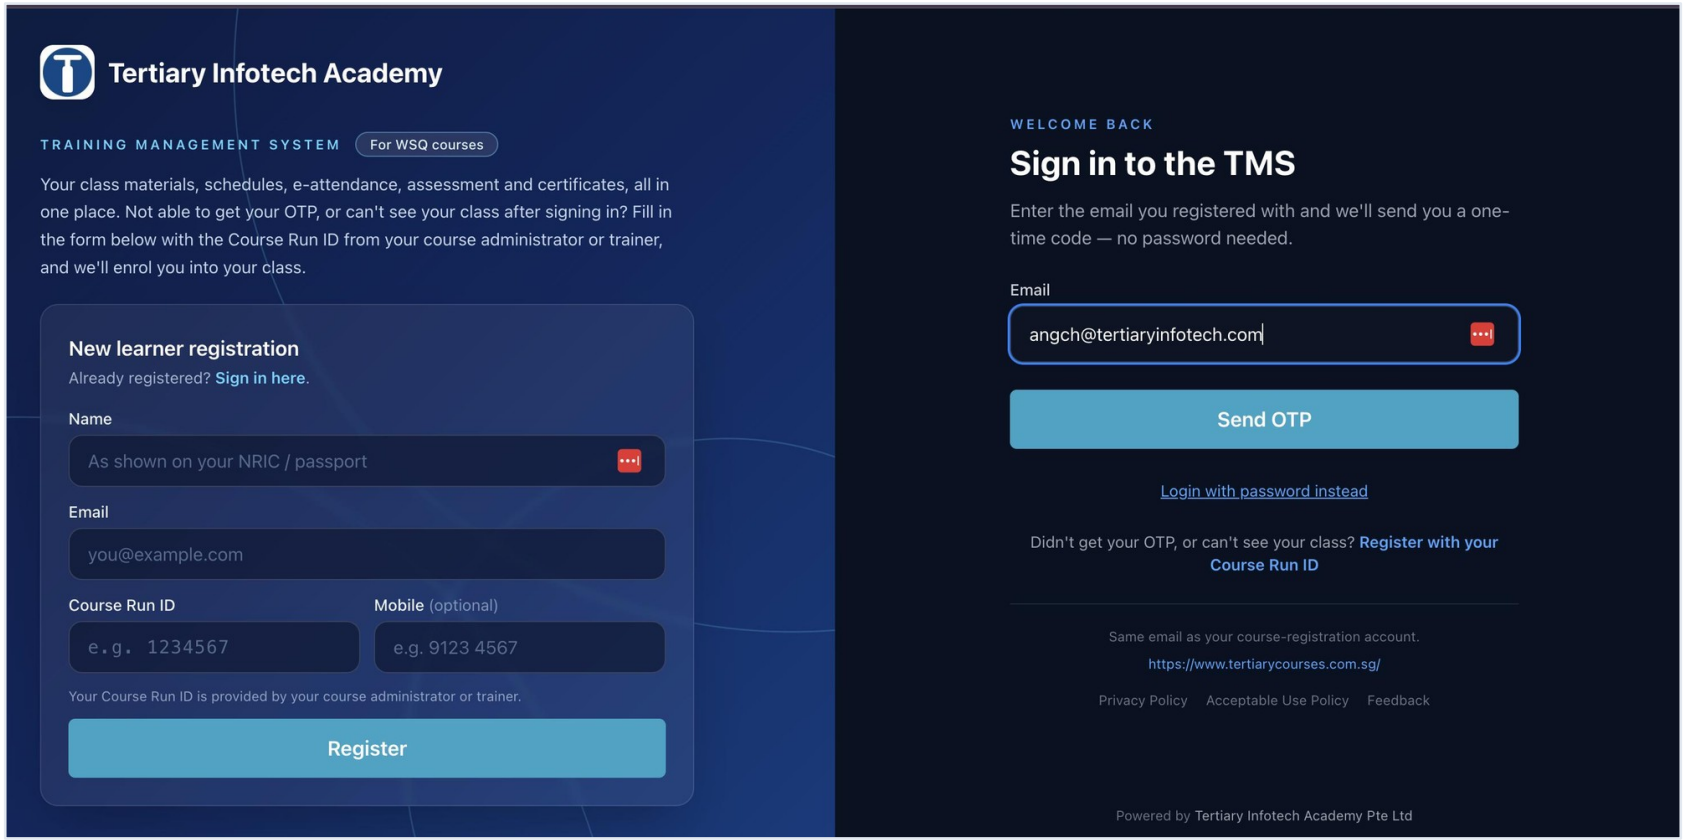

Ground Rules

1. Set your mobile phone to silent mode.
2. Participate actively — no question is too small.
3. Respect each other's views; one conversation at a time.
4. Step out quietly for calls or breaks.
5. Be punctual; return from breaks on time.
6. 75% attendance is required for assessment and funding.

 © 2026 Tertiary Infotech Academy Pte Ltd

COURSE PORTAL

Login to LMS and Download Course Material

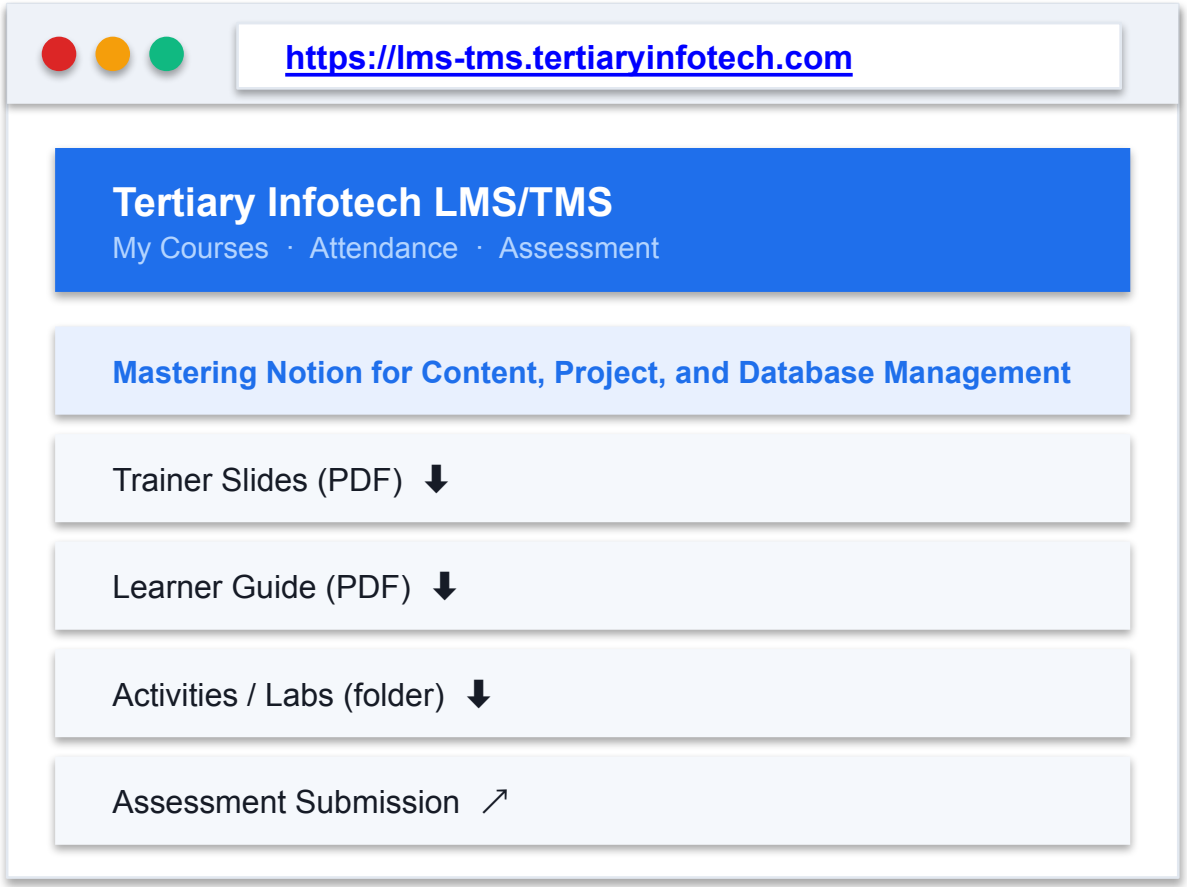

Log in at lms-tms.tertiaryinfotech.com with your registered email and the OTP sent to your inbox, then open this course to download the slides and Learner Guide.

 © 2026 Tertiary Infotech Academy Pte Ltd

COURSE PORTAL · LMS/TMS

Download Course Material

1 **Sign in**
lms-tms.tertiaryinfotech.com — log in with your registered email (OTP or password).

2 **Open your course**
Select 'Mastering Notion for Content, Project, and Database Management' under My Courses.

3 **Download materials**
Slides, the Learner Guide and the lab folders — your open-book references for the assessment.

4 **Submit and survey**
Upload your assessment answers and complete the TRAQOM survey QR here.

All course material is downloaded from the LMS/TMS portal — keep it handy: the final assessment is open book.

LAB FILES · GITHUB REPOSITORY

Access the Hands-On Labs

Repository: https://github.com/tertiarycourses/TGS-2023041080-Mastering-Notion-for-Content-Project-and-Database-Management

Option A — Clone

- Install Git, then in a terminal run:
- git clone https://github.com/tertiarycourses/TGS-2023041080-Mastering-Notion-for-Content-Project-and-Database-Management.git
- Open the labs/ folder — one sub-folder per lab.

Option B — Download ZIP

- On GitHub click Code → Download ZIP.
- Unzip anywhere on your laptop.
- Open labs/ — no tools to install.

What each lab folder holds

- README.md — brief, procedure, acceptance test
- lab.yaml — metadata, K/A codes, files
- Mock data: CSV, Markdown, JSON, images
- LAB-NN-Instructions.pdf + workflow PNG

12 labs · all run in Notion in your browser on a free account · the same folders are on the LMS under Activities

 © 2026 Tertiary Infotech Academy Pte Ltd

ONE STORY, TWELVE LABS

The Course Scenario — Brightwave Media

1

Brightwave Media Pte Ltd

A twelve-person Singapore content and digital-marketing agency.

2

The move to Notion

Company wiki, content operations, client projects and a public help centre in one workspace.

3

Day 1 — build the content system

Workspace, wiki, policies, collaboration and rich, styled content (Labs 1–6).

4

Day 2 — run it as a CMS

Databases, permissions, publishing, analytics, integrations and Notion AI (Labs 7–12).

5

One connected story

Every lab adds to the same workspace, so the final result is a complete, governed CMS.

6

Mock data supplied

Each lab folder carries the CSV, Markdown, JSON and images the lab needs.

 © 2026 Tertiary Infotech Academy Pte Ltd

WSQ ALIGNMENT · PART 1

Skills Framework — Content Management

TSC element	Detail
TSC Title / Code	Content Management · ICT-SNM-3026-1.1
Ability A1	Implement content management policies, guidelines and permissions on content management
Ability A2	Post and update content on content management systems
Ability A3	Maintain web properties and assets to uphold standards on user experience
Ability A4	Maintain awareness of market offerings on content management systems
Ability A5	Report on metrics to measure performance of content management systems
Ability A6	Recommend the adoption of appropriate plug-ins to manage and maintain the organisation's web properties and assets
Ability A7	Generate ideas to improve customer and visitor experience on web properties and assets
Knowledge K1	Content management policies, guidelines and permissions on content management
Knowledge K2	Web content for deployment
Knowledge K3	Organisation's web properties and assets
Knowledge K4	Creation and curation of web content guidelines

BY THE END OF THIS COURSE

Learning Outcomes

1

LO1
Implement content management policies on Notion adhering to organizational guidelines and permissions

2

LO2
Post and update content on Notion, ensuring adherence to content creation and curation guidelines

3

LO3
Maintain web properties and assets in Notion, while staying aware of market offerings

4

LO4
Report on performance metrics, recommend appropriate plug-ins, and generate ideas to enhance customer and visitor experiences on Notion

 © 2026 Tertiary Infotech Academy Pte Ltd

THE JOURNEY

Course Outline — Four Learning Units, Nine Topics

1

LU1 · Foundations and Workspace Management

Topic 1 Introduction to Notion · Topic 2 Workspace Collaboration Tools — Labs 1–3 (LO1)

2

LU2 · Content Creation and Management

Topic 3 Pages and Content Blocks · Topic 4 Advanced Content Techniques — Labs 4–6 (LO2)

3

LU3 · Mastering Databases in Notion

Topic 5 Database Essentials · Topic 6 Advanced Database Features — Labs 7–9 (LO3)

4

LU4 · Collaboration, Publishing and Integrations

Topic 7 Collaboration and Publishing · Topic 8 Data Management and Integrations · Topic 9 Notion AI — Labs 10–12 (LO4)

 © 2026 Tertiary Infotech Academy Pte Ltd

SCHEDULE

Lesson Plan — 2 Days, 9:30am–6:30pm

Day 1

- **Day 1 — Foundations and content (8 h)**
  - AM attendance · introductions · learning outcomes
  - Topic 1 Introduction to Notion · Labs 1–2
  - Topic 2 Workspace Collaboration Tools · Lab 3
  - Lunch (1 hour)
  - PM attendance · Topic 3 Pages and Content Blocks · Labs 4–5
  - Topic 4 Advanced Content Techniques · Lab 6
  - Day 1 recap and Q&A

Day 2

- **Day 2 — Databases, publishing, AI (6 h + 2 h assessment)**
  - AM attendance · Topic 5 Database Essentials · Labs 7–8
  - Topic 6 Advanced Database Features · Lab 9
  - Lunch (1 hour)
  - PM attendance · Topic 7 Collaboration and Publishing · Lab 10
  - Topic 8 Data Management and Integrations · Lab 11
  - Topic 9 Notion AI · Lab 12 · briefing for assessment
  - 4:30pm WA (SAQ) 1 h · 5:30pm PP 1 h · TRAQOM

RULE 14 training hours + 2 assessment hours · 10-minute tea breaks are within training time · full timings in the Lesson Plan.

 © 2026 Tertiary Infotech Academy Pte Ltd

BEFORE ASSESSMENT

Briefing for Assessment

1

Phones away

Place phones and other materials under the table or on the floor.

2

No recording

No photos or recording of assessment scripts, at any point.

3

No discussion

Work individually — no discussion once the assessment starts.

4

Black or blue pen

Use a black or blue pen for any hard-copy assessment.

5

No correction fluid

No liquid paper or correction tape; strike through instead.

6

Time is called

Scripts are collected when time is up — submit on the LMS before then.

 © 2026 Tertiary Infotech Academy Pte Ltd

FINAL ASSESSMENT

Final Assessment

	Written Assessment (WA)	Practical Performance (PP)
Format	Short-answer questions (SAQ)	Scenario-based practical tasks in Notion
What it tests	Underpinning knowledge K1–K9	Practical abilities A1–A7
Items	9 questions	5 tasks
Duration	1 hour	1 hour
Conditions	Open book, individual	Open book, individual
Submission	On the LMS	On the LMS, with screenshots as evidence

RULE Open book: slides, Learner Guide and your own lab work. 75% attendance is required; an appeal process is available.

 © 2026 Tertiary Infotech Academy Pte Ltd

ON ASSESSMENT DAY

Assessment Flow

The TRAQOM QR code and the assessment submission are both on the LMS — https://lms-tms.tertiaryinfotech.com

 © 2026 Tertiary Infotech Academy Pte Ltd

01

TOPIC 01 · LU1 · A1 · K1

Introduction to Notion

Overview of Notion · what is a block · first page and subpage · workspace and sidebar · navigating and customising · wikis and verified pages

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 01 · WHAT THIS TOPIC COVERS

Key Concepts — Introduction to Notion

1

One connected workspace

Notion combines documents, wikis, project trackers and databases in one tool, so content, projects and data live together instead of across five apps.

2

Everything is a block

Text, headings, images, tables, embeds and even databases are blocks. Blocks can be transformed into other types and rearranged by dragging.

3

Pages nest inside pages

A page holds blocks and sub-pages, giving an unlimited hierarchy. Breadcrumbs and the sidebar show where you are.

4

The workspace and sidebar

The sidebar is the map: Teamspaces for shared work, Private for your own pages, Shared for pages shared with you, plus Favorites, Templates, Import and Trash.

5

Workspaces are separate

Each workspace has its own members, plan and content. Switch or add another account from the workspace switcher; move top-level pages to migrate content.

6

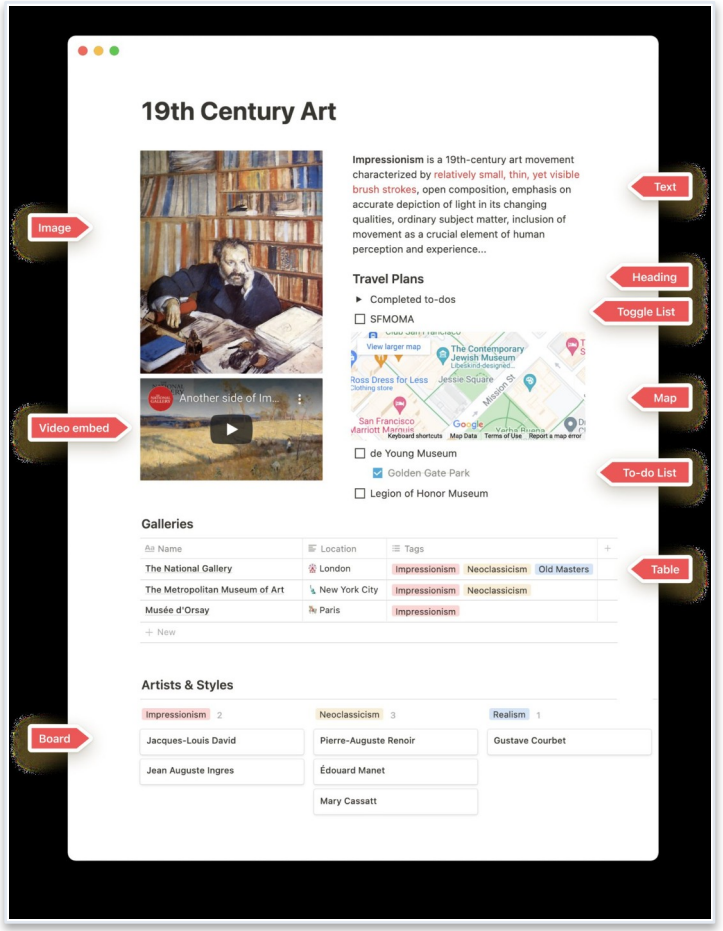

Wikis and verified pages

Turn a teamspace page into a wiki to add owners, verification and expiry, so the organisation knows which content is authoritative and current.

 © 2026 Tertiary Infotech Academy Pte Ltd

THE BUILDING BLOCK

Everything in Notion Is a Block

1 A page is a stack of blocks

Text, headings, lists, images, tables, embeds and databases are all blocks with the same handle.

2 Blocks transform

⋮⋮ → Turn into converts a paragraph to a heading, a bullet to a toggle, a list to a page — content stays.

3 Blocks rearrange

Drag by the ⋮⋮ handle; drop beside another block to create columns, drop below to reorder.

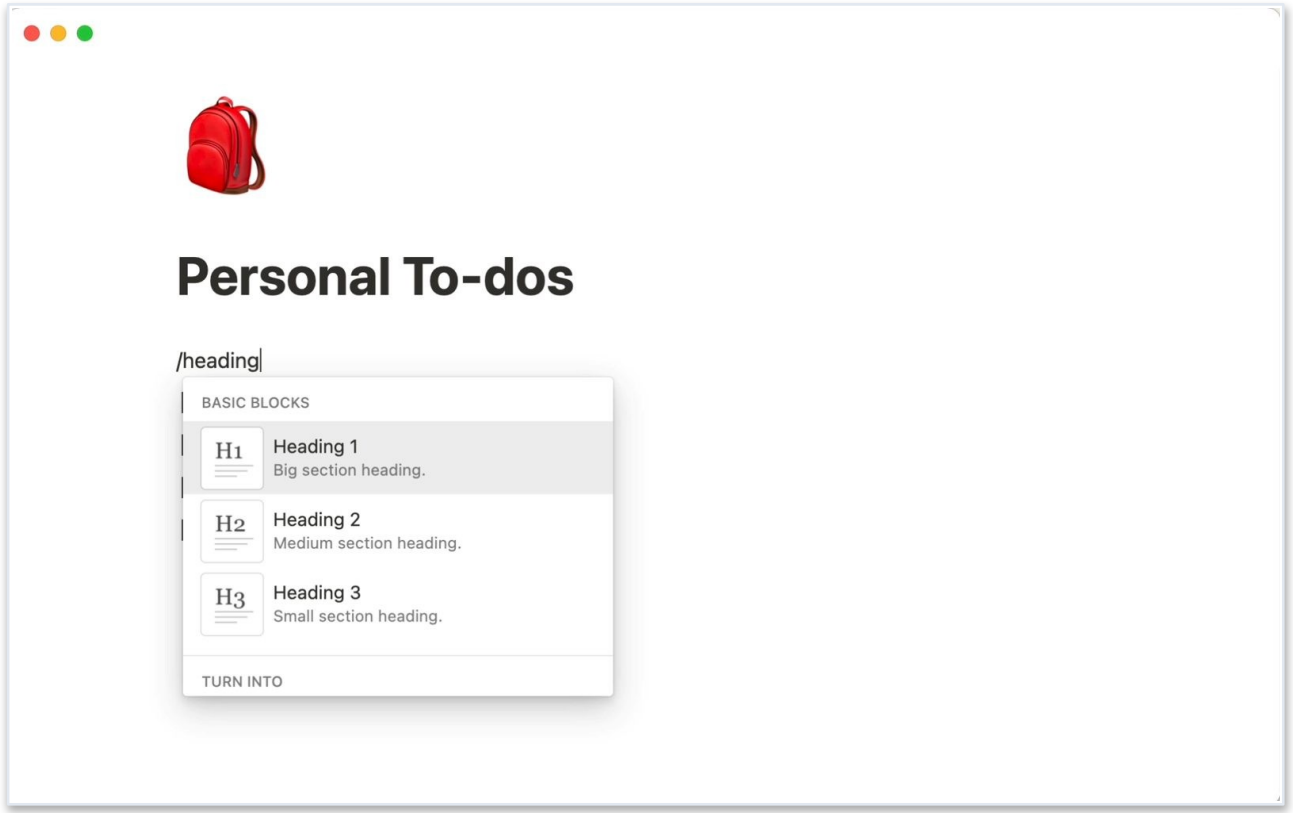

4 Slash opens the menu

Type / on any line to see every block: basic, inline, database, media, embed, advanced.

 © 2026 Tertiary Infotech Academy Pte Ltd

WRITE FAST

Slash Commands and Markdown Shortcuts

1 / for blocks

/h1, /todo, /callout, /table, /image, /code, /page — type the name to filter the menu.

2 Markdown on the fly

heading, - bullet, [] to-do, > toggle, ``` code, --- divider, ** bold, ` inline code.

3 @ and [[

@ mentions people, pages and dates; [[links or creates a page; + creates a page elsewhere.

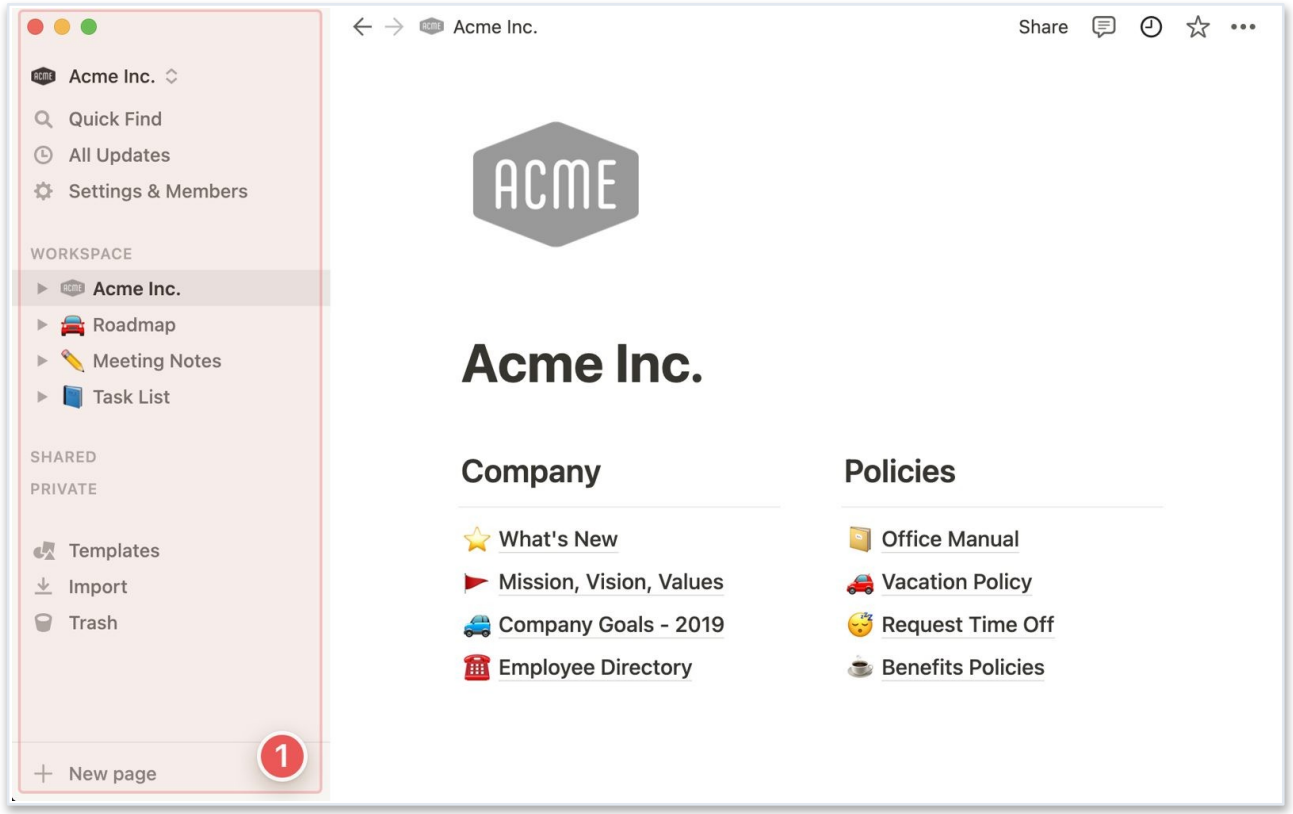

4 Keyboard first

Cmd/Ctrl+N new page, Cmd/Ctrl+Shift+N new window, Cmd/Ctrl+P quick find, Cmd/Ctrl+Shift+0-9 block types.

 © 2026 Tertiary Infotech Academy Pte Ltd

NAVIGATE

The Sidebar Is the Map of Your Workspace

1 Teamspaces

Shared areas with owners and members — the default home for organisational content.

2 Private and Shared

Private pages only you see; Shared appears when a page is shared with selected people.

3 Favorites, Templates, Import, Trash

Pin frequent pages; start from templates; import from other tools; restore deleted pages.

4 Breadcrumbs and hover options

The top bar shows the path; hovering a sidebar page reveals ⋯ (options) and + (new sub-page).

 © 2026 Tertiary Infotech Academy Pte Ltd

THREE LEVELS OF ORGANISATION

Workspaces, Teamspaces and Pages

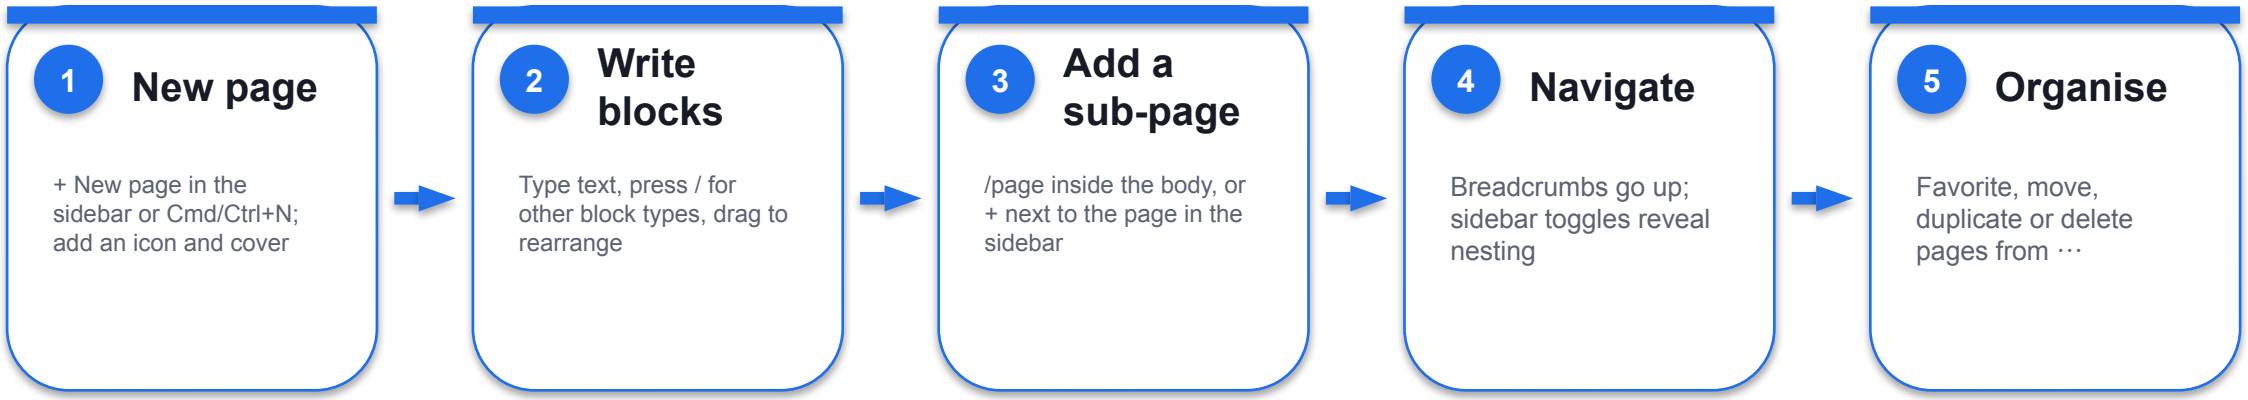

Level	What it is	Who controls it	Brightwave example
Workspace	The whole account for an organisation — members, plan, settings	Workspace owners	Brightwave Media
Teamspace	A section with its own members and default permissions	Teamspace owners	Client Work (closed), Company (open)
Page	Content built from blocks; nests without limit	Page owner / editors	Company Wiki → Policies → Naming Conventions
Database	A page whose children are structured rows	Editors with 'can edit content'	Content Calendar, Tasks, Clients

RULE Keep the number of workspaces to a minimum — content cannot be linked across workspaces, but it can be moved between them.

 © 2026 Tertiary Infotech Academy Pte Ltd

FROM BLANK TO HIERARCHY

Create Your First Page and Sub-page

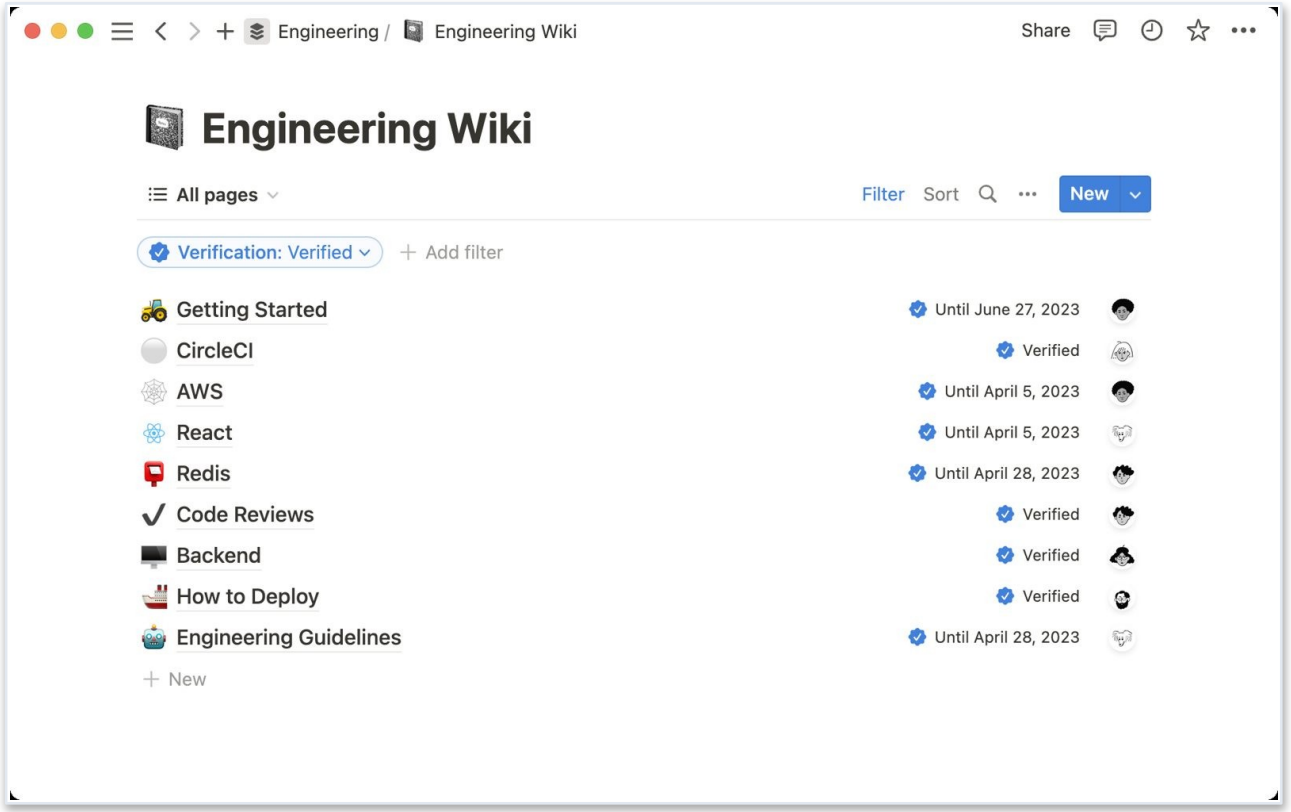

WHY IT MATTERS The hierarchy IS the information architecture: decide the four top-level sections before anyone writes a page.

 © 2026 Tertiary Infotech Academy Pte Ltd

TRUSTED CONTENT

Wikis and Verified Pages

1 Turn into wiki

Any teamspace page becomes a wiki with Owner, Verification and Last edited on every page.

2 Owners are accountable

One named owner per page — the policy rule that makes content management auditable.

3 Verify with expiry

Verified pages carry a badge and an expiry (e.g. 90 days); the owner is reminded to re-review.

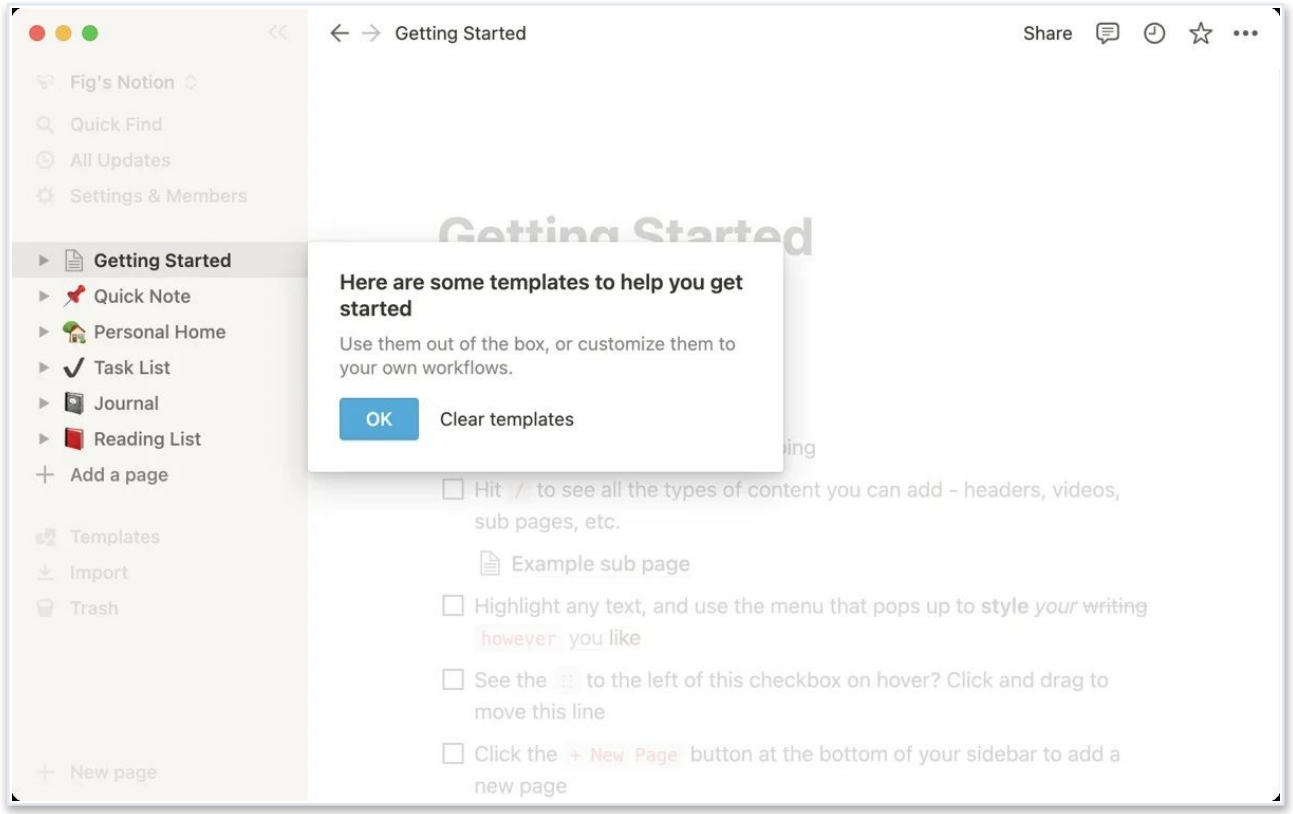

4 Views of the wiki

Table, board or list views of all pages, grouped by owner or verification status, expose stale content.

 © 2026 Tertiary Infotech Academy Pte Ltd

MARKET OFFERINGS

Start with Templates — or Build Your Own

1 10,000+ templates

The template gallery covers wikis, project trackers, CRMs, docs and personal use.

2 In-app templates

New page → Templates shows starter templates for the page type you need.

3 Duplicate community pages

Public pages can be duplicated into your workspace when the author allows it.

4 Policy check

Brightwave allows approved templates only — customise once, then reuse.

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 01 · HANDS-ON LAB · FOUNDATION

Set Up the Brightwave Workspace, Pages and Blocks

LAB 01 | K1 · A1 | 30 min

You create the Brightwave Media workspace, build the top-level page structure from the supplied site map, and learn how blocks, slash commands, sub-pages, breadcrumbs and the sidebar work by building the Company Home page.

You will build

A Brightwave workspace with a Company Home page, four top-level section pages and a working sub-page hierarchy

Tools: Notion (web or desktop app)

ASSESSED K1 · A1

LEVEL Foundation

EVIDENCE Screenshots · lab README checklist

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 01 · WORKFLOW

How Lab 01 Runs

WHY IT MATTERS The shape of the work — the full click-by-click procedure is in the Learner Guide (Lab 01) and the lab's instruction PDF.

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 01 · ACCEPTANCE CHECK

Set Up the Brightwave Workspace, Pages and Blocks

✅ Acceptance check

The sidebar shows Company Home in Favorites with the four section pages nested under it, each section contains the sub-pages listed in workspace-structure.csv, and Company Home carries an icon, a cover, a heading, a callout and a toggle list.

IF IT DOES NOT WORK

1. Re-read the step: most misses are the page menu (top right) versus the block handle (left of a block).
2. Check you are in the right page or teamspace — the sidebar shows the path.
3. Full click-by-click steps: Learner Guide and the lab's instruction PDF.

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 01 · HANDS-ON LAB · FOUNDATION

Build the Company Wiki with Verified Pages and a Content Policy

LAB 02 | K1 · A1 | 35 min

You turn the Company Wiki into a Notion wiki, import the supplied policy documents, assign page owners, verify the authoritative pages with an expiry date, and publish the content management policy that governs the rest of the workspace.

You will build

A Notion wiki with imported policy pages, named owners, verified status and a visible content management policy

Tools: Notion, Markdown import

ASSESSED K1 · A1

LEVEL Foundation

EVIDENCE Screenshots · lab README checklist

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 02 · WORKFLOW

How Lab 02 Runs

WHY IT MATTERS The shape of the work — the full click-by-click procedure is in the Learner Guide (Lab 02) and the lab's instruction PDF.

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 02 · ACCEPTANCE CHECK

Build the Company Wiki with Verified Pages and a Content Policy

✅ Acceptance check

Company Wiki shows the wiki header, three pages carry the green Verified badge with a 90-day expiry, every page has an owner matching page-owner-register.csv, the Verification view lists only unverified pages, and Company Home links to the policy.

IF IT DOES NOT WORK

1. Re-read the step: most misses are the page menu (top right) versus the block handle (left of a block).
2. Check you are in the right page or teamspace — the sidebar shows the path.
3. Full click-by-click steps: Learner Guide and the lab's instruction PDF.

02

TOPIC 02 · LU1 · A1 · K5

Workspace Collaboration Tools

Collaborate within a workspace · comments, mentions and reminders · updates and notifications · search

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 02 · WHAT THIS TOPIC COVERS

Key Concepts — Workspace Collaboration Tools

1

Real-time co-editing

Several people edit the same page at once; avatars show who is where, and page history lets you restore an earlier version.

2

Comments and discussions

Top-level page discussions and inline comments keep feedback next to the content; resolve, react to or reopen threads.

3

@-mentions

Type @ to mention a person, a page or a date. A mentioned person is notified; a mentioned page becomes a link and a backlink.

4

Reminders

Any date mention can carry a reminder, so a review date notifies the owner on the day, in the app and by email or push.

5

Updates and notifications

The Inbox (Updates) collects mentions, comments and page changes across the workspace; tune email and mobile notifications in Settings.

6

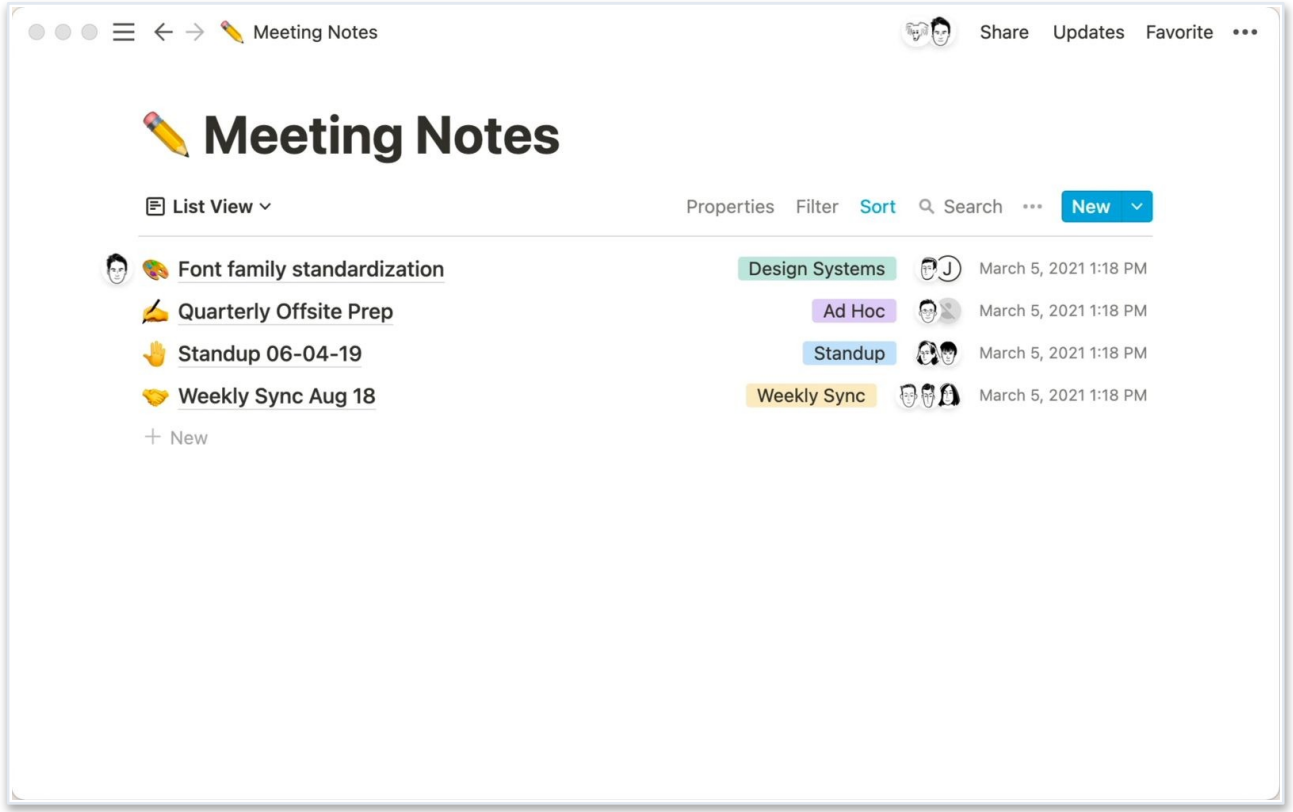

Search that understands structure

Quick Find searches titles and content; filter by teamspace, creator, date or page, sort results and search inside a database.

 © 2026 Tertiary Infotech Academy Pte Ltd

COLLABORATE

Work Together in Real Time

1 Live cursors and avatars

Everyone with edit access can type at once; avatars show who is on the page.

2 Page history

··· → Page history restores earlier snapshots (7 days Free, 30 Plus, 90 Business, unlimited Enterprise).

3 Comments live with content

Inline comments attach to a sentence; page discussions sit under the title.

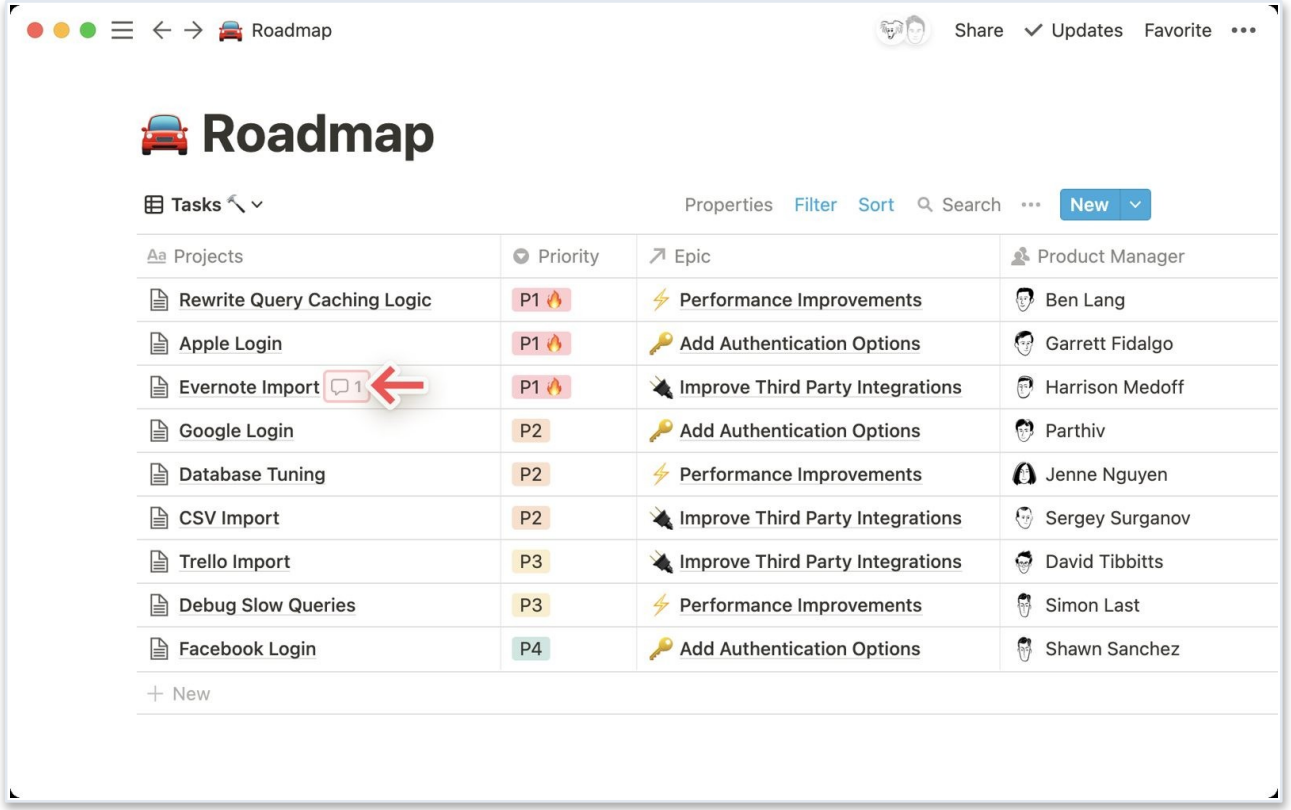

4 Page lock

Lock a finished page so casual edits are blocked while comments stay open.

 © 2026 Tertiary Infotech Academy Pte Ltd

FEEDBACK IN CONTEXT

Comments, Mentions and Reminders

1 Comment on anything

Highlight → Comment, or the comment icon on images, files and database properties.

2 @-mention people, pages, dates

A mentioned person is notified; a mentioned page links both ways; a date can remind.

3 Resolve, react, reopen

Resolved threads disappear from the page but stay in the comments sidebar.

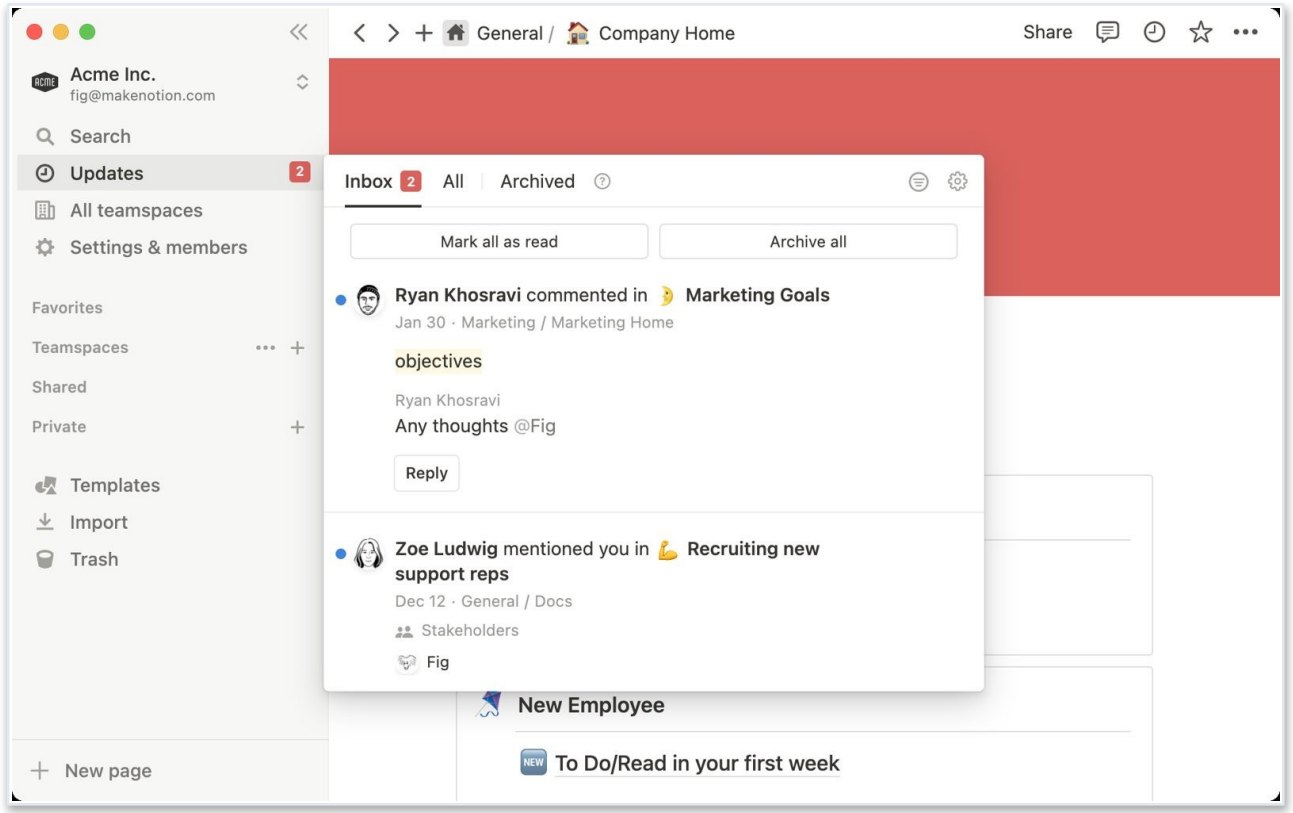

4 Reminders

Set on any date mention — at time of event, 5 minutes, 1 hour, 1 day or 2 days before.

 © 2026 Tertiary Infotech Academy Pte Ltd

NEVER MISS A CHANGE

Updates and Notifications

1 Inbox

Mentions, comments, page invitations and database notifications in one list.

2 All updates

Every change on pages you follow, grouped by page — turn Follow on or off per page.

3 Email and mobile

Settings → Notifications: mentions always, page activity, workspace digest, mobile push.

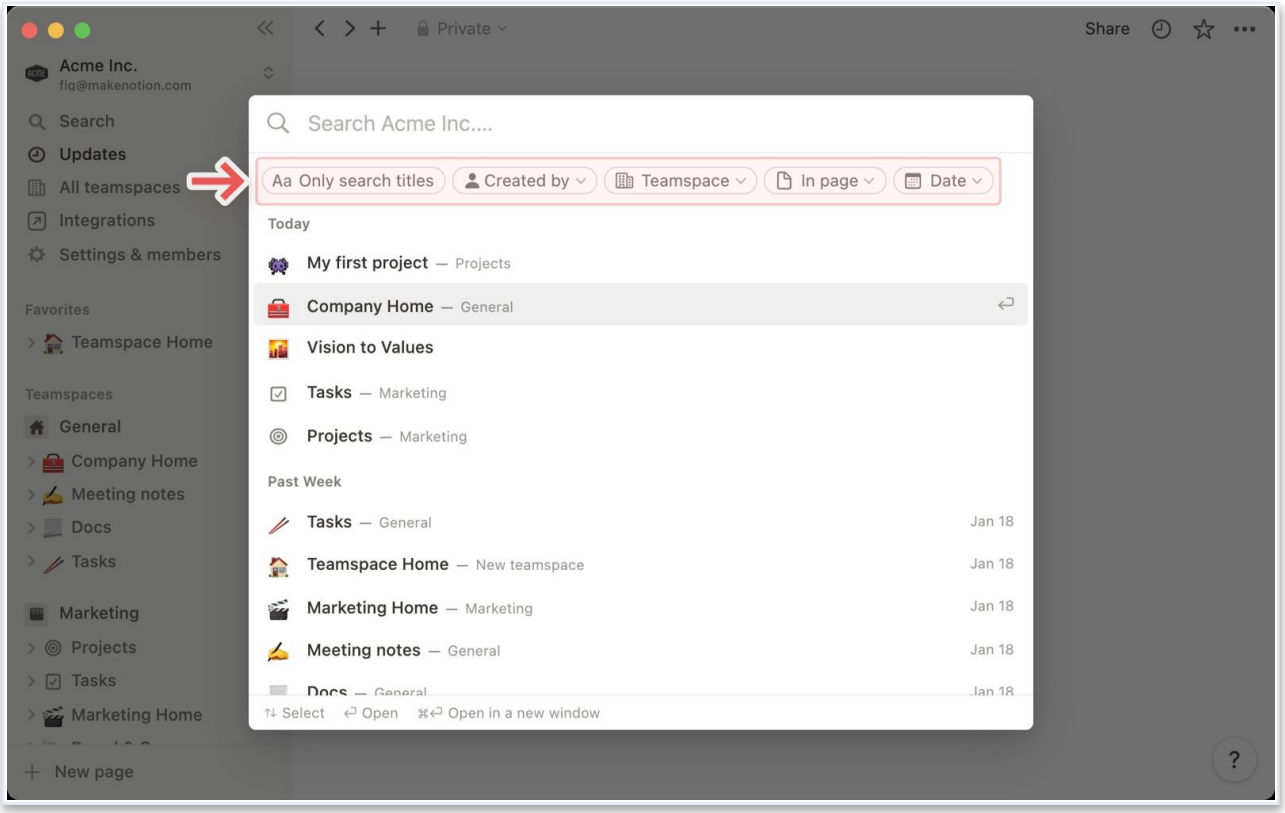

4 Slack too

Connect Slack to receive @-mentions and database notifications in a channel.

 © 2026 Tertiary Infotech Academy Pte Ltd

FIND ANYTHING

Search Across the Workspace

1 Quick Find

Cmd/Ctrl+P or the Search button; type to search titles and full text.

2 Filters

Only match titles, Created by, Edited by, In (teamspace or page), Date created or edited.

3 Sort and history

Sort by relevance, last edited or created; recent pages and recent searches appear first.

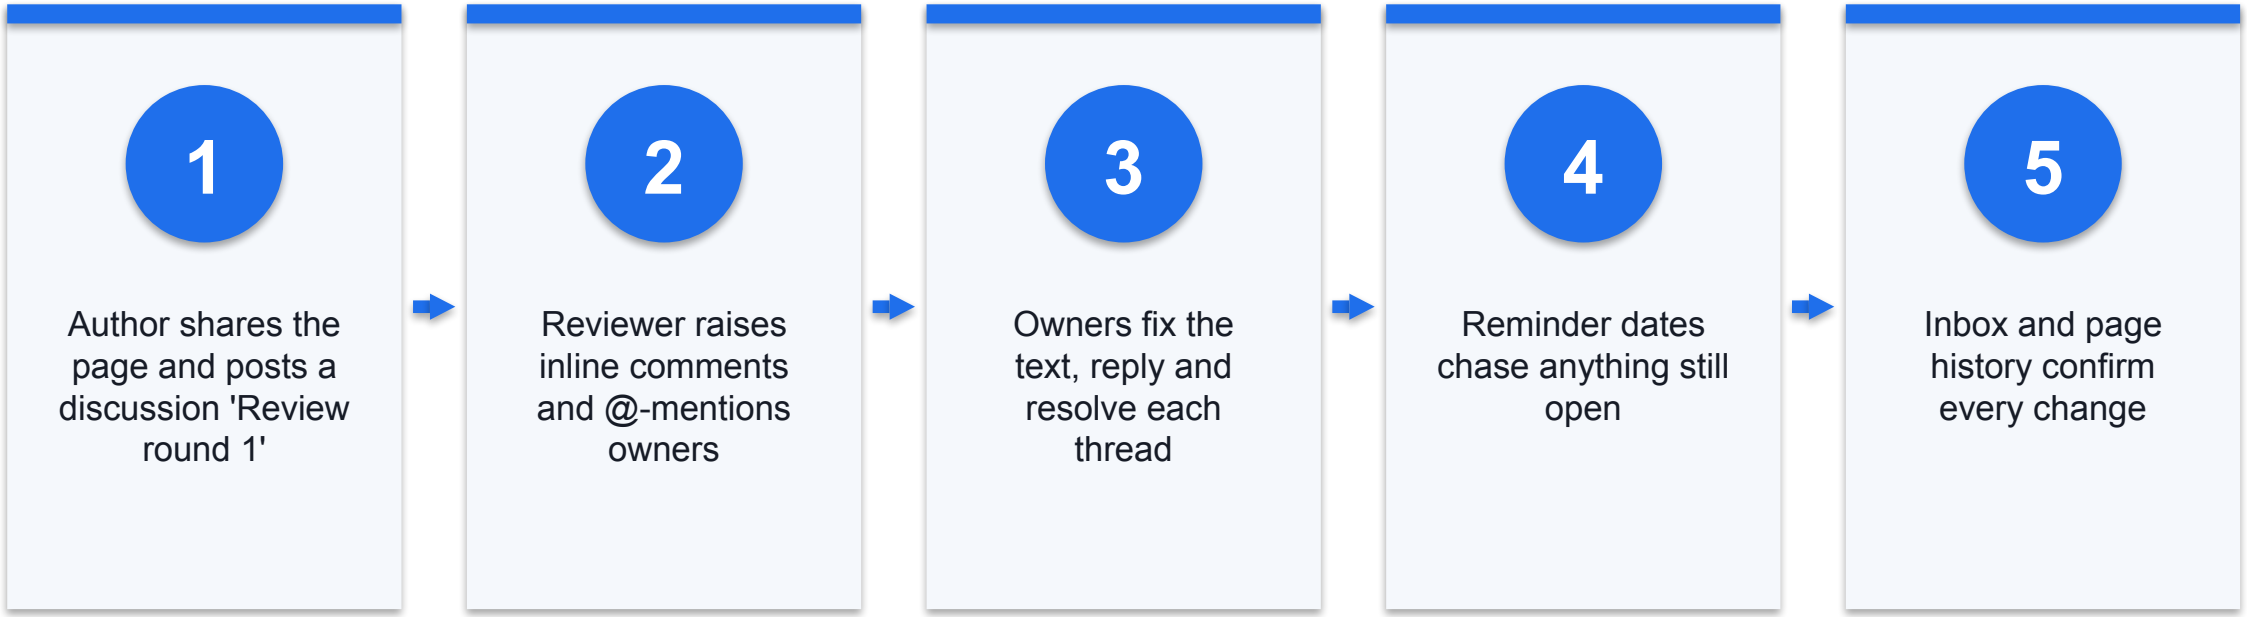

4 Database search

Inside any database use the search icon to match property values and content.

 © 2026 Tertiary Infotech Academy Pte Ltd

THE COLLABORATION LOOP

A Content Review Round in Notion

Comments are the audit trail of content decisions — resolve, do not delete.

 © 2026 Tertiary Infotech Academy Pte Ltd

CHOOSE THE RIGHT TOOL

Collaboration Tools — When to Use Which

Need	Use	Who sees it	Leaves a trace?
Ask a question about one sentence	Inline comment	Everyone on the page	Yes — comment thread
Alert a colleague	@-mention	The person (Inbox + email)	Yes — in the comment or text
Chase a deadline	Date mention + reminder	The mentioned person	Yes — the date chip
Discuss the page overall	Page discussion	Everyone on the page	Yes — under the title
Track a change	Page history	Editors	Yes — snapshots
Find related work	Search filters	You	No

RULE Prefer comments to chat messages: the decision stays next to the content it changed.

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 02 · HANDS-ON LAB · INTERMEDIATE

Run a Content Review with Comments, Mentions, Reminders and Search

LAB 03 | K5 · A1 | 35 min

Acting as the reviewer of the About Brightwave page, you raise the feedback items from the supplied review sheet as comments, mention the owners, set dated reminders, resolve threads, watch the Inbox, and use Search filters to find every page that mentions a client.

You will build

A reviewed page with a comment thread per feedback item, mentions and reminders assigned, resolved threads, and a saved search routine

Tools: Notion comments, mentions, reminders, Inbox, Search

ASSESSED K5 · A1

LEVEL Intermediate

EVIDENCE Screenshots · lab README checklist

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 03 · WORKFLOW

How Lab 03 Runs

WHY IT MATTERS The shape of the work — the full click-by-click procedure is in the Learner Guide (Lab 03) and the lab's instruction PDF.

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 03 · ACCEPTANCE CHECK

Run a Content Review with Comments, Mentions, Reminders and Search

✅ Acceptance check

About Brightwave shows one resolved and five open inline comments, each with an @-mentioned owner, two comments carry reminder bells, the Inbox lists the mentions, and the Nova Retail search returns the pages that name that client.

IF IT DOES NOT WORK

1. Re-read the step: most misses are the page menu (top right) versus the block handle (left of a block).
2. Check you are in the right page or teamspace — the sidebar shows the path.
3. Full click-by-click steps: Learner Guide and the lab's instruction PDF.

 © 2026 Tertiary Infotech Academy Pte Ltd

Lunch Break

1 hour · back for PM digital attendance

03

TOPIC 03 · LU2 · A2 · K2

Pages and Content Blocks

Writing, editing and customisation · keyboard shortcuts · columns, tables, headings and dividers · images, files and media · code blocks and buttons · synced blocks

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 03 · WHAT THIS TOPIC COVERS

Key Concepts — Pages and Content Blocks

1

Slash commands create blocks

Type / for every block type: basic (text, headings, lists, toggles, quotes, callouts), database, media, embeds and advanced blocks.

2

Markdown and shortcuts

Markdown-style shortcuts (#, -, [], >, ```) and keyboard shortcuts (Cmd/Ctrl+B, Cmd/Ctrl+E, Cmd/Ctrl+Shift+0-9) make writing fast.

3

Structure with layout blocks

Headings build the table of contents, dividers separate sections, simple tables hold small grids and drag-to-side creates columns.

4

Media in context

Upload or embed images, files, video, audio, PDFs and web bookmarks; align, resize and caption them where the content needs them.

5

Code blocks and buttons

Code blocks add syntax highlighting, wrap and copy; buttons insert blocks, add pages or edit properties in one click.

6

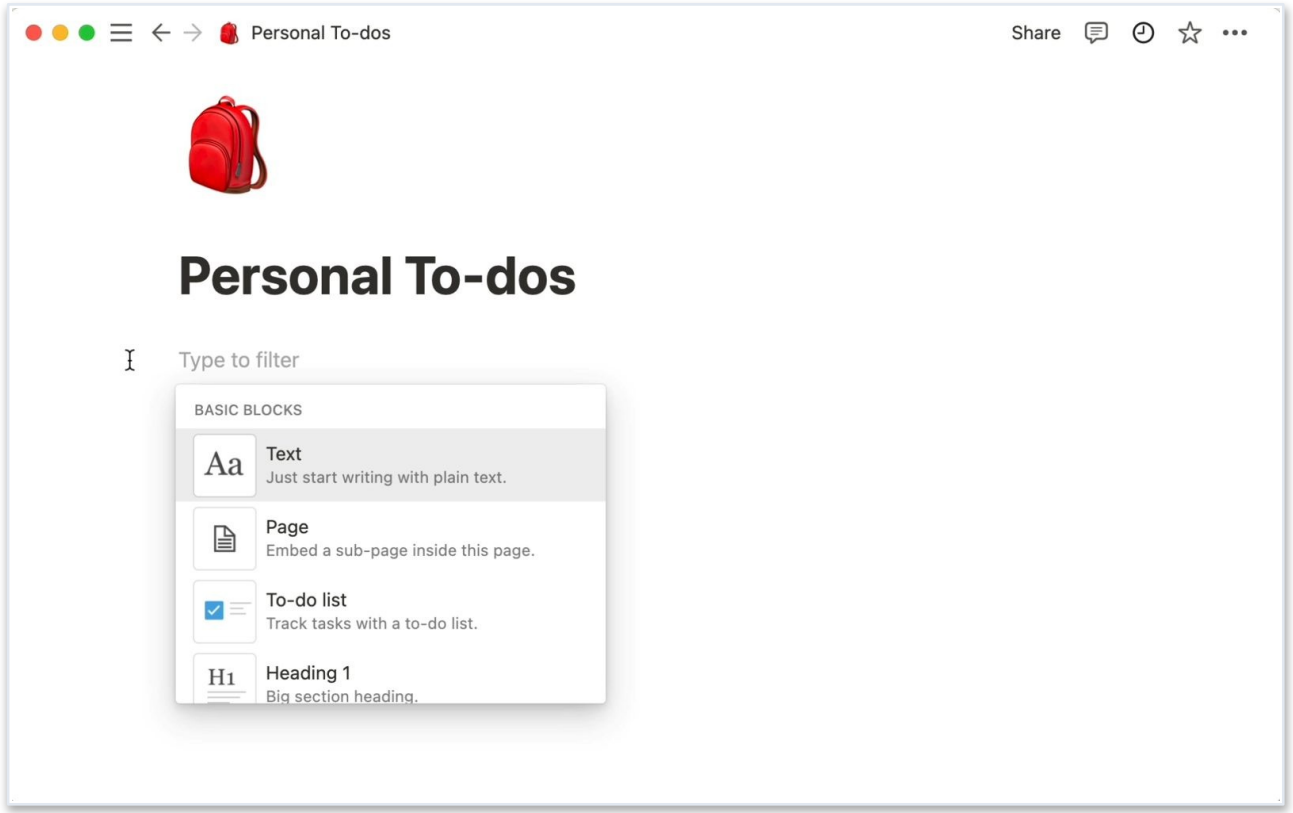

Synced blocks

Content that must appear in several places (a footer, a policy notice) is written once in a synced block and edited everywhere at once.

 © 2026 Tertiary Infotech Academy Pte Ltd

WRITE AND EDIT

Editing Tools and the Block Menu

1 Floating toolbar

Select text: bold, italic, underline, strike, code, link, comment, colour, Ask AI.

2 Block handle ⋮⋮

Delete, Duplicate, Turn into, Move to, Comment, Colour, Copy link to block.

3 Multi-select

Shift+Up/Down or drag to select several blocks; act on them together.

4 Undo everywhere

Cmd/Ctrl+Z reverses edits; Trash and page history recover deletions.

 © 2026 Tertiary Infotech Academy Pte Ltd

THE / MENU

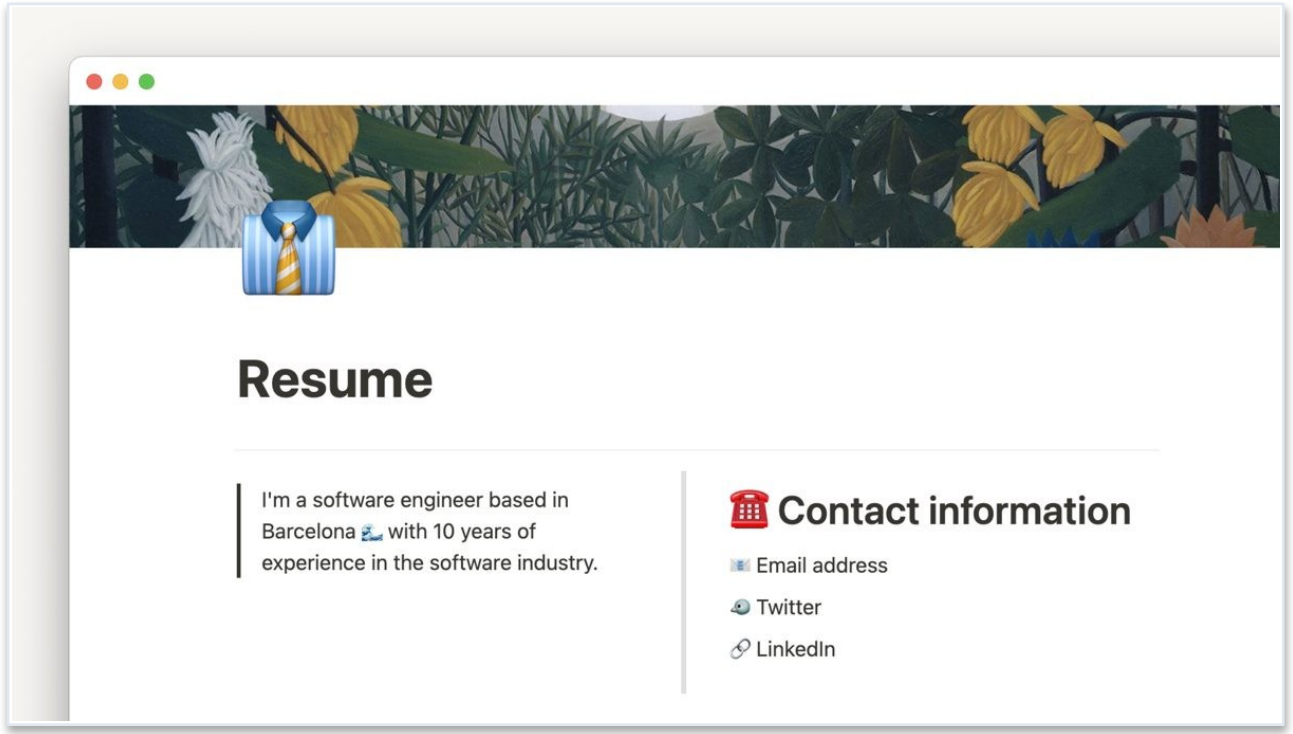

Block Types at a Glance

Group	Blocks	Typical Brightwave use
Basic	Text, headings 1–3, bulleted, numbered, to-do, toggle, quote, divider, callout, link to page	Article body, policies, checklists
Database	Table, board, gallery, list, calendar, timeline — inline or full page	Content calendar, tasks, clients
Media	Image, video, audio, file, code, web bookmark	Hero images, media kit PDF, scripts
Embeds	Google Drive, Maps, Figma, Loom, PDF, Tweet, GitHub gist, Typeform, CodePen, Miro	Design files, recordings, forms
Advanced	Math equation, template button, breadcrumb, table of contents, synced block, toggle heading, columns	Formulas, navigation, brand footer
Inline	Mention person, page or date, emoji, equation	Owners, reminders, cross-links

 © 2026 Tertiary Infotech Academy Pte Ltd

LAYOUT

Columns, Tables, Headings and Dividers

1 Columns by dragging

Drop a block beside another until the blue vertical guide appears; drag the divider to resize.

2 Simple tables

/table gives a lightweight grid with header row and column options — not a database.

3 Headings drive structure

H1 → H2 → H3 build the table of contents; toggle headings collapse whole sections.

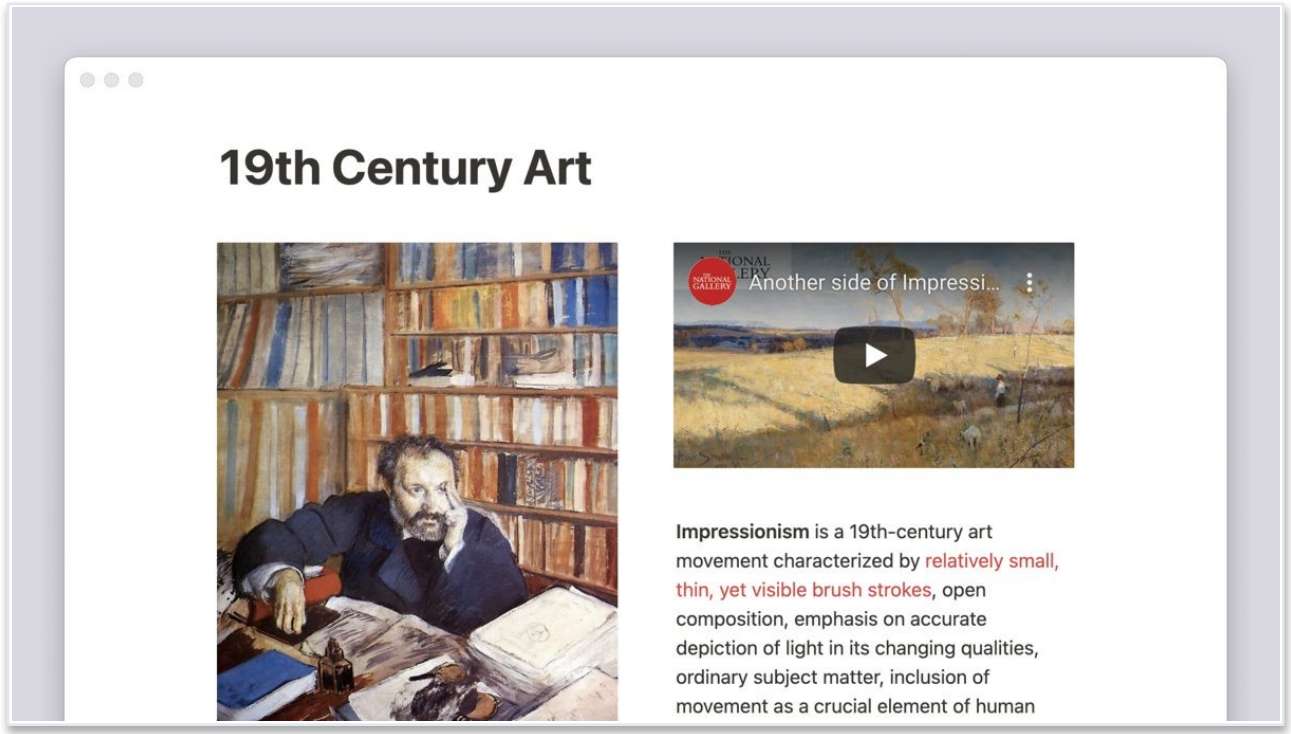

4 Dividers and spacing

/divider separates sections; empty blocks add breathing room without styling tricks.

 © 2026 Tertiary Infotech Academy Pte Ltd

SHOW, DON'T TELL

Images, Files and Media

1 Upload or embed

Upload from your device, paste a URL, or pick from Unsplash and GIPHY.

2 Align, resize, caption

Hover controls set alignment and width; captions are styled text under the block.

3 Files and PDFs

/file embeds a downloadable file; PDFs preview inline; /video and /audio play in page.

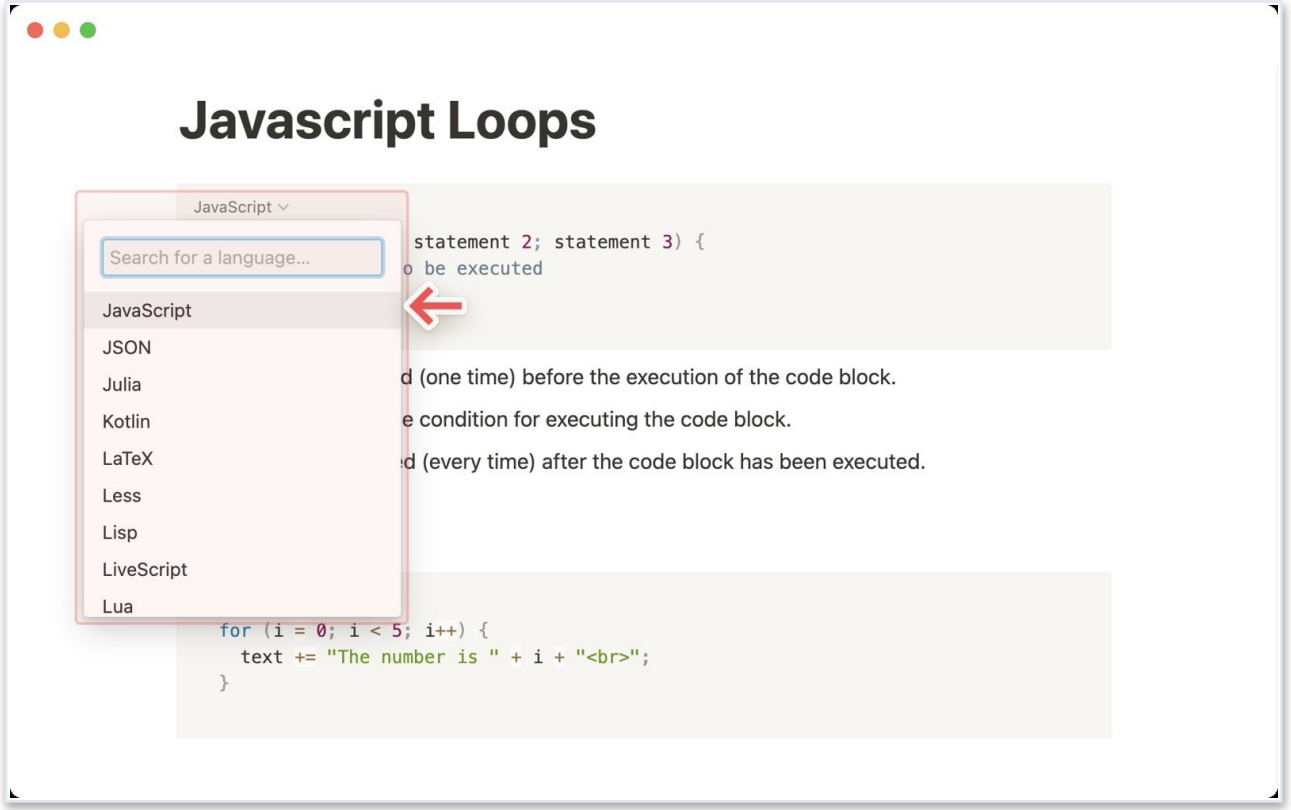

4 Web bookmarks

Paste a link → Create bookmark for a card with title, description and preview image.

 © 2026 Tertiary Infotech Academy Pte Ltd

TECHNICAL CONTENT

Code Blocks and Buttons

1 Syntax highlighting

Choose from 60+ languages; toggle Wrap code; copy with one click; add a caption.

2 Buttons automate

/button → Insert blocks, Add page to, Edit pages in, Show confirmation, Open page.

3 Standard checklists

A button that inserts the article checklist keeps every editor on the same process.

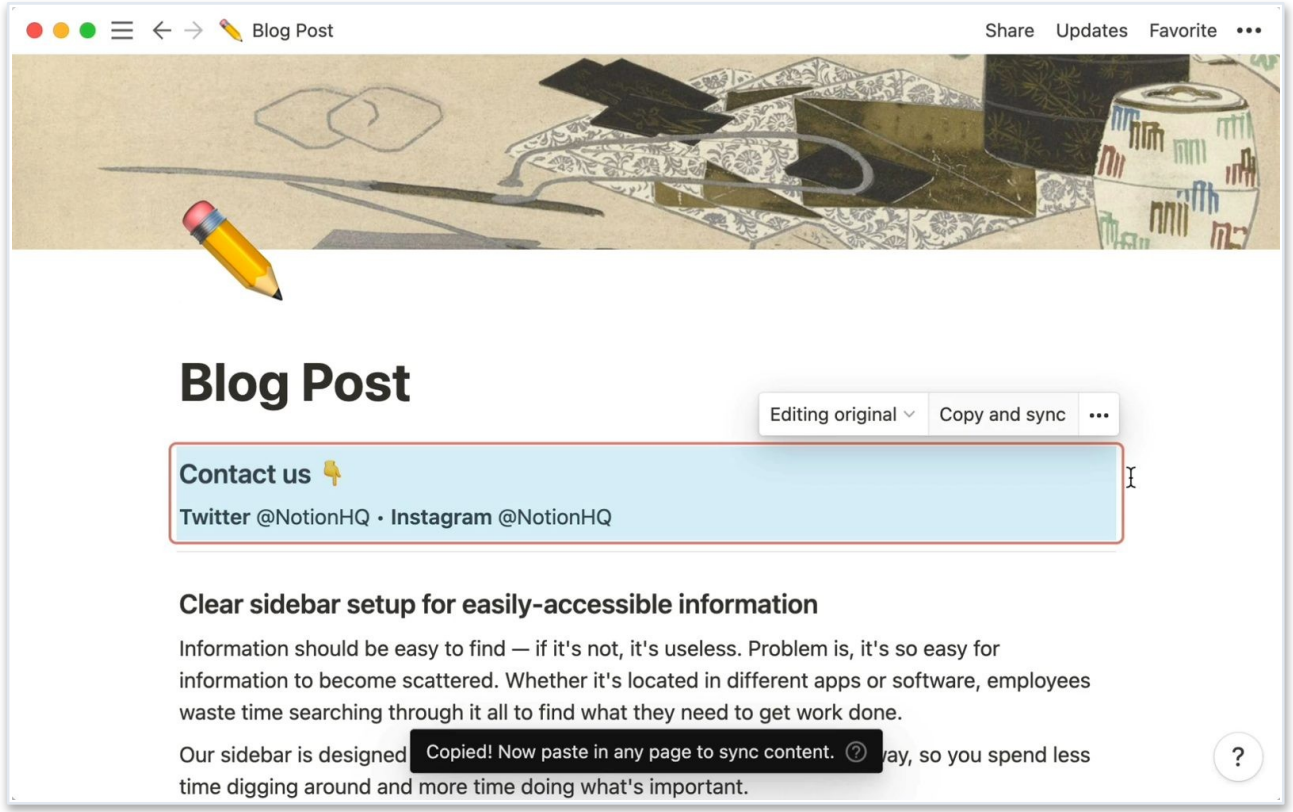

4 Buttons in databases

Button properties run the same actions per row — approve, archive, log a review.

 © 2026 Tertiary Infotech Academy Pte Ltd

CONSISTENCY

Synced Blocks — Write Once, Update Everywhere

1 One source, many copies

Copy and sync a block to other pages; edits appear in every copy instantly.

2 Red outline

Synced blocks show a red border on hover with a count of pages using them.

3 Unsync when needed

··· → Unsync detaches a copy; Unsync all turns every copy into plain blocks.

4 Brightwave use

Brand footer, policy notice and contact block are synced across all public pages.

 © 2026 Tertiary Infotech Academy Pte Ltd

FROM DRAFT TO PUBLISHED

Posting Web Content — the Deployment Path

WHY IT MATTERS Deployment in a CMS means content is structured, reviewed and reachable — not merely typed.

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 03 · HANDS-ON LAB · FOUNDATION

Draft and Format a Blog Article with Blocks, Columns and Tables

LAB 04 | K2 · A2 | 40 min

You post the supplied blog article draft into the Content Hub, structure it with headings, lists, toggles, quotes and dividers using slash commands and Markdown shortcuts, lay out a two-column comparison, and add a simple table from the facts sheet so the article is ready for deployment.

You will build

A fully structured blog article page in the Content Hub with headings, a table of contents, two columns and a facts table

Tools: Notion editor, Markdown shortcuts

LAB 04 · ACCEPTANCE CHECK

Draft and Format a Blog Article with Blocks, Columns and Tables

✅ Acceptance check

The article page has a working table of contents, one Heading 1 and a Heading 2 per trend, a collapsed toggle, a quote block, an equal two-column section and a six-row simple table with a header row matching article-facts-table.csv.

IF IT DOES NOT WORK

1. Re-read the step: most misses are the page menu (top right) versus the block handle (left of a block).
2. Check you are in the right page or teamspace — the sidebar shows the path.
3. Full click-by-click steps: Learner Guide and the lab's instruction PDF.

TOPIC 03 · HANDS-ON LAB · INTERMEDIATE

Add Media, Code Blocks, Buttons and a Synced Brand Footer

LAB 05 | K2 · A2 | 40 min

You enrich the article and the Content Hub with the supplied hero image and chart, an embedded PDF and video bookmark, a syntax-highlighted code sample, a button that inserts a standard 'article checklist', and a synced brand footer that appears on every article and updates from one place.

You will build

A media-rich article with captioned images, embeds, a code block, an insert-checklist button and a synced footer used on two pages

Tools: Notion media blocks, code blocks, buttons, synced blocks

ASSESSED K2 · A2

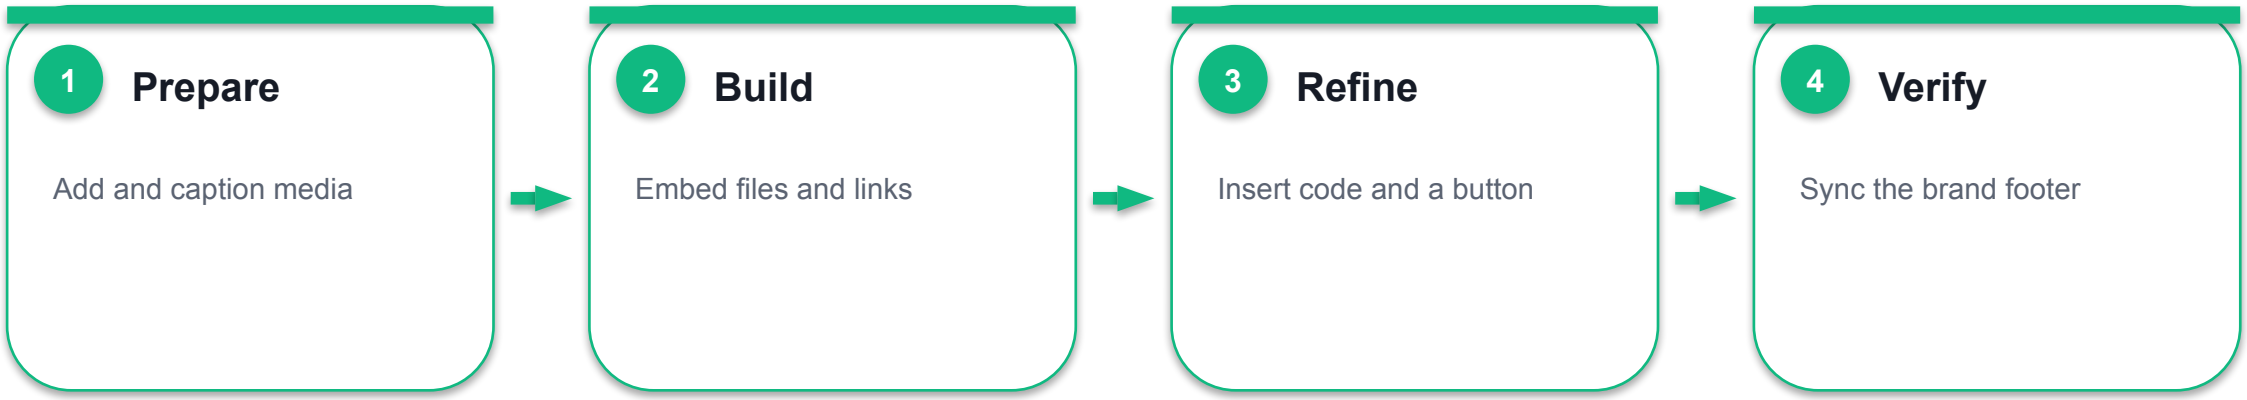

LEVEL Intermediate

EVIDENCE Screenshots · lab README checklist

LAB 05 · WORKFLOW

How Lab 05 Runs

WHY IT MATTERS The shape of the work — the full click-by-click procedure is in the Learner Guide (Lab 05) and the lab's instruction PDF.

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 05 · ACCEPTANCE CHECK

Add Media, Code Blocks, Buttons and a Synced Brand Footer

✅ Acceptance check

The article shows a captioned full-width hero image, a centred chart, an embedded PDF, a web bookmark, a Python code block with wrap on, the Insert article checklist button inserts four to-dos, and the same synced footer appears on two pages and updates in both when edited.

IF IT DOES NOT WORK

1. Re-read the step: most misses are the page menu (top right) versus the block handle (left of a block).
2. Check you are in the right page or teamspace — the sidebar shows the path.
3. Full click-by-click steps: Learner Guide and the lab's instruction PDF.

TOPIC 04 · LU2 · A2 · K4

Advanced Content Techniques

Customising and styling content · links, backlinks and efficient navigation · math equations and diverse media types

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 04 · WHAT THIS TOPIC COVERS

Key Concepts — Advanced Content Techniques

1

Style with intent

Text colours, background colours, fonts (default, serif, mono), small text and full width are used per the style guide, not per mood.

2

Callouts, icons and covers

Callouts highlight warnings and tips; page icons and cover images make pages recognisable in the sidebar and in search.

3

Links and backlinks

Link inline with @ or [[; every link creates a backlink on the target page, so readers can navigate in both directions.

4

Navigation hubs

A home page with link-to-page blocks, a table of contents block and breadcrumbs gives readers one entry point to the whole space.

5

Math equations

KaTeX equations render as a block (/math) or inline ($$), for pricing formulas, KPIs and technical documentation.

6

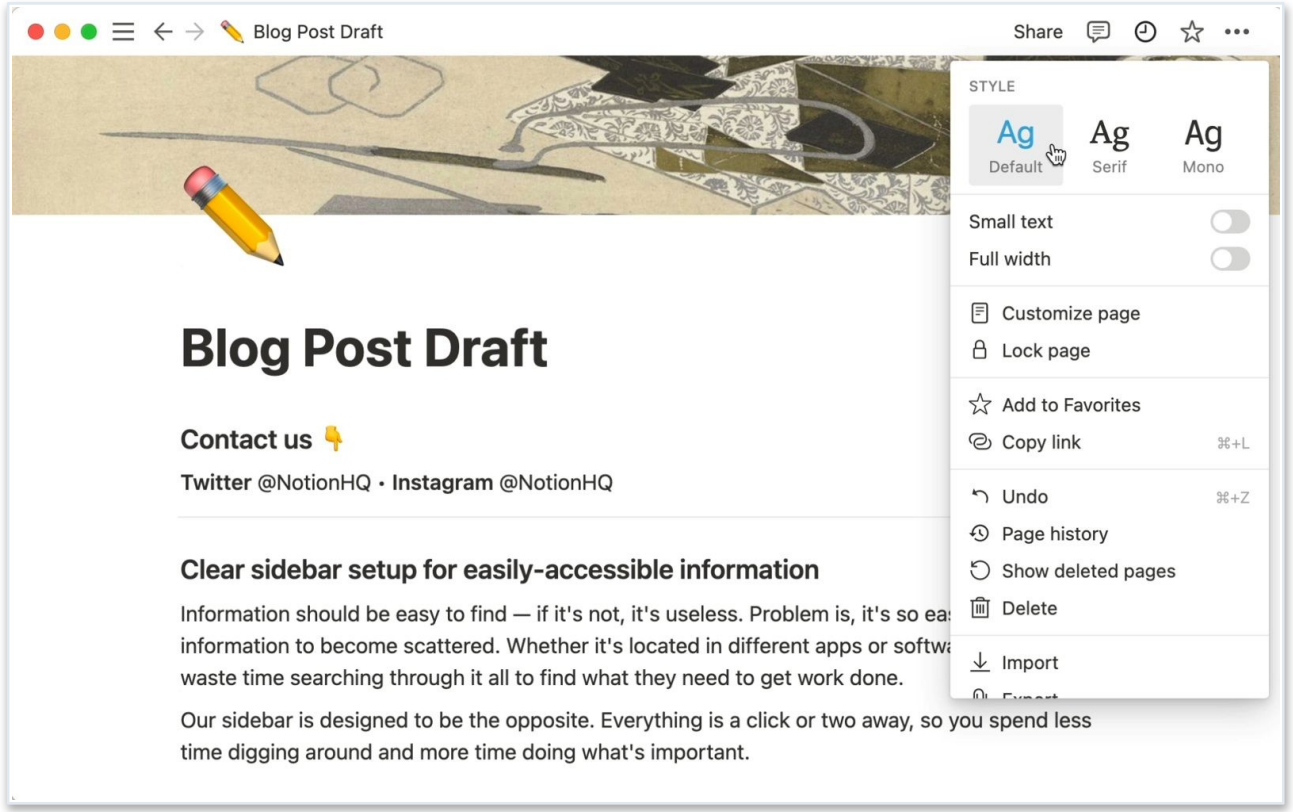

Curation guidelines

A style guide, naming convention and review workflow turn individual pages into a consistent, trustworthy body of content.

 © 2026 Tertiary Infotech Academy Pte Ltd

STYLE WITH INTENT

Customise and Style Your Content

1 Text and background colour

Nine colours each, from the toolbar A menu or ⋮⋮ → Colour; Cmd/Ctrl+Shift+H repeats the last.

2 Fonts and width

Default, Serif or Mono per page; Small text and Full width from the ⋯ menu.

3 Callouts

Icon + background for tips, warnings and policy notices — colour-coded by the style guide.

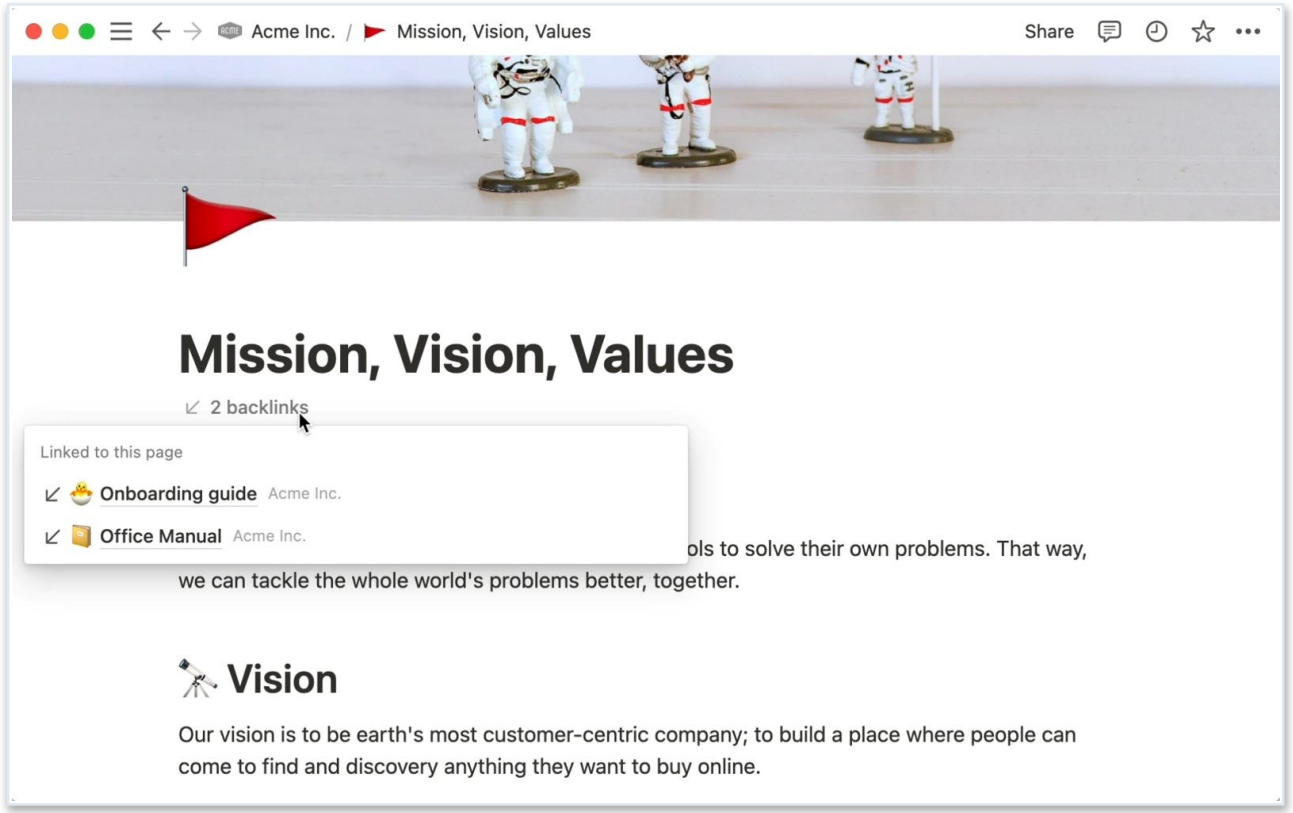

4 Icons and covers

Emoji, icon sets or uploads for icons; gallery, Unsplash or upload for covers.

 © 2026 Tertiary Infotech Academy Pte Ltd

TWO-WAY NAVIGATION

Links and Backlinks

1 Inline links

@ mention, [[link, or Cmd/Ctrl+K on selected text; paste a URL as link, bookmark, mention or embed.

2 Link to page block

A full-width block that shows the page title and icon — the building block of a hub.

3 Backlinks appear automatically

Every target page lists the pages that link to it, under the title.

4 Customise page

Show backlinks expanded, in a popover or off; show or hide comments and properties.

 © 2026 Tertiary Infotech Academy Pte Ltd

EFFICIENT NAVIGATION

Build a Navigation Hub

1

Start-here page

One home page per section with link-to-page blocks in reading order.

2

Table of contents

/table of contents on long pages; toggle headings for skimming.

3

Breadcrumb block

/breadcrumb shows the path on a page — useful on public sites without the sidebar.

4

Favorites and sidebar order

Pin the hub pages; keep section pages in a consistent order for every teamspace.

5

Two-click rule

Any published article is reachable in two clicks from the hub — measure it.

6

Backlinks as related reading

The backlinks list is a free 'related pages' panel — link generously.

 © 2026 Tertiary Infotech Academy Pte Ltd

TECHNICAL NOTATION

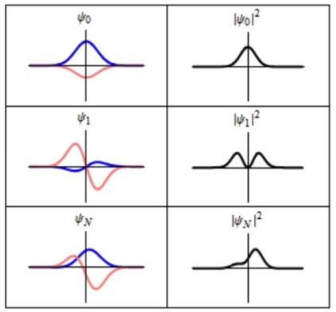

Math Equations with KaTeX

Shrödinger equation

The **Shrödinger equation** is a linear partial differential equation that describes the wave function of a quantum-mechanical system. It is a key result in quantum mechanics, and its discovery was a significant landmark in the development of the subject.

The equation is named after Erwin Schrödinger, who postulated the equation in 1925, and published it in 1926, forming the basis for the work that resulted in his Nobel Prize in Physics in 1933.

Conceptually, the Schrödinger equation is the quantum counterpart of Newton's second law in classical mechanics.

Wave functions which satisfy the time-dependent Schrödinger equation for a harmonic oscillator.

The form of the Schrödinger equation depends on the physical situation. The most general form is the time-dependent Schrödinger equation (TDSE), which gives a description of a system evolving with time: $i\hbar\frac{d}{dt}|\Psi(t)\rangle = \hat{H}|\Psi(t)\rangle$

1 Block equation

/math equation renders a centred LaTeX block — pricing formulas, KPI definitions.

2 Inline equation

Wrap in $$ … $$ inside a sentence; click to edit; supports fractions, Greek letters, sums.

3 Where it helps

Retainer pricing, ROI, engagement rate — documented once, referenced everywhere.

4 Beyond equations

Diverse media: video, audio, PDFs, Loom walkthroughs, Figma frames and Miro boards in the same page.

 © 2026 Tertiary Infotech Academy Pte Ltd

Content Curation Guidelines

Creating

- **Creation rules**
  - Use the approved article template and the button checklist
  - Titles follow the naming convention — Title Case, no dates, no abbreviations
  - One idea per heading; headings build the table of contents
  - Images captioned, files named, code blocks labelled with a language
  - Colour and callouts only as the style guide defines them

Curating

- **Curation rules**
  - Every page has an owner and a verification date
  - Comments record decisions; resolved, never deleted
  - Related pages linked both ways; hubs updated when pages move
  - Stale pages archived to a dated section, not deleted — page history and trash are the backstop
  - A quarterly review of the Verification view keeps the wiki trustworthy

RULE A style guide is a policy: publish it in the wiki, verify it, and link every template to it.

 © 2026 Tertiary Infotech Academy Pte Ltd

DECISION RULE

Should This Content Be a Page or a Database?

DATABASE

- Make it a database: each item becomes a page with properties
- Add views for each audience — board for editors, calendar for planning
- Templates give every new item the same structure

PAGE

- Keep it a page: rich, one-off content built from blocks
- Use headings, a table of contents and callouts for structure
- Link it from a hub and give it an owner

RULE Ten similar pages are a sign you need a database; ten different pages are a sign you need a hub.

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 04 · HANDS-ON LAB · INTERMEDIATE

Apply the Style Guide: Callouts, Links, Backlinks, Equations and a Navigation Hub

LAB 06 | K4 · A2 | 45 min

You apply the supplied Brightwave style guide across the Content Hub — colours, fonts, callout conventions, icons and covers — build a navigation hub with link-to-page blocks and backlinks so every article is reachable in two clicks, and document the pricing formula with KaTeX equations.

You will build

A styled Content Hub with a navigation hub page, backlinks on every article, a style-compliant callout system and an equations page

Tools: Notion styling, links and backlinks, math equations, link-to-page blocks

END OF DAY 1 · PM DIGITAL ATTENDANCE

Day 1 Recap — What You Can Now Do

1

Workspace and pages

Create a workspace, pages, sub-pages and blocks, and organise the sidebar (Lab 1).

2

Policies and wikis

Import policies, assign owners, verify pages and publish the content policy (Lab 2).

3

Collaboration

Review with comments, mentions, reminders, Inbox and search filters (Lab 3).

4

Rich content

Post and structure an article with blocks, columns and tables (Lab 4).

5

Media and reuse

Images, files, embeds, code blocks, buttons and synced blocks (Lab 5).

6

Curation

Apply a style guide, build a navigation hub, link and backlink, add equations (Lab 6).

 © 2026 Tertiary Infotech Academy Pte Ltd

End of Day 1

See you tomorrow at 9:30am — Databases, Publishing and Notion AI

05

TOPIC 05 · LU3 · A3 · K3

Database Essentials

Introduction to databases in Notion · properties and data sources · tasks, dependencies and linked databases · database views

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 05 · WHAT THIS TOPIC COVERS

Key Concepts — Database Essentials

1

A database is a set of pages

Every row, card or event is a full Notion page with properties on top and free content below. Full-page or inline, the data is the same.

2

Properties give structure

Title, text, number, select, multi-select, status, date, person, files, checkbox, URL, email, phone, formula, relation, rollup, created/edited time and ID.

3

Databases vs spreadsheets

There are no cell coordinates; each row has the same properties with its own values. That is why the same data can be shown as a board or calendar.

4

Views change the lens

Table, board, list, calendar, timeline, gallery, chart and form are layouts of one data source; each view keeps its own filters, sorts and groups.

5

Filters, sorts and groups

Simple filters target one property; advanced filters combine AND/OR groups. A filtered view also sets defaults on new rows (a forcing function).

6

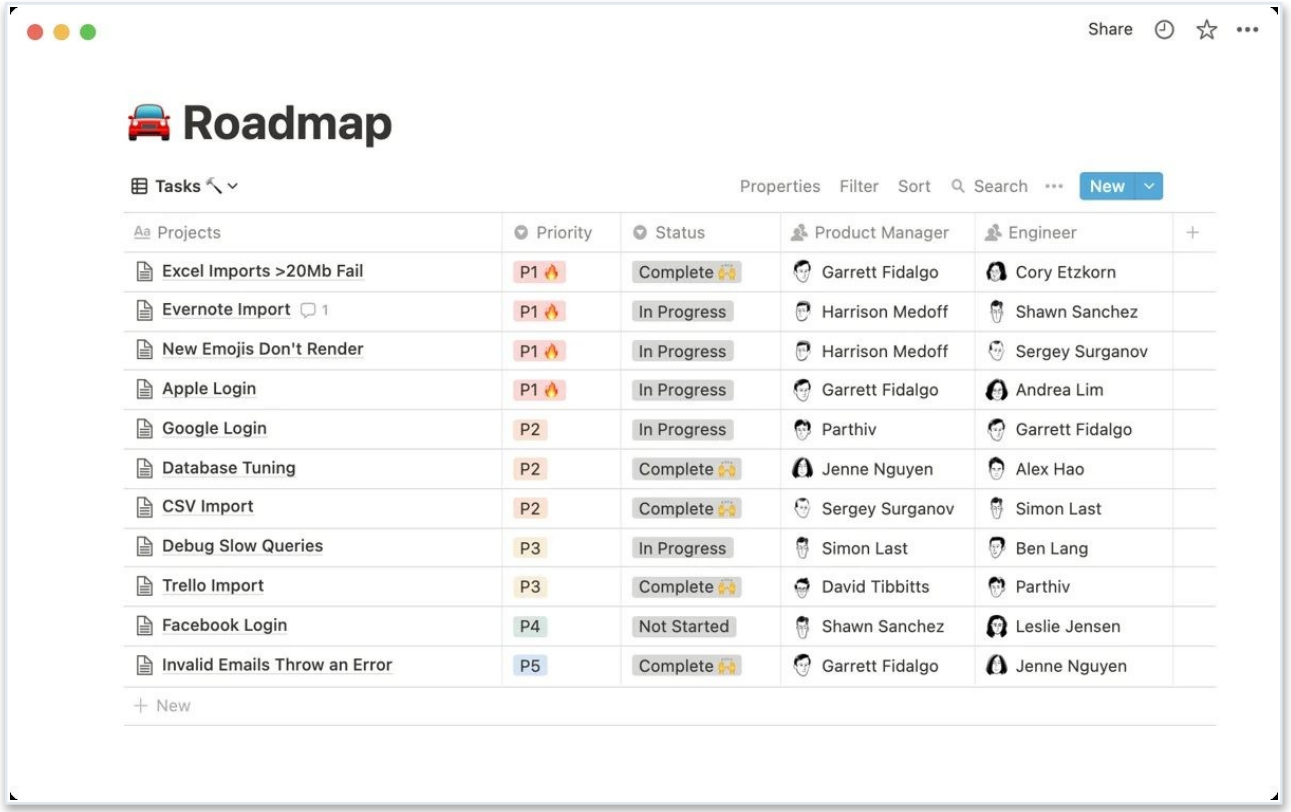

Data sources and linked views

A linked view shows an existing data source in another page with its own views; sub-items and dependencies model task hierarchies and date shifting.

 © 2026 Tertiary Infotech Academy Pte Ltd

THE CORE IDEA

A Database Is a Collection of Pages

1 Every row is a page

Open any row, card or event: properties on top, unlimited content below.

2 Properties contextualise

Dates, status, people, links and files label every item consistently.

3 Many ways to view

The same data as table, board, list, calendar, timeline, gallery, chart or form.

4 Multiple data sources

One database can hold several data sources — contacts, companies and deals side by side.

 © 2026 Tertiary Infotech Academy Pte Ltd

WHY VIEWS ARE POSSIBLE

Databases Are Not Spreadsheets

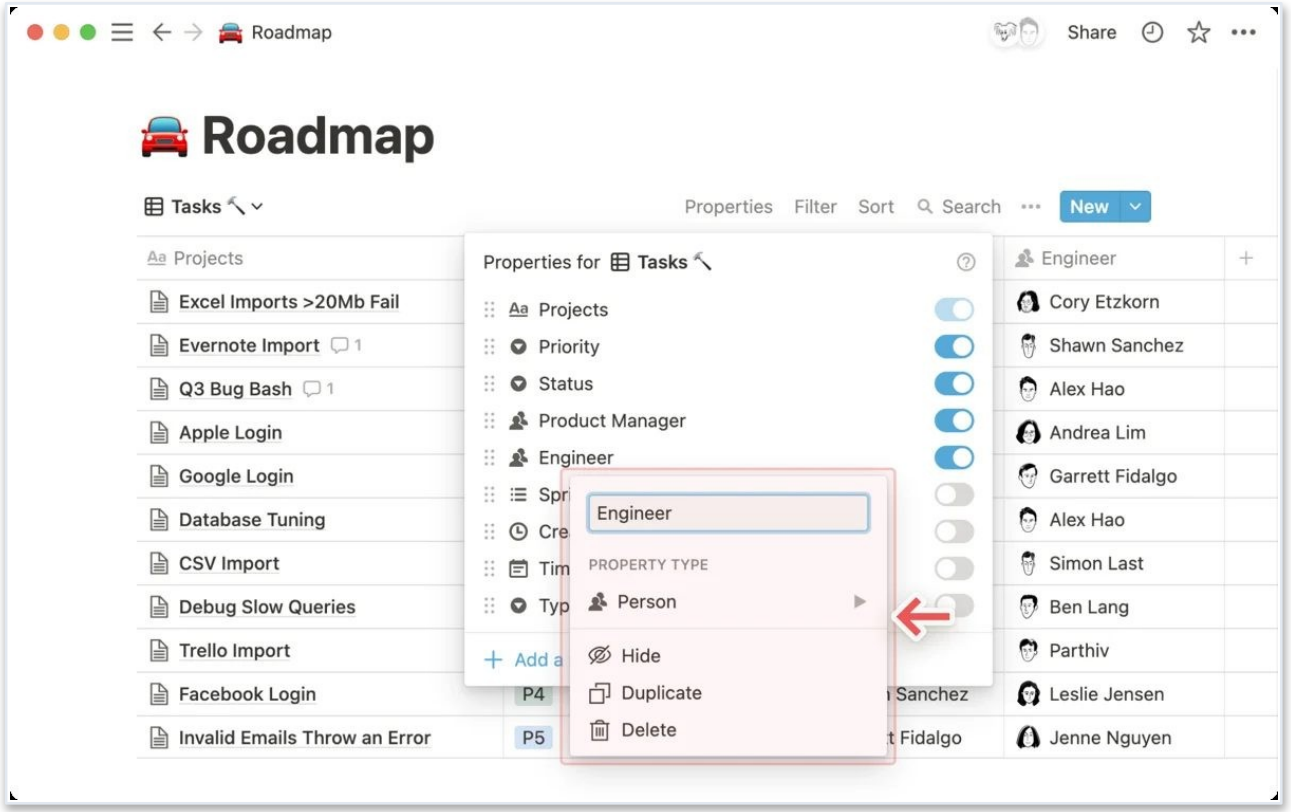

Aspect	Spreadsheet	Notion database
Unit of data	A cell at coordinates B2	A row (page) with named properties
Formulas reference	Cells: =B2+D5	Properties: prop("Hours") * prop("Rate")
Layout	One grid	Table, board, calendar, timeline, gallery, list, chart, form
Rich content	Text in a cell	A whole page under every row
Relationships	VLOOKUP across sheets	Relations and rollups between databases
Filtering	Filter rows in place	Saved views with their own filters, sorts and groups

RULE The Name (Title) property cannot be deleted — it is the page title of every row.

 © 2026 Tertiary Infotech Academy Pte Ltd

STRUCTURE

Database Properties

1 Writable types

Text, number, select, multi-select, status, date, person, files & media, checkbox, URL, email, phone, relation.

2 Computed types

Formula, rollup, created time/by, last edited time/by, ID, button, verification.

3 Manage in bulk

Edit property → type, name, options, number format; drag to reorder; hide per view; restore deleted.

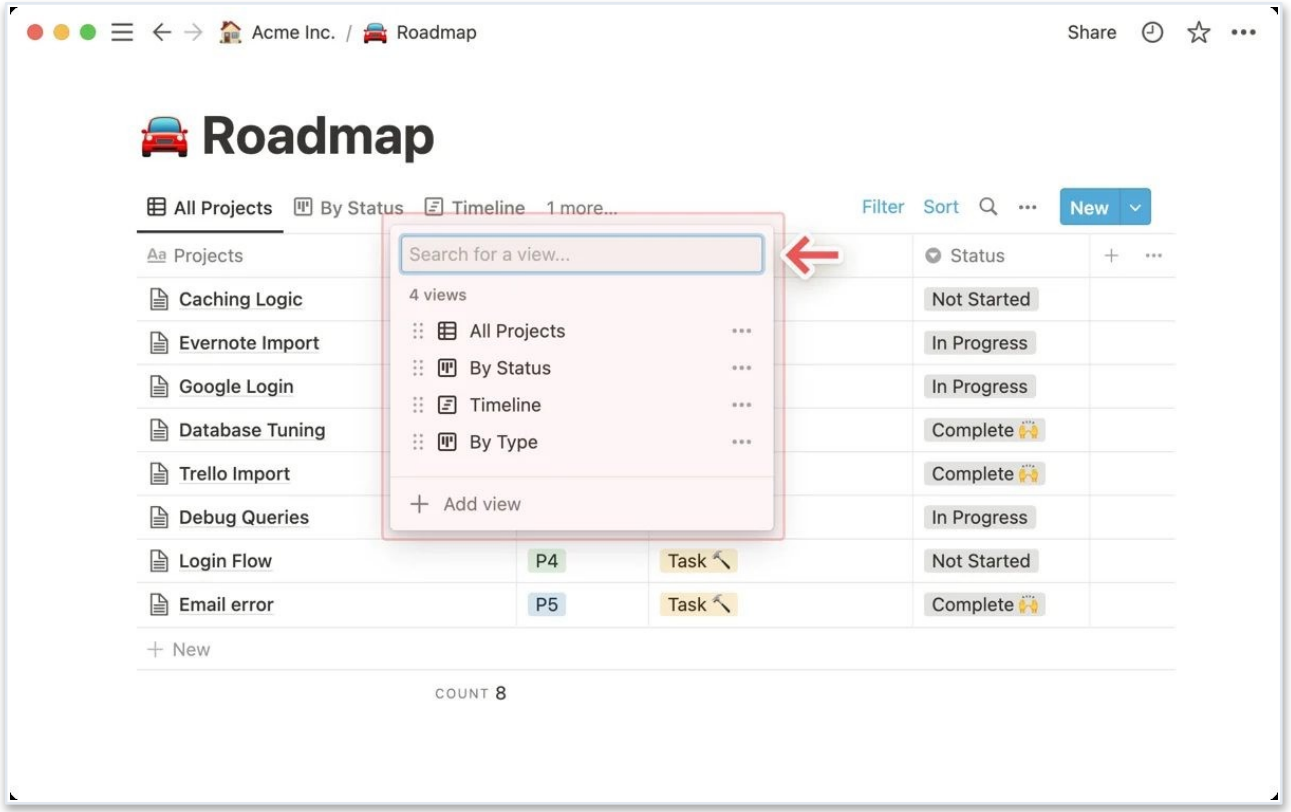

4 Property defaults

Filtered views and templates pre-fill values on new rows — a forcing function.

 © 2026 Tertiary Infotech Academy Pte Ltd

ONE SOURCE, MANY LENSES

Views, Filters, Sorts and Groups

1 Add a view

\+ next to the tabs; each view has a layout, visible properties, filters, sorts, groups and a load limit.

2 Simple vs advanced filters

One property per simple filter; advanced filters mix AND / OR in nested groups.

3 Sorts and groups

Sort by several properties in order; group any layout (board columns, table sections).

4 Save for everyone

Changes to a shared view are personal until you click Save for everyone.

 © 2026 Tertiary Infotech Academy Pte Ltd

EIGHT LAYOUTS, ONE DATA SOURCE

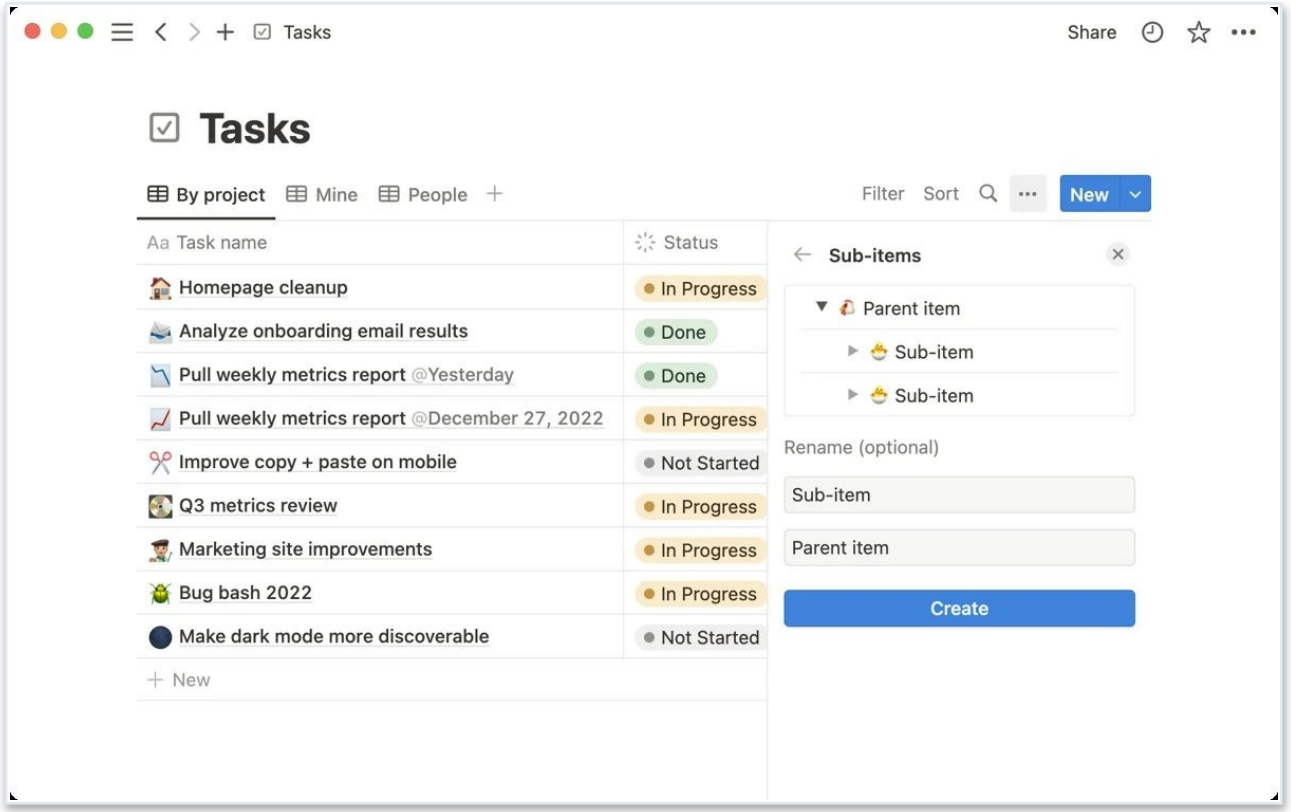

Choosing a Layout

Layout	Best for	Grouped by	Brightwave use
Table	Editing many properties at once	Any property	Content Calendar master view
Board	Status flow (kanban)	Select / status / person	Editorial pipeline
Calendar	Dated items by day or week	Date property	Publishing schedule
Timeline	Dependencies and durations (Gantt)	Person / project	Client project plan
List	Simple, mobile-friendly lists	Any property	Policies index
Gallery	Visual items with covers	Any property	Design assets, portfolio
Chart	Bars, lines, donuts from properties	Any property	Metrics dashboard
Form	Collect responses as new rows	—	Client requests, feedback

 © 2026 Tertiary Infotech Academy Pte Ltd

TASKS THAT KNOW EACH OTHER

Sub-items and Dependencies

1 Sub-items

Parent item / Sub-items properties turn a flat list into a hierarchy with a toggle per parent.

2 Dependencies

Blocked by / Blocking properties draw arrows on the timeline.

3 Date shifting

Choose whether moving a blocker shifts dependents always, only when dates overlap, or never.

4 Linked databases

/linked view shows a data source elsewhere with its own views — dashboards without duplication.

 © 2026 Tertiary Infotech Academy Pte Ltd

NATIVE CHART

Content Calendar by Status

WHAT THE DATA SHOWS

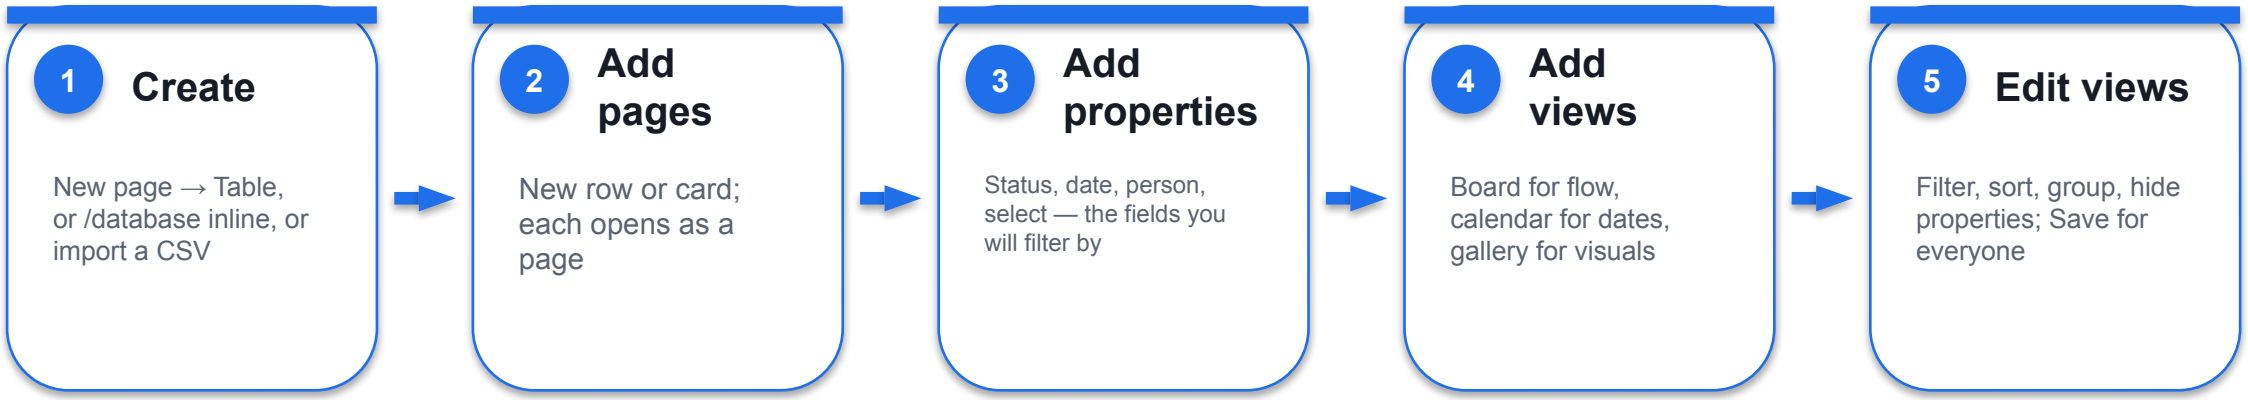

A donut of the 36 calendar items: 39% published, 17% scheduled, and a third still in draft or idea — the board view makes that backlog visible to every editor.

? Native PowerPoint chart · editable data · indicative teaching figures

 © 2026 Tertiary Infotech Academy Pte Ltd

FIRST FIVE MOVES

Setting Up a New Database

WHY IT MATTERS Build with AI can draft the properties and views from a one-sentence description — then you refine them.

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 05 · HANDS-ON LAB · FOUNDATION

Build the Content Calendar Database with Properties, Views and Filters

LAB 07 | K3 · A3 | 30 min

You import the supplied content calendar CSV into a full-page database in the Content Hub, correct the property types, open rows as pages, add board, calendar and gallery views, and build filtered views for each editor so the team maintains every web asset from one source.

You will build

A Content Calendar database with typed properties, five views (table, board by status, calendar by publish date, gallery, 'My items'), filters, sorts and grouping

Tools: Notion databases (table, board, calendar, gallery views)

ASSESSED K3 · A3

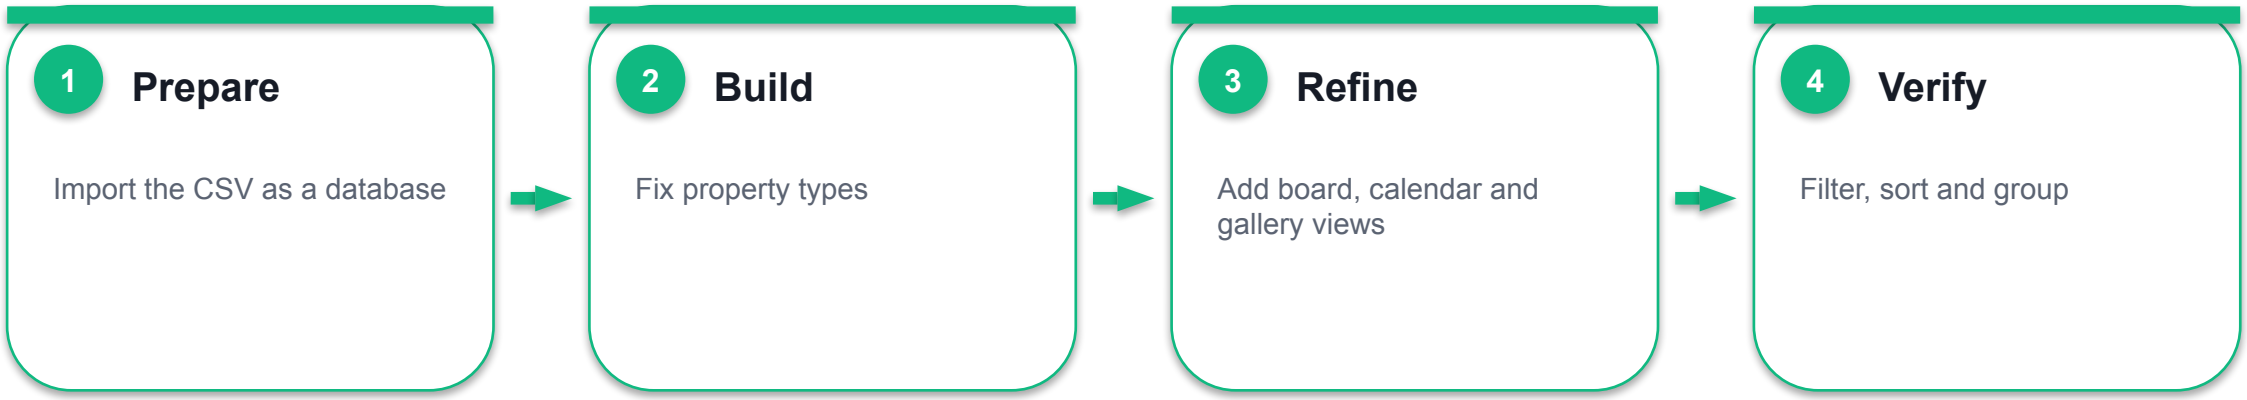

LEVEL Foundation

EVIDENCE Screenshots · lab README checklist

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 07 · WORKFLOW

How Lab 07 Runs

WHY IT MATTERS The shape of the work — the full click-by-click procedure is in the Learner Guide (Lab 07) and the lab's instruction PDF.

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 07 · ACCEPTANCE CHECK

Build the Content Calendar Database with Properties, Views and Filters

✅ Acceptance check

Content Calendar contains every row from content-calendar.csv with the corrected property types, has table, board (grouped by Status, sub-grouped by Channel), calendar, gallery and My items views, the advanced filter returns only the matching rows, and the database is locked.

IF IT DOES NOT WORK

1. Re-read the step: most misses are the page menu (top right) versus the block handle (left of a block).
2. Check you are in the right page or teamspace — the sidebar shows the path.
3. Full click-by-click steps: Learner Guide and the lab's instruction PDF.

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 05 · HANDS-ON LAB · INTERMEDIATE

Manage Client Projects with Sub-tasks, Dependencies, Timeline and Linked Views

LAB 08 | K3 · A3 | 30 min

You create the Projects and Tasks databases in Client Projects from the supplied CSVs, turn on sub-items and dependencies so date changes shift dependent tasks, plan the Nova Retail launch on a timeline, and embed linked views of the tasks inside each project page and on the Company Home dashboard.

You will build

Projects and Tasks databases with sub-tasks, dependencies and a timeline, plus linked task views inside project pages and on Company Home

Tools: Notion databases (timeline, sub-items, dependencies, linked views)

ASSESSED K3 · A3

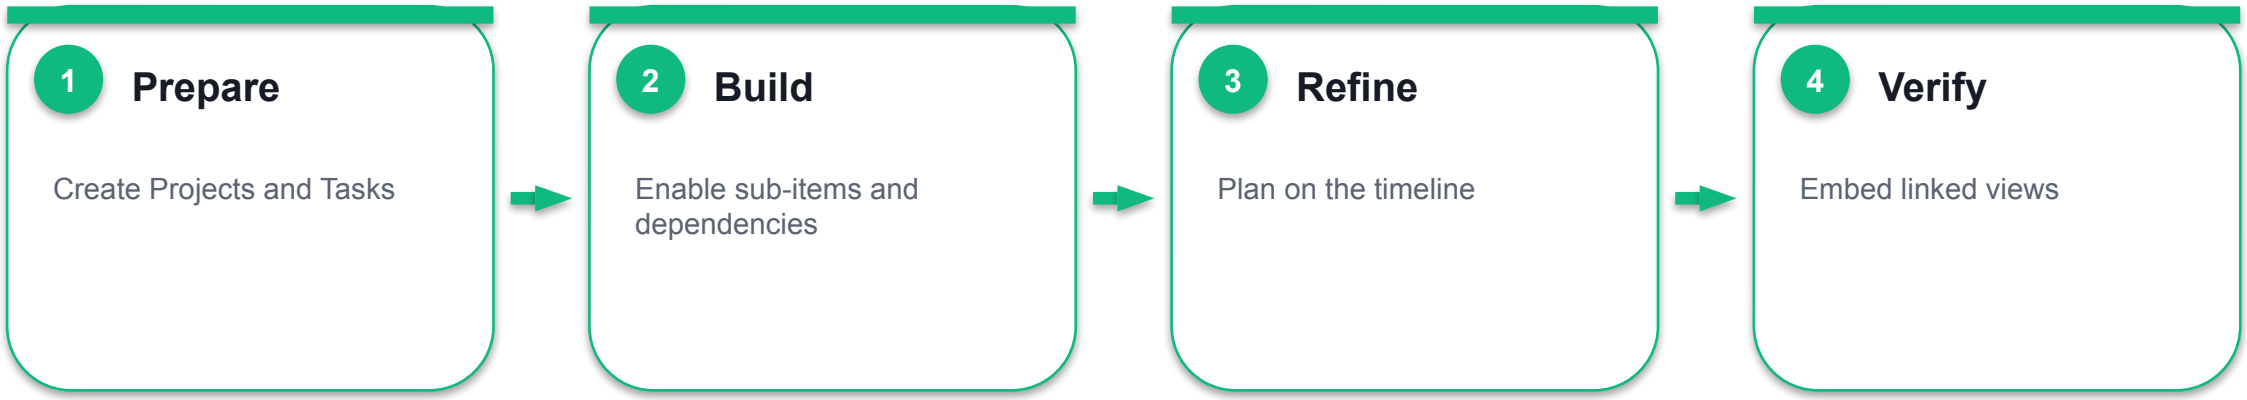

LEVEL Intermediate

EVIDENCE Screenshots · lab README checklist

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 08 · WORKFLOW

How Lab 08 Runs

WHY IT MATTERS The shape of the work — the full click-by-click procedure is in the Learner Guide (Lab 08) and the lab's instruction PDF.

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 08 · ACCEPTANCE CHECK

Manage Client Projects with Sub-tasks, Dependencies, Timeline and Linked Views

✅ Acceptance check

Tasks has parent tasks with sub-items and dependency arrows on the timeline, moving a blocking task shifts its dependents, the Overdue view lists only late open tasks, the Nova Retail Launch page shows only its own tasks in a linked view, and Company Home shows locked linked views of Tasks and Content Calendar.

IF IT DOES NOT WORK

1. Re-read the step: most misses are the page menu (top right) versus the block handle (left of a block).
2. Check you are in the right page or teamspace — the sidebar shows the path.
3. Full click-by-click steps: Learner Guide and the lab's instruction PDF.

 © 2026 Tertiary Infotech Academy Pte Ltd

06

TOPIC 06 · LU3 · A4 · K7

Advanced Database Features

Relations, rollups and database templates · formula basics and syntax · database automations

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 06 · WHAT THIS TOPIC COVERS

Key Concepts — Advanced Database Features

1

Relations connect databases

A relation property links rows in the same or another database, optionally two-way, so a project knows its tasks and a task knows its project.

2

Rollups summarise relations

A rollup reads a property through a relation and aggregates it: count tasks, sum hours, show the earliest due date, percent complete.

3

Formulas compute

Formulas use properties, built-ins and functions (if, dateBetween, format, prop) to produce text, numbers, dates, booleans or lists.

4

Database templates

A template pre-fills page content and property defaults; set one as default per view so every new brief or ticket starts complete.

5

Automations act on triggers

When a property changes or a page is added, an automation can edit properties, add pages, send Slack messages or notify people.

6

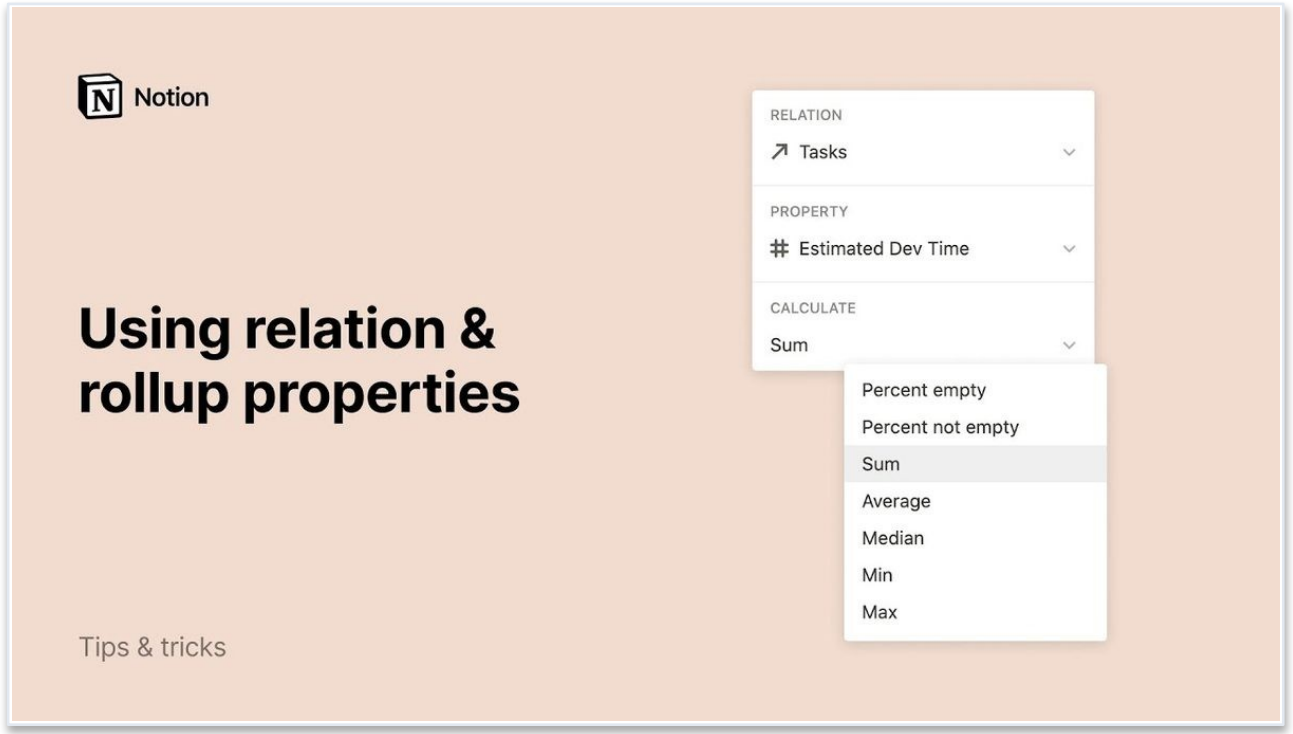

Market awareness

Notion competes with Confluence, SharePoint, Coda, Airtable and Monday; know the plan tiers and where each tool fits to advise the organisation.

© 2026 Tertiary Infotech Academy Pte Ltd

RELATIONAL MODEL

Relations Connect Databases

1 Same or different database

Relate Tasks to Projects, Projects to Clients, or a task to its parent task.

2 Two-way by default

Show on the related database creates the reciprocal property — edit either side.

3 Limit and display

Limit to one page for one-to-many; show as a property or hide in a view.

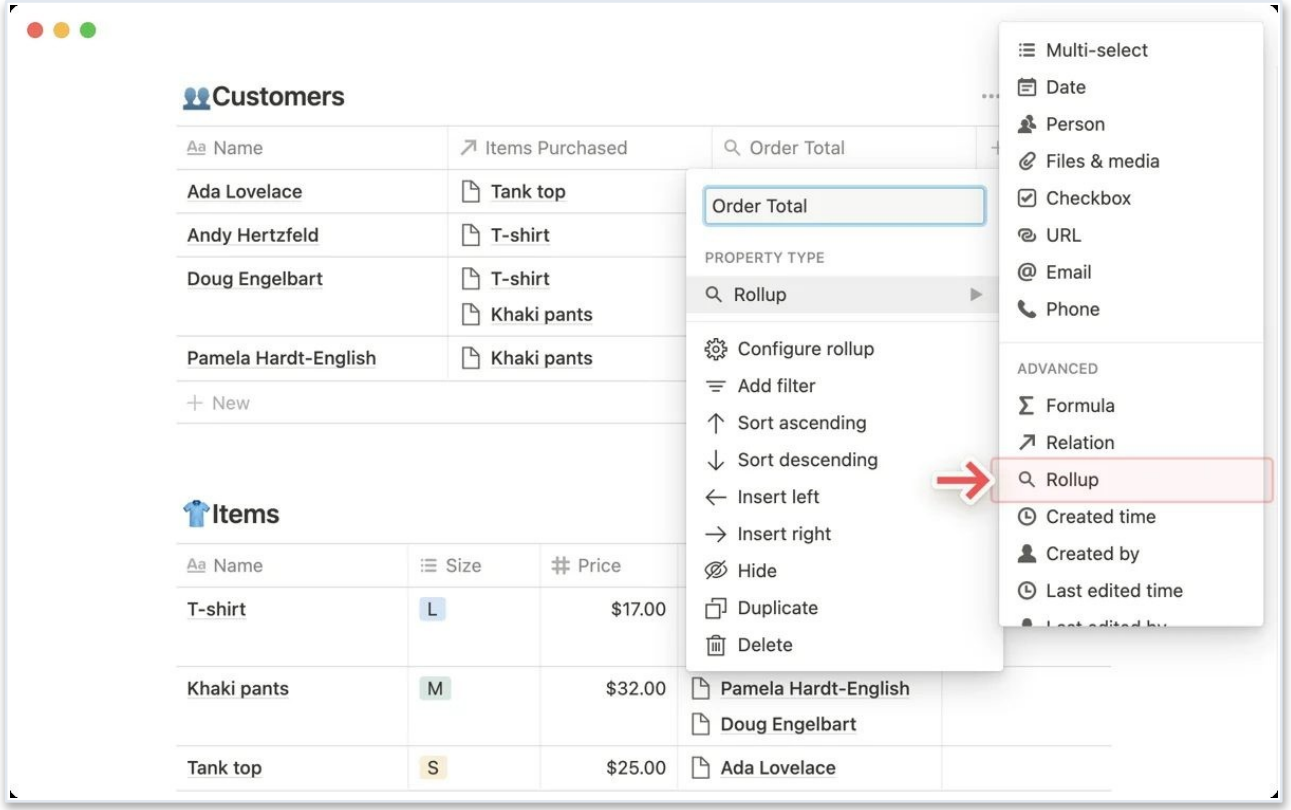

4 Brightwave model

Clients → Projects → Tasks and Deliverables — one source of truth for every client.

 © 2026 Tertiary Infotech Academy Pte Ltd

AGGREGATE

Rollups Summarise Related Rows

1 Read through a relation

Choose the relation, the property and the calculation.

2 Calculations

Count, count values, sum, average, min, max, earliest / latest date, percent checked or per group.

3 Show original

Show the related values themselves — a client sees its project names inline.

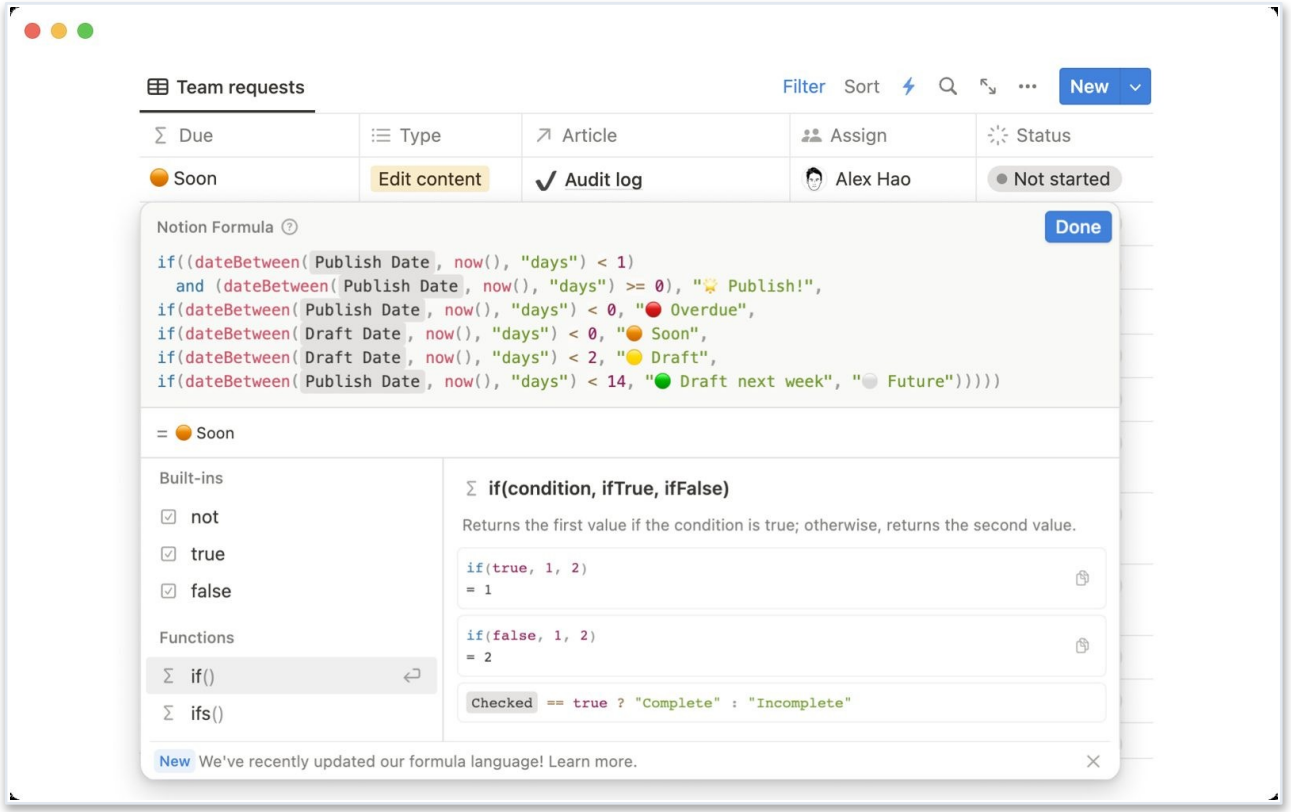

4 Examples

Total hours per project, % tasks done, next due date, total budget per client.

 © 2026 Tertiary Infotech Academy Pte Ltd

COMPUTE

Formula Basics and Syntax

1 Reference properties

prop("Name") reads a property; the editor autocompletes properties and functions.

2 Data types

Text, number, date, boolean, person, page and list — functions are typed, so convert with format() or toNumber().

3 Everyday functions

if, and, or, empty, dateBetween, dateAdd, now, format, round, concat, length, contains.

4 Read the docs

The formula reference lists every function with examples; test on one row first.

 © 2026 Tertiary Infotech Academy Pte Ltd

COPY, ADAPT, TEST

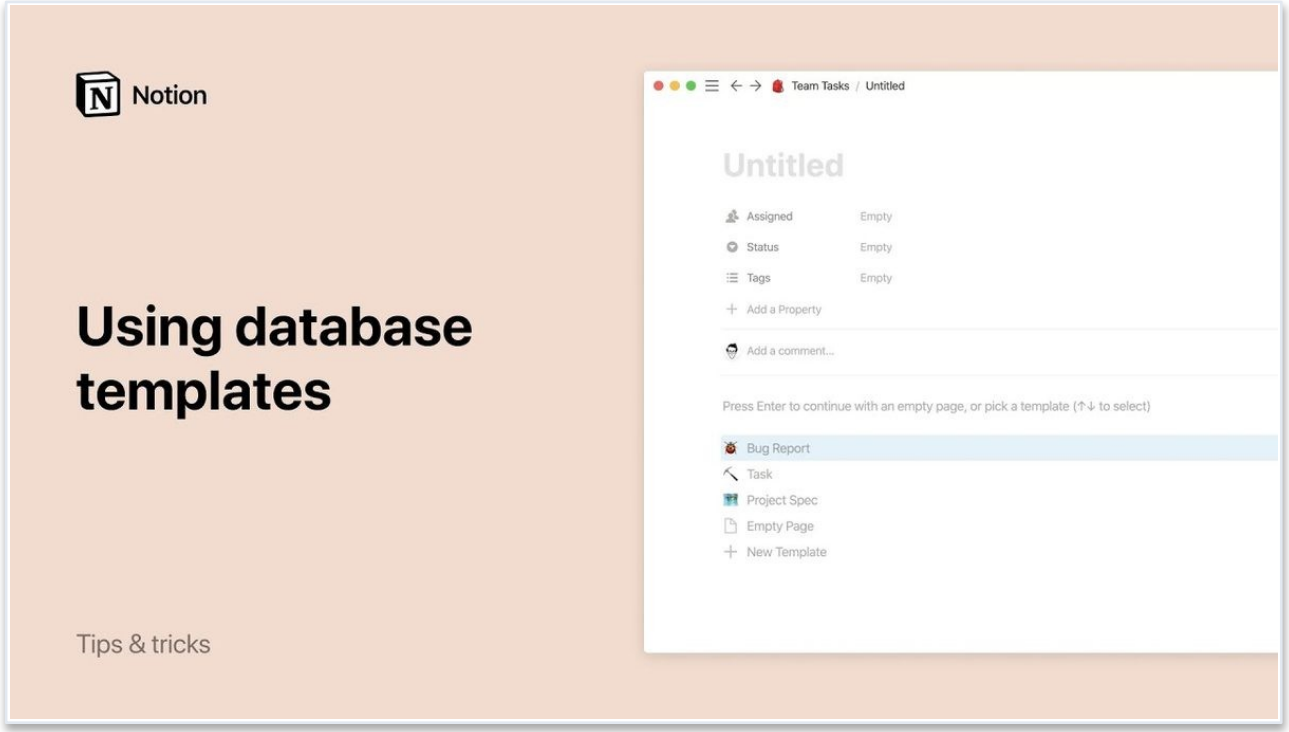

Formula Patterns Used in the Labs

Goal	Formula	Result type
Days left to a deadline	dateBetween(prop("Dates").end, now(), "days")	Number
Traffic-light health	if(prop("Tasks Done") >= 0.8, "🟢", if(prop("Days Left") < 7, "🔴", "🟡"))	Text
Budget per hour	format(round(prop("Budget (SGD)") / prop("Total Hours")))	Text
Priority score	prop("Impact") - prop("Effort")	Number
Overdue flag	and(prop("Due") < now(), prop("Status") != "Done")	Boolean
Minutes to text	format(round(prop("Avg Time (s)") / 60)) + " min"	Text

 © 2026 Tertiary Infotech Academy Pte Ltd

START COMPLETE

Database Templates

1 Create a template

New ▾ → New template: page content plus default property values.

2 Dynamic values

Date → Now or Today; Person → who duplicated the page.

3 Default per view

Set as default for this view or all views so every new row starts from it.

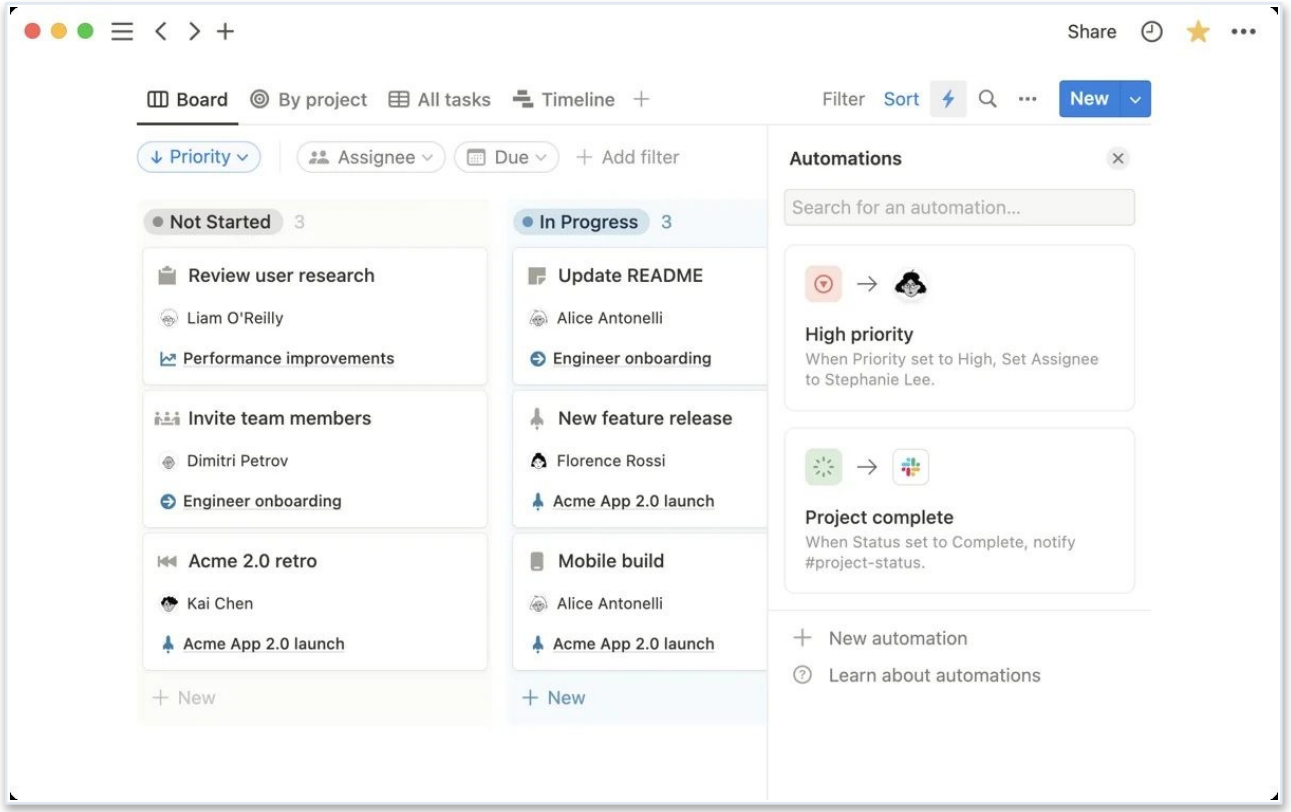

4 Nested databases

A template can contain a linked view filtered to the new page — a project brief with its own task list.

 © 2026 Tertiary Infotech Academy Pte Ltd

ACT ON TRIGGERS

Database Automations

1 Triggers

Page added; property edited (any or to a value); a button clicked; on a schedule.

2 Actions

Edit property, add a page, send Slack or Gmail notification, notify a person, send a webhook, define variables.

3 Buttons in pages

A /button can add a page, edit pages or open a page — a mini automation on demand.

4 Governance

Automations run as the creator; document them in the wiki and review quarterly.

 © 2026 Tertiary Infotech Academy Pte Ltd

KNOW THE FIELD

Market Awareness — Notion Versus Other CMS Offerings

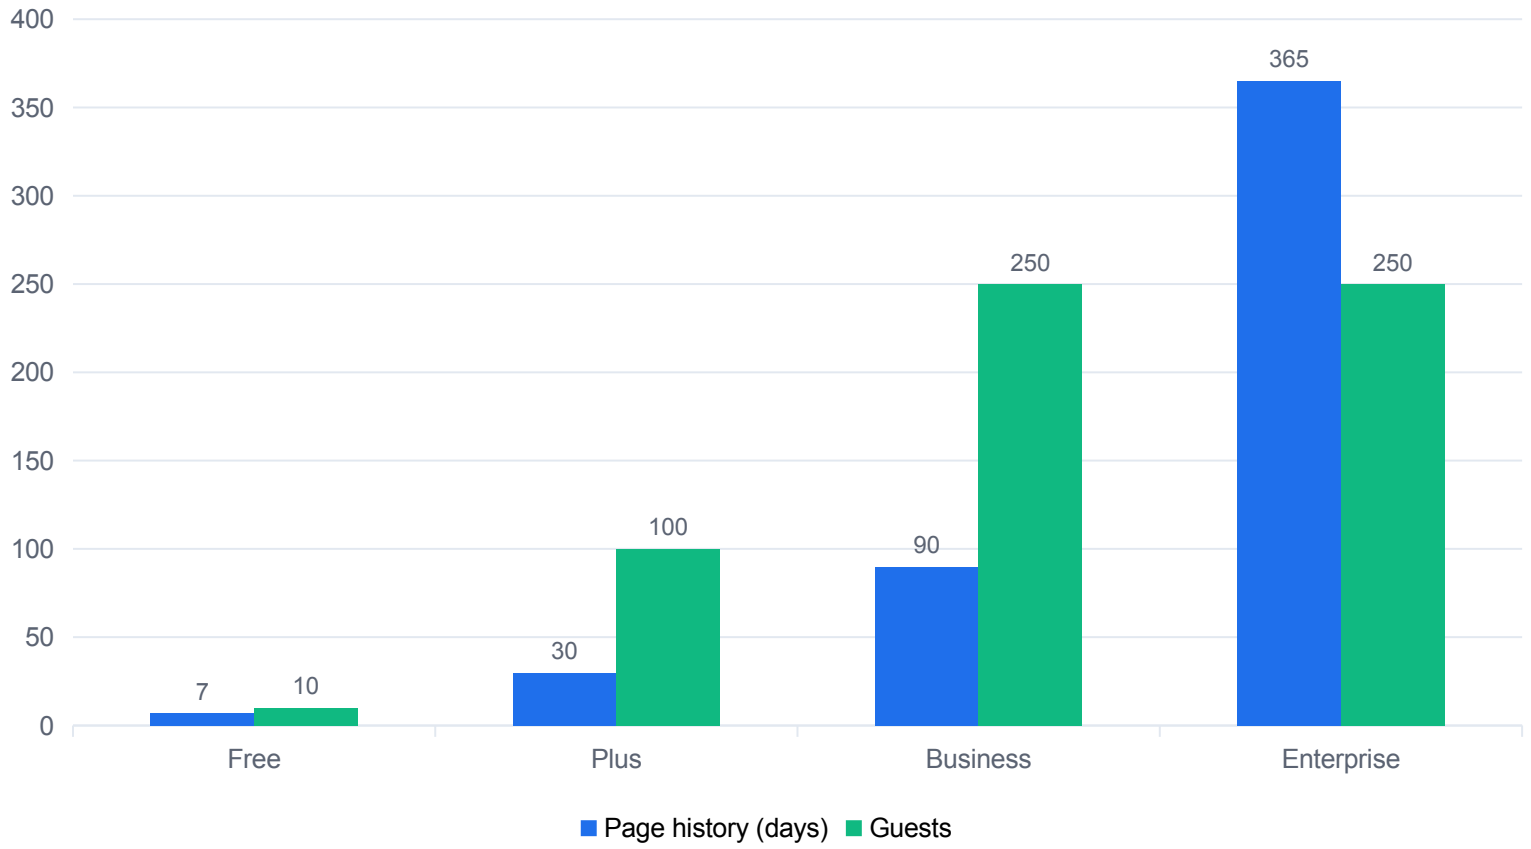

Tool	Strength	Weakness for Brightwave	Fit
Notion	Docs + databases + wiki + publishing in one; AI built in	Limited offline; web publishing is simple, not a full site builder	Primary CMS
Confluence	Enterprise wiki, Jira integration	Weak databases; heavier admin	Not needed
Airtable	Powerful relational databases and interfaces	Thin documents and wiki	Overlap with Notion databases
Monday.com	Visual project boards and automations	Not a knowledge base	Overlap with Tasks
SharePoint	Microsoft 365 integration, governance	Complex; poor authoring experience	Only if M365-centric
WordPress	Full public websites, plug-in ecosystem	No internal wiki or task management	Public site at scale

RULE Evaluate on pricing tier, databases, wiki, permissions, API and publishing — then recommend, do not assume.

 © 2026 Tertiary Infotech Academy Pte Ltd

NATIVE CHART

Plan Tiers — What Each Adds

WHAT THE DATA SHOWS

Indicative tier comparison: page history grows from 7 days to a year and guest limits from 10 to 250. Notion AI, SAML SSO and private teamspaces arrive at Business; audit logs and SCIM at Enterprise. Always confirm current limits on notion.com/pricing.

? Native PowerPoint chart · editable data · indicative teaching figures

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 06 · HANDS-ON LAB · ADVANCED

Connect Clients, Projects and Deliverables with Relations, Rollups, Formulas, Templates and Automations

LAB 09 | K7 · A4 | 40 min

You create the Clients and Deliverables databases, relate Clients → Projects → Tasks and Deliverables, roll up hours, budgets and completion, write formulas for health status and days remaining, build a Project Brief template, add an automation that notifies the owner when a deliverable is approved, and complete a market comparison of Notion against Confluence, Airtable and Monday.

You will build

A relational model (Clients, Projects, Tasks, Deliverables) with rollups, formulas, a default project template, one automation and a CMS market comparison table

Tools: Notion relations, rollups, formulas, database templates, automations

ASSESSED K7 · A4

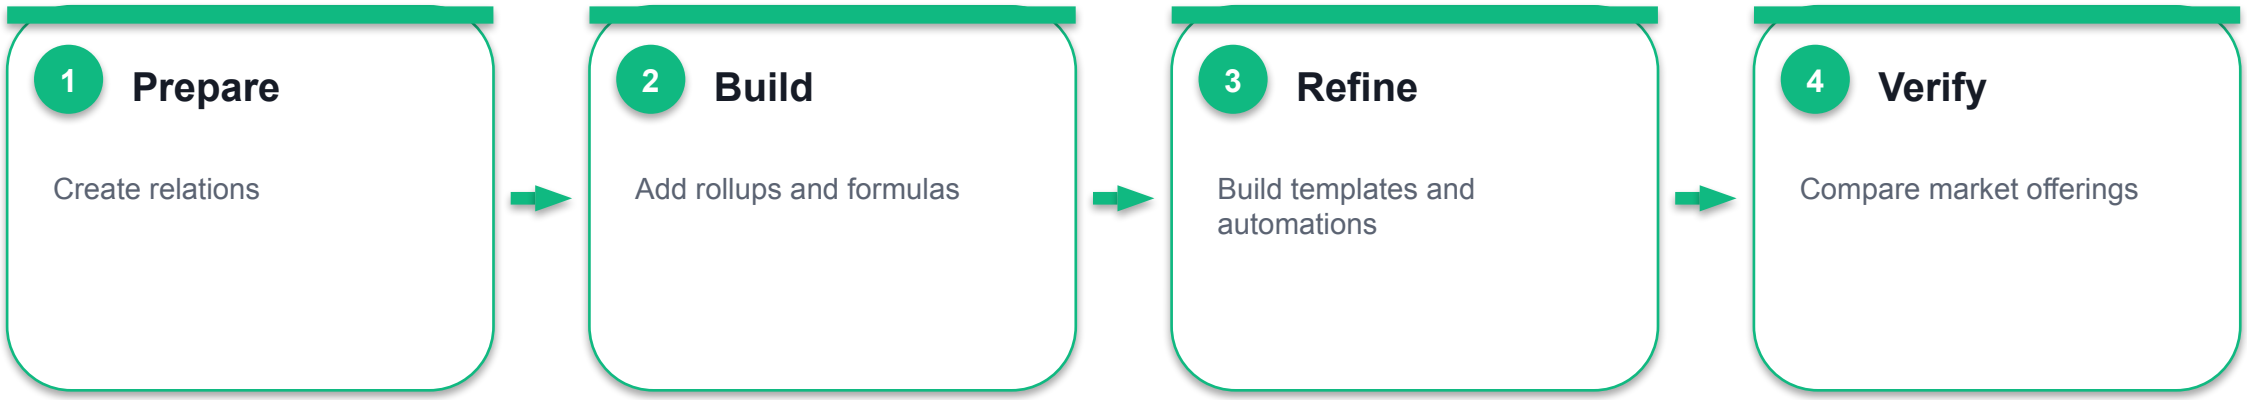

LEVEL Advanced

EVIDENCE Screenshots · lab README checklist

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 09 · WORKFLOW

How Lab 09 Runs

WHY IT MATTERS The shape of the work — the full click-by-click procedure is in the Learner Guide (Lab 09) and the lab's instruction PDF.

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 09 · ACCEPTANCE CHECK

Connect Clients, Projects and Deliverables with Relations, Rollups, Formulas, Templates and Automations

✅ Acceptance check

Clients show Active Projects and Total Budget rollups, each project shows Total Hours, Tasks Done, Next Due, Days Left and a Health formula, new projects open with the Project Brief template, approving a deliverable sets Approved On and notifies the owner, and the Market Offerings table is complete for four tools.

IF IT DOES NOT WORK

1. Re-read the step: most misses are the page menu (top right) versus the block handle (left of a block).
2. Check you are in the right page or teamspace — the sidebar shows the path.
3. Full click-by-click steps: Learner Guide and the lab's instruction PDF.

Lunch Break

1 hour · back for PM digital attendance

07

TOPIC 07 · LU4 · A5 · K6

Collaboration and Publishing

Sharing, permissions and member management · collaborative activities · public pages and web publishing · page analytics

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 07 · WHAT THIS TOPIC COVERS

Key Concepts — Collaboration and Publishing

1

Permission levels

Full access, can edit, can edit content (databases only), can comment and can view; set per person, group, teamspace or the whole workspace.

2

Members, guests and groups

Members join the workspace; guests are invited to specific pages; groups make permissions repeatable. Owners manage security settings.

3

Teamspaces

Open, closed or private spaces with their own owners, members and default permissions — the unit of organisation for departments and clients.

4

Page lock and view lock

Lock a page to prevent accidental edits and lock database views so structure stays fixed while data can still change.

5

Publish to the web

Any page can become a public site with a notion.site URL, search-engine indexing, duplication and comment settings, and a public home page.

6

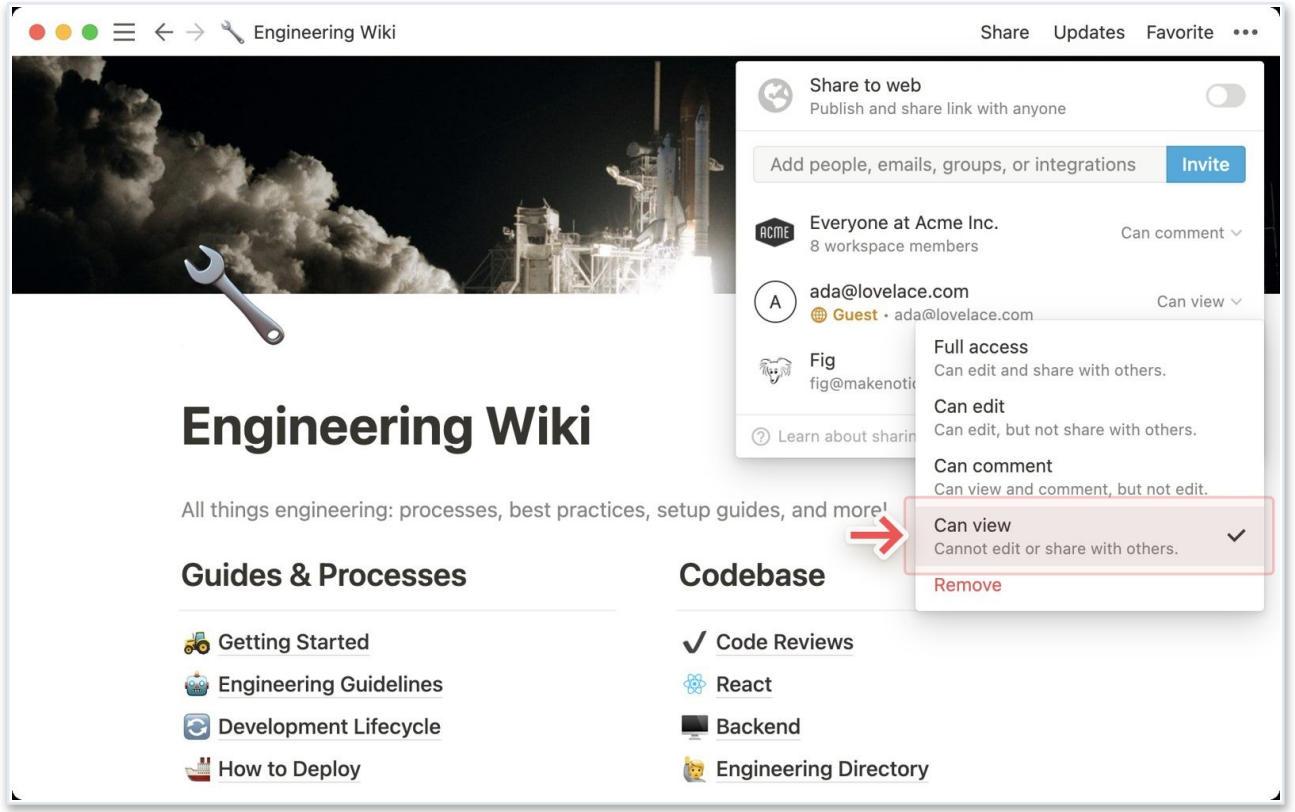

Page analytics

Every page shows views, unique visitors and viewers over time; workspace analytics adds member engagement, content and search behaviour.

 © 2026 Tertiary Infotech Academy Pte Ltd

WHO CAN DO WHAT

Sharing and Permission Levels

1 Five levels

Full access · Can edit · Can edit content (databases) · Can comment · Can view.

2 Where they apply

Per person, per group, per teamspace and for the whole workspace; sub-pages inherit unless restricted.

3 Can edit content

Users add and edit rows but cannot change properties, views, filters or locks — perfect for guests.

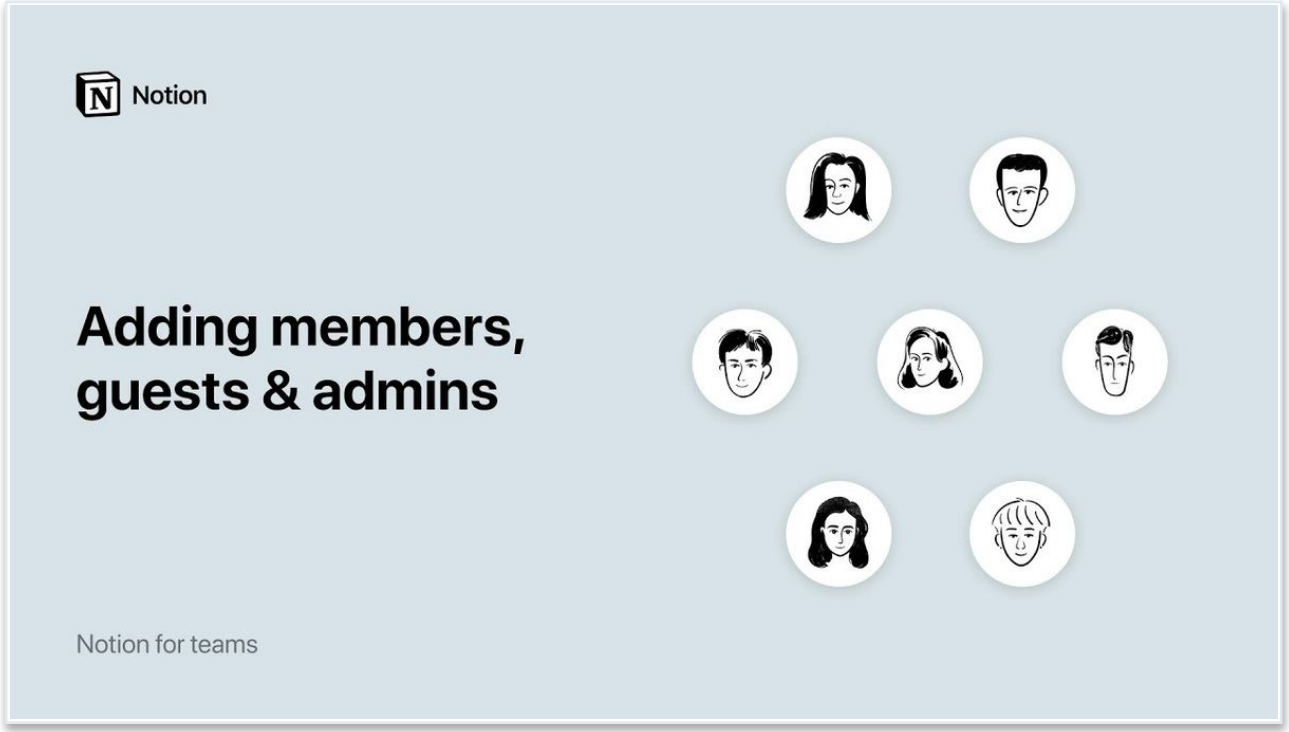

4 See who has access

Share shows every person and group; Request access lets others ask.

 © 2026 Tertiary Infotech Academy Pte Ltd

MANAGE PEOPLE

Members, Guests and Groups

1 Members

Join the workspace by invite, link or allowed email domain; count toward billing.

2 Guests

Invited to specific pages only; free on most plans up to a limit; convert to members later.

3 Groups

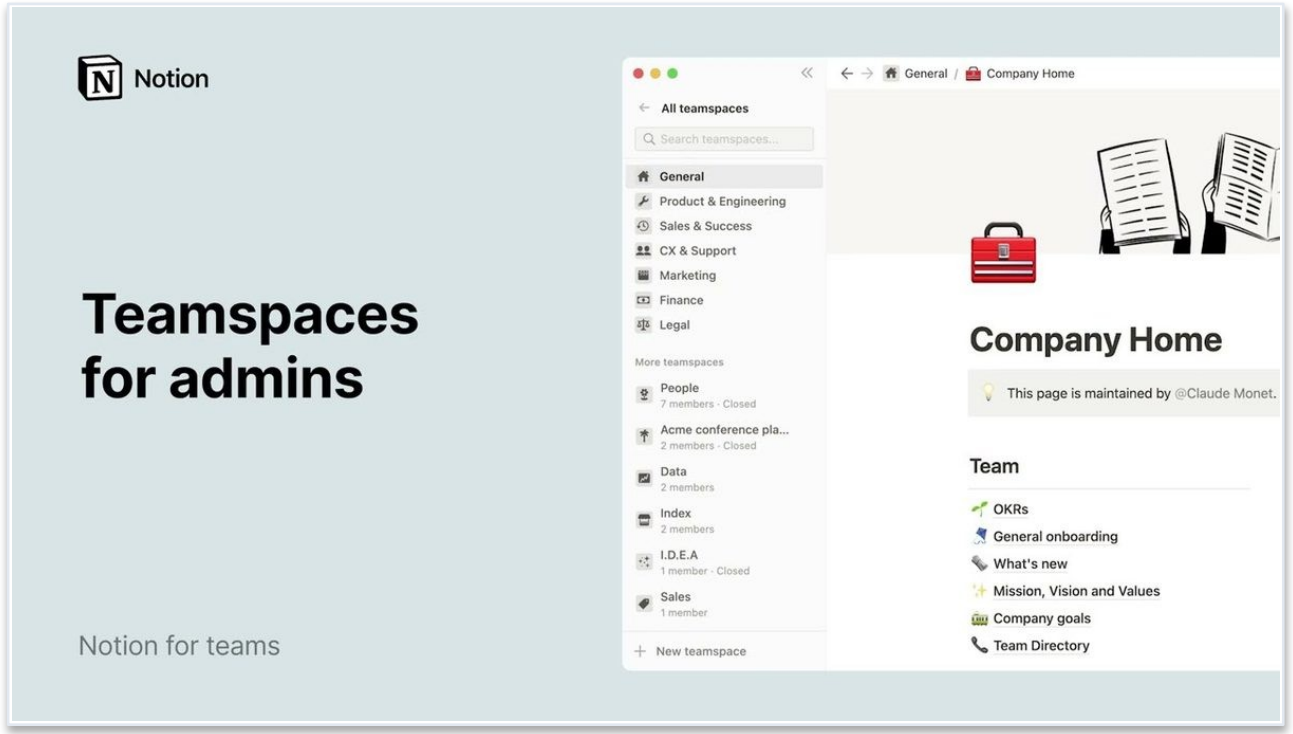

Named sets of members (Editors, Designers) that carry permissions together.

4 Owners and admins

Workspace owners control security, billing and teamspaces; membership admins manage people.

 © 2026 Tertiary Infotech Academy Pte Ltd

Teamspaces

1 Open, closed, private

Open: anyone can join; closed: visible but invite-only; private: hidden (Business and above).

2 Owners and members

Teamspace owners set default access, members, permissions and security settings.

3 Create or convert

+ next to Teamspaces, or turn an existing page into a teamspace.

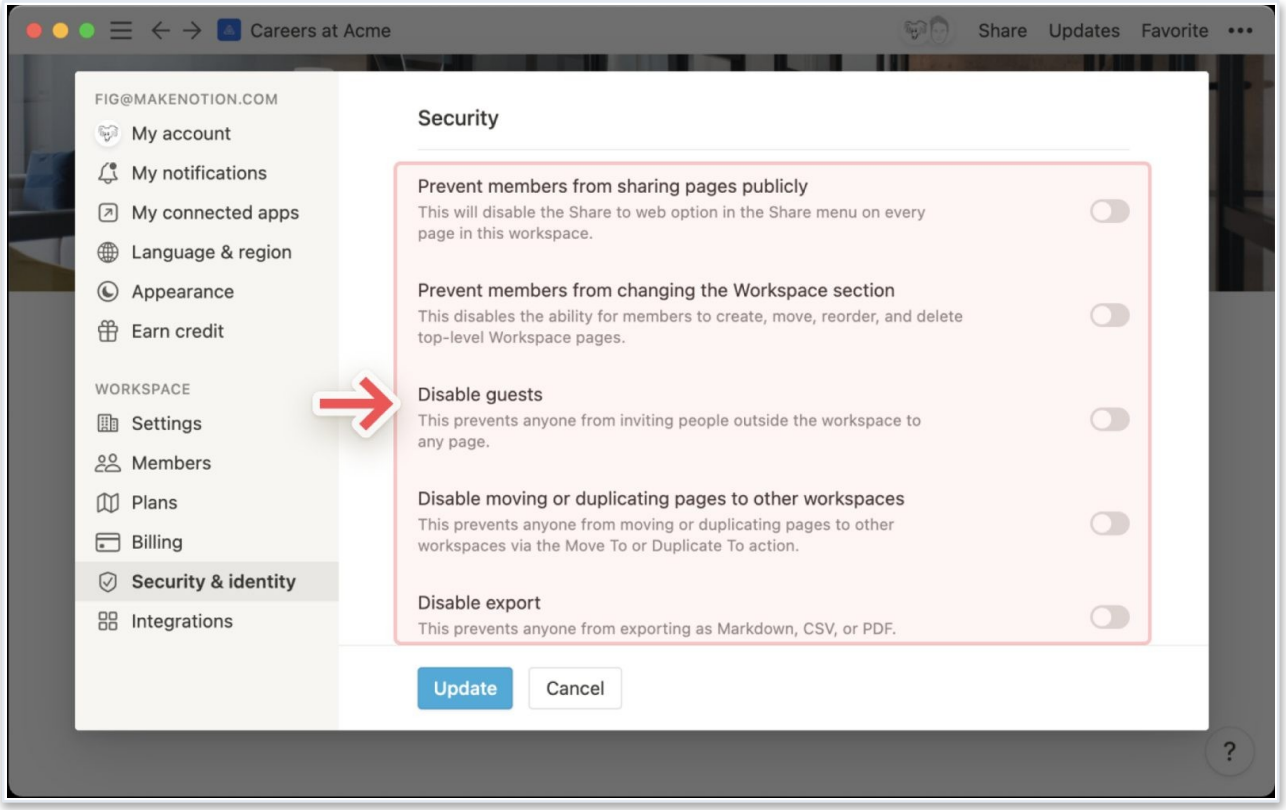

4 Brightwave structure

Company (open) for the wiki and hub; Client Work (closed) for client projects with guests.

 © 2026 Tertiary Infotech Academy Pte Ltd

GOVERN

Security Settings and Page Lock

1 Workspace security

Disable public sharing, guests, export or duplication; allowed email domains; 2-step verification.

2 Page lock

··· → Lock page blocks edits; anyone with edit access can unlock — a safeguard, not a permission.

3 Lock database

Locks properties and views while data stays editable.

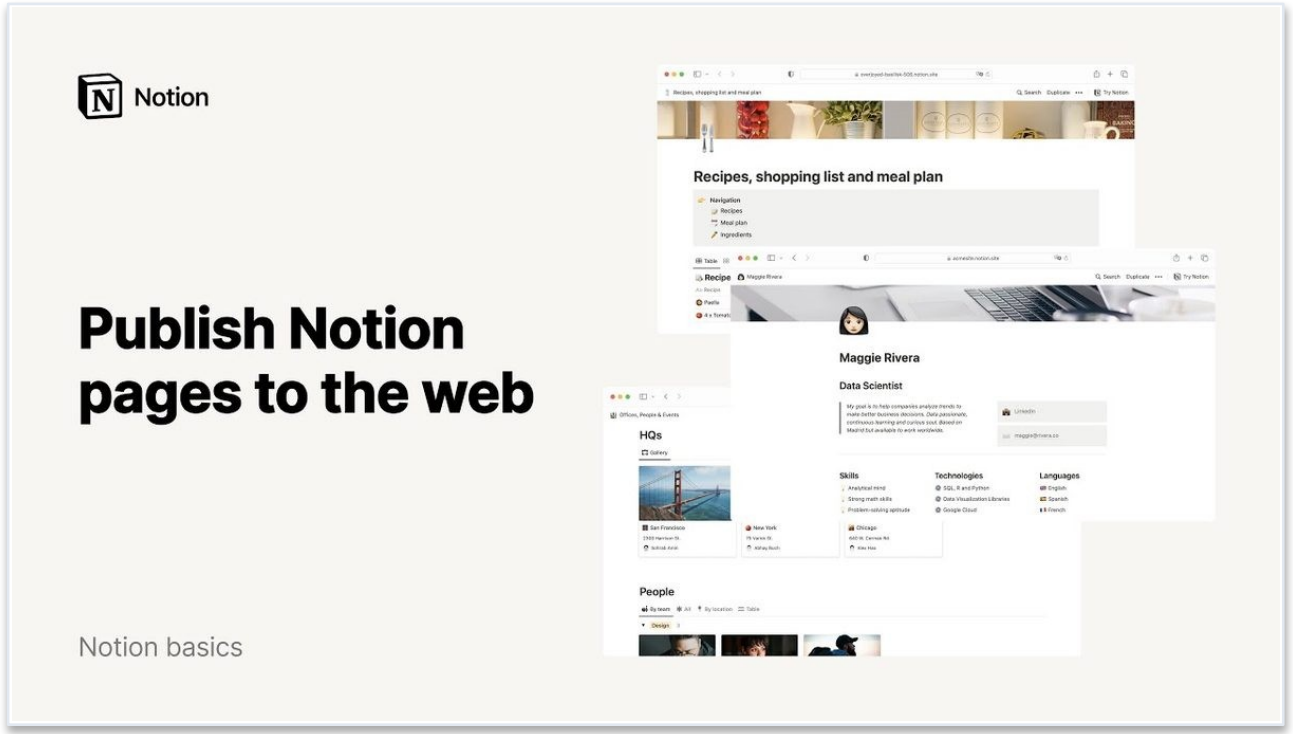

4 Enterprise controls

SAML SSO, SCIM provisioning, audit log, managed users, domain verification, HIPAA options.

 © 2026 Tertiary Infotech Academy Pte Ltd

PUBLIC PAGES

Publish to the Web

1 One switch

Share → Publish → Publish to web gives a notion.site URL for the page and its sub-pages.

2 Options

Search engine indexing, allow duplicate as template, allow comments, link expiry (paid).

3 Sites

Set a public home page, custom domain (paid), navigation and a favicon under Settings → Sites.

4 Brightwave Help Centre

Published with indexing on and duplication off; private pages stay private.

 © 2026 Tertiary Infotech Academy Pte Ltd

MEASURE

Page Analytics

1 Per page

Views, unique visitors and the viewer list over 7, 30 or 90 days — from the page ⋯ menu.

2 Workspace analytics

Member engagement, content analysis (most viewed, stale pages) and search behaviour (paid plans).

3 Opting out

Workspace owners can disable analytics; individuals can hide their own views.

4 Beyond Notion

Public pages can be measured with Google Analytics via a custom domain and site settings.

 © 2026 Tertiary Infotech Academy Pte Ltd

TYPES OF METRICS

Performance Metrics for a Content Management System

Metric type	Examples	Where it comes from	Decision it informs
Reach	Page views, unique visitors, traffic by section	Page analytics, workspace analytics	What to promote or retire
Engagement	Time on page, comments, reactions, return visits	Analytics sample, comments	Which formats work
Freshness	Verified pages, pages past expiry, last edited age	Wiki verification view	Review priorities
Throughput	Items published per week, cycle time draft → published	Content Calendar rollups	Capacity planning
Quality	Broken links, missing owners, search with no result	Search behaviour, audits	Curation backlog
Satisfaction	Feedback sentiment, FAQ deflection, support tickets	Visitor Feedback database	Experience improvements

 © 2026 Tertiary Infotech Academy Pte Ltd

NATIVE CHART

Help Centre Views by Week

WHAT THE DATA SHOWS

Views more than doubled over twelve weeks after the Help Centre was published and indexed; unique visitors grew in step, so growth is new readers, not repeat traffic. The metrics dashboard in Lab 10 charts this from page-analytics-sample.csv.

? Native PowerPoint chart · editable data · indicative teaching figures

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 07 · HANDS-ON LAB · INTERMEDIATE

Share, Set Permissions, Publish the Help Centre and Read Page Analytics

LAB 10 | K6 · A5 | 25 min

You apply the supplied access matrix with members, guests, groups and teamspaces, lock the policy pages, publish the Help Centre to the web with search indexing and a public home page, then read page analytics and build a metrics dashboard from the supplied analytics sample so you can report on views, visitors and engagement.

You will build

A permission model matching the access matrix, a published Help Centre site, a page-analytics reading and a content metrics dashboard with a chart

Tools: Notion sharing, teamspaces, Publish to web, page analytics, chart view

ASSESSED K6 · A5

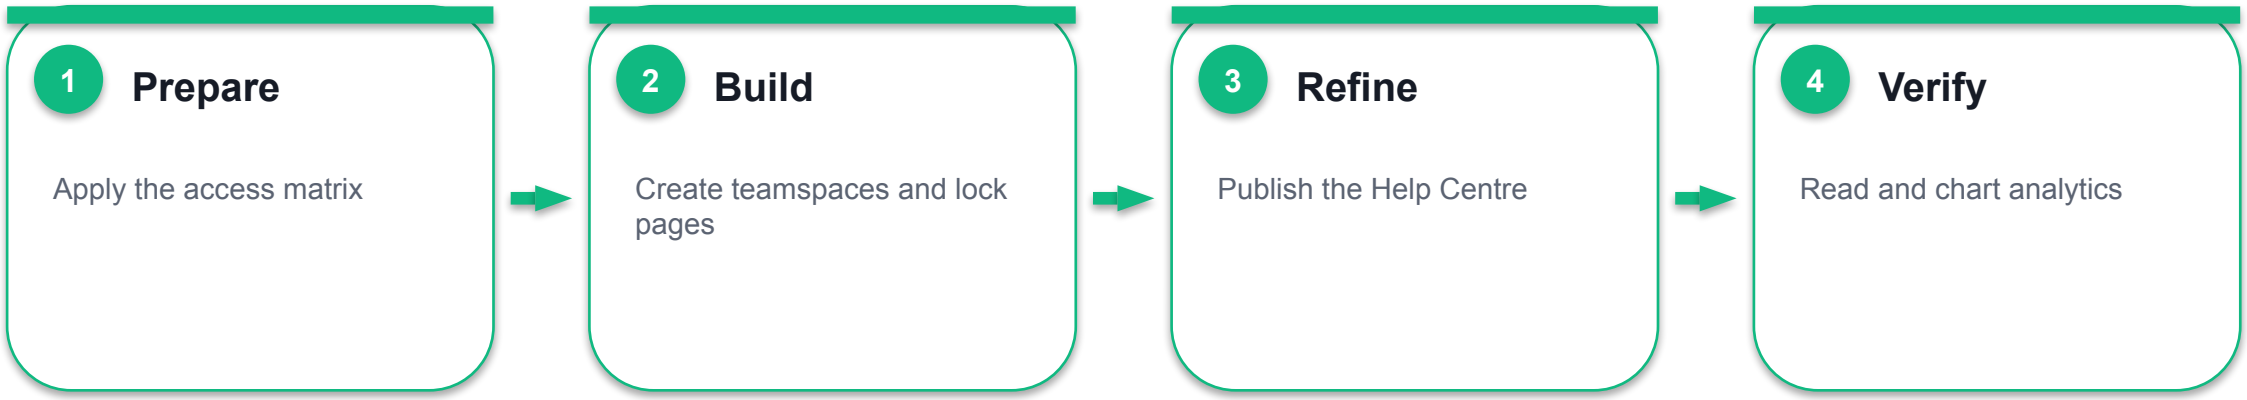

LEVEL Intermediate

EVIDENCE Screenshots · lab README checklist

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 10 · WORKFLOW

How Lab 10 Runs

WHY IT MATTERS The shape of the work — the full click-by-click procedure is in the Learner Guide (Lab 10) and the lab's instruction PDF.

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 10 · ACCEPTANCE CHECK

Share, Set Permissions, Publish the Help Centre and Read Page Analytics

✅ Acceptance check

Sharing matches access-matrix.csv (member, guest, Editors group, closed Client Work teamspace), the policy page is locked, the Help Centre opens at a public notion.site URL with indexing on and duplication off, page analytics show views and unique visitors, and Content Metrics has two chart views and an Engagement formula.

IF IT DOES NOT WORK

1. Re-read the step: most misses are the page menu (top right) versus the block handle (left of a block).
2. Check you are in the right page or teamspace — the sidebar shows the path.
3. Full click-by-click steps: Learner Guide and the lab's instruction PDF.

TOPIC 08 · LU4 · A6 · K9

Data Management and Integrations

Importing data into Notion · embedding and connecting apps · the Notion API · exporting content and data integrity

 © 2026 Tertiary Infotech Academy Pte Ltd

Key Concepts — Data Management and Integrations

1

Import from anywhere

Import Confluence, Evernote, Trello, Asana, Google Docs, Word, Excel, CSV, Markdown and HTML; CSV becomes a database with typed properties.

2

Embeds

Paste a link to embed Google Drive, Maps, Figma, Loom, YouTube, PDFs, Typeform, GitHub gists and 1,900+ other sources inside a page.

3

Connections and link previews

Connect Slack, GitHub, Jira, Google Drive, Zoom and more; pasted links unfurl into live previews and synced databases mirror external issues.

4

The Notion API

An integration with a token calls api.notion.com to create pages, query data sources, update properties and search — the basis for Zapier, Make and custom plug-ins.

5

Data model in the API

A database object holds one or more data sources; each data source has a schema of properties and rows that are pages (API version 2025-09-03).

6

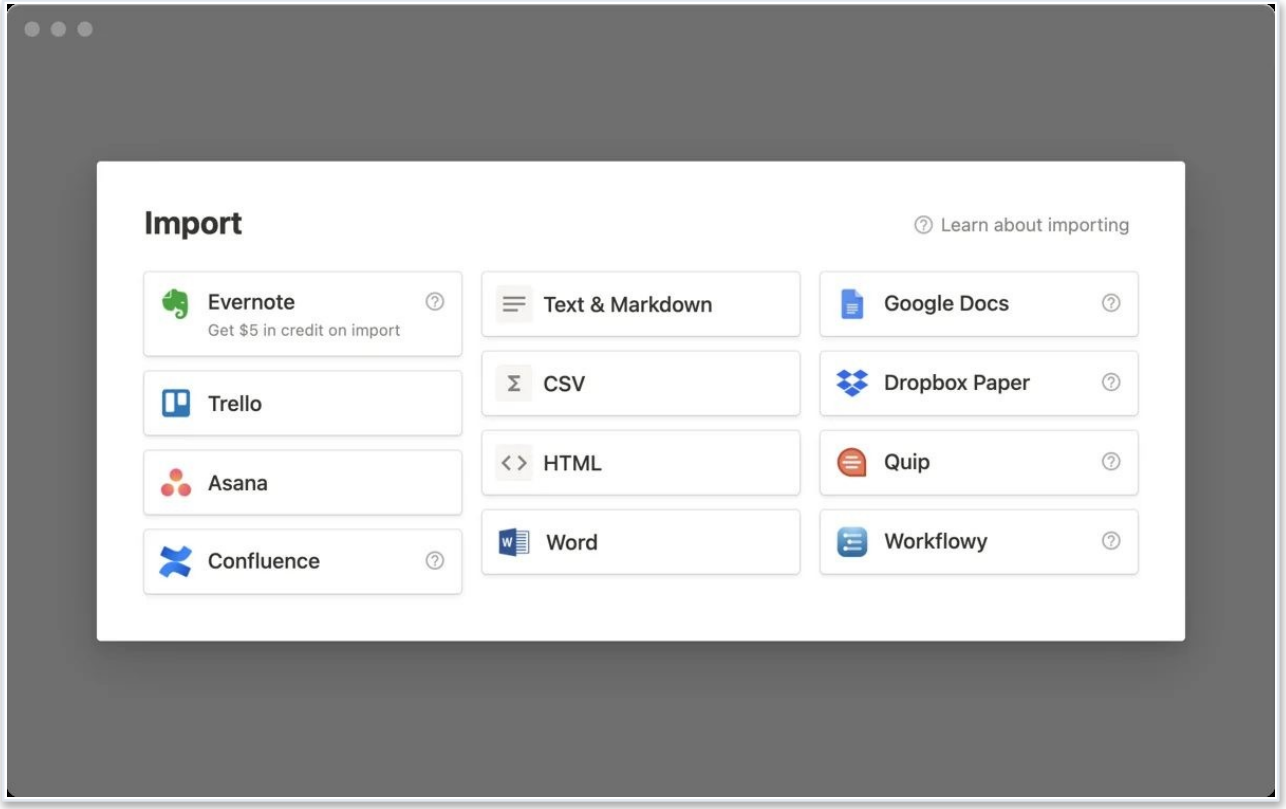

Export and integrity

Export a page or the whole workspace as PDF, HTML or Markdown + CSV; keep backups, page history and the trash policy in the content plan.

 © 2026 Tertiary Infotech Academy Pte Ltd

BRING IT IN

Import Data into Notion

1 Sources

Confluence, Evernote, Trello, Asana, Google Docs, Word, Excel, CSV, Markdown, HTML, Quip, Dropbox Paper.

2 CSV → database

Each column becomes a property; fix the types afterwards (Select, Date, Person).

3 Documents → pages

Word and Markdown become pages with headings and images preserved.

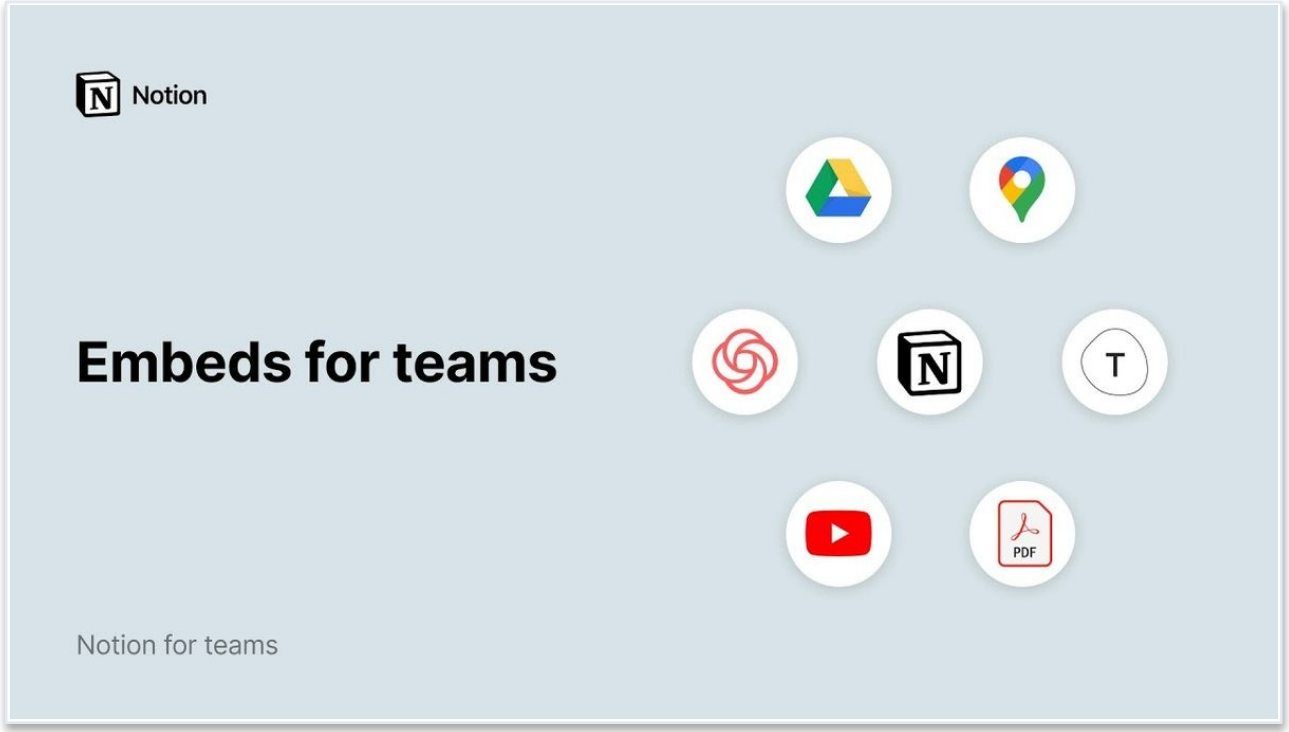

4 Migration plan

Import into a staging teamspace, clean up, then move into the final structure.

 © 2026 Tertiary Infotech Academy Pte Ltd

PLUG-INS AND EMBEDS

Embed and Connect Other Apps

1 1,900+ embeds

Paste a link → Embed for Google Drive, Maps, Figma, Loom, YouTube, PDFs, Typeform, Miro, GitHub gists.

2 Connections

Slack, GitHub, Jira, Asana, Google Drive, Zoom, Zendesk — authorised per user or per workspace.

3 Link previews and synced databases

Pasted links unfurl; Jira, GitHub and Asana boards can sync as live databases.

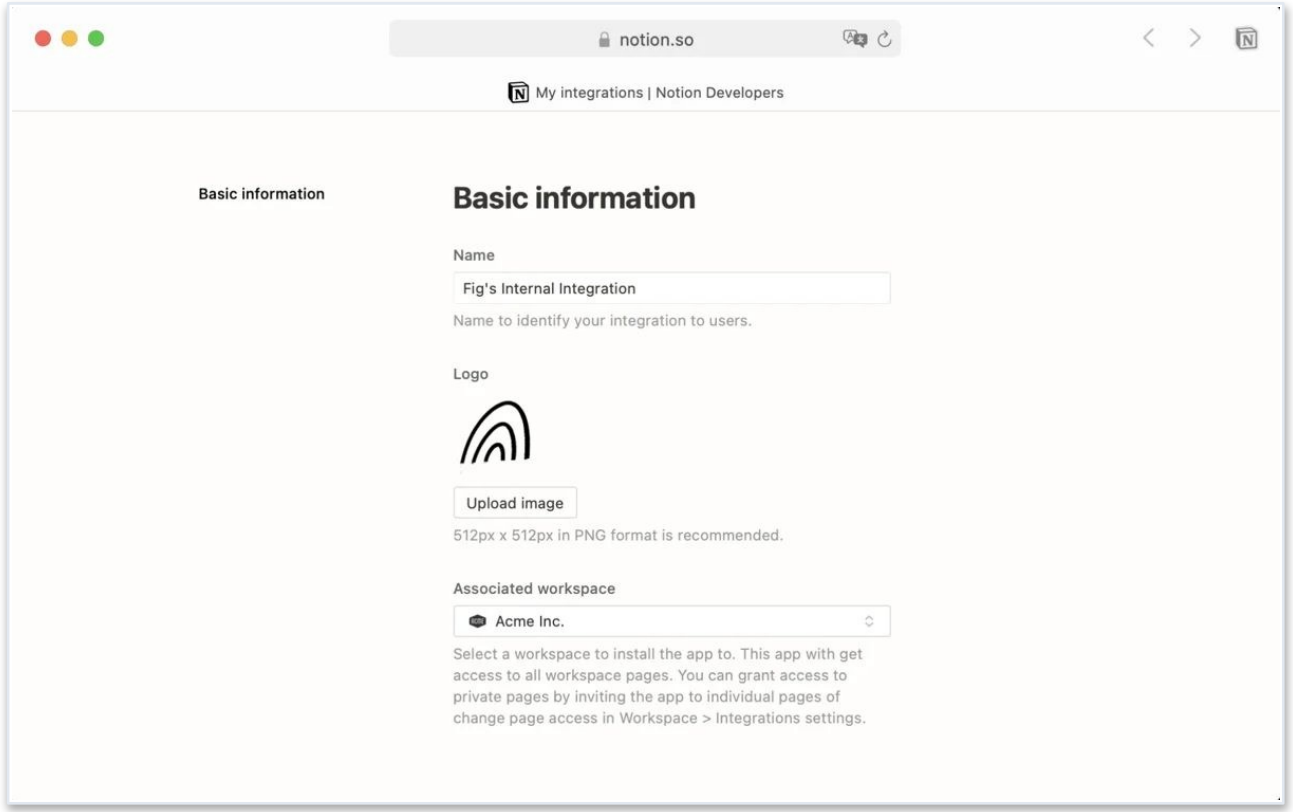

4 Marketplace

Zapier, Make, Super, Notion Calendar, Web Clipper and thousands of community tools extend Notion.

 © 2026 Tertiary Infotech Academy Pte Ltd

BUILD YOUR OWN PLUG-IN

The Notion API and Integrations

1 Create an integration

notion.so/profile/integrations → New; internal (your workspace) or public (OAuth).

2 Capabilities

Read, update, insert content; read comments; read user information — least privilege.

3 Connect to pages

A page or database must be connected to the integration before the API can see it.

4 Base URL and version

https://api.notion.com/v1 with a Notion-Version header (2025-09-03 introduces data sources).

 © 2026 Tertiary Infotech Academy Pte Ltd

OBJECTS YOU WILL MEET

The API Data Model (Version 2025-09-03)

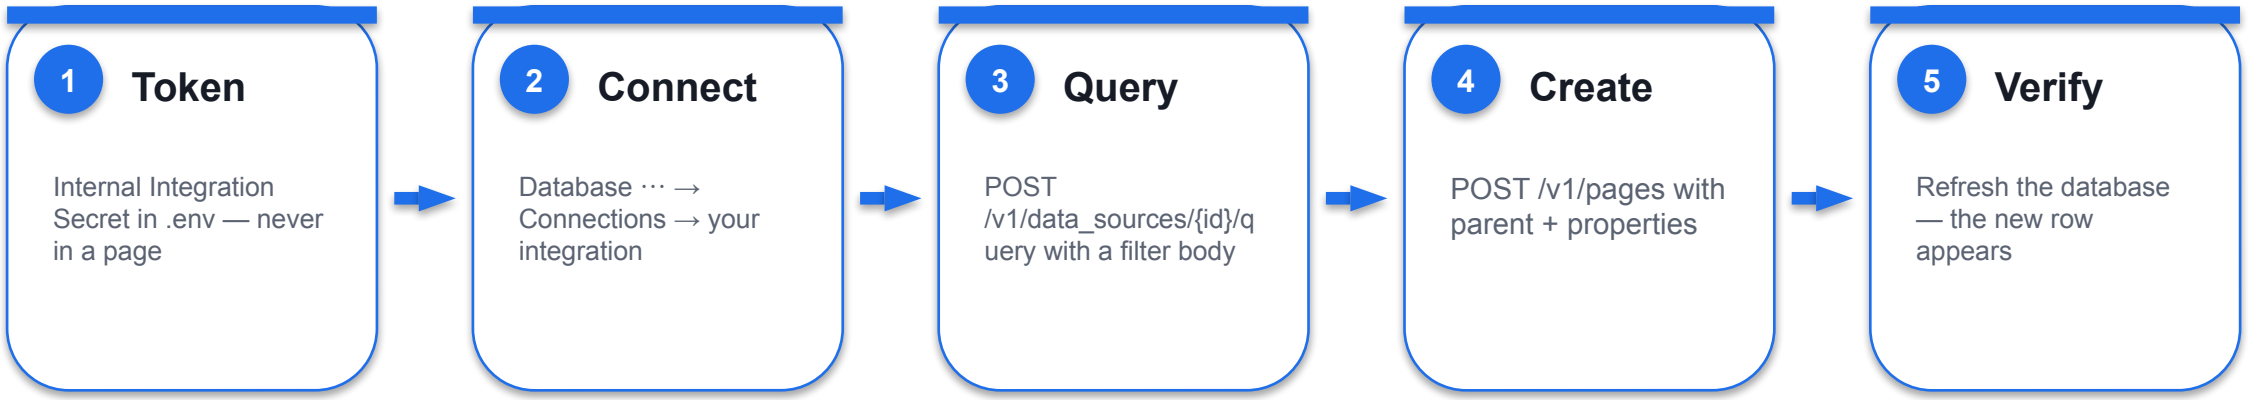

Object	What it is	Key fields	Endpoint examples
Database	Container of one or more data sources; inline or full page	id, title, data_sources[], is_inline, public_url, in_trash	GET /databases/{id}
Data source	The schema (properties) and its rows	id, properties, parent database	GET /data_sources/{id}, POST /data_sources/{id}/query
Page	A row of a data source, or a standalone page	id, properties, parent, url	POST /pages, PATCH /pages/{id}
Block	Content inside a page	type, has_children	GET /blocks/{id}/children
User	Person or bot	id, type, name	GET /users
Search	Find pages and data sources shared with the integration	query, filter	POST /search

RULE Before 2025 a database had exactly one data source, so the two concepts were merged in the API — upgrade the version header to see the new shape.

 © 2026 Tertiary Infotech Academy Pte Ltd

QUERY, THEN CREATE

Calling the API from a Script

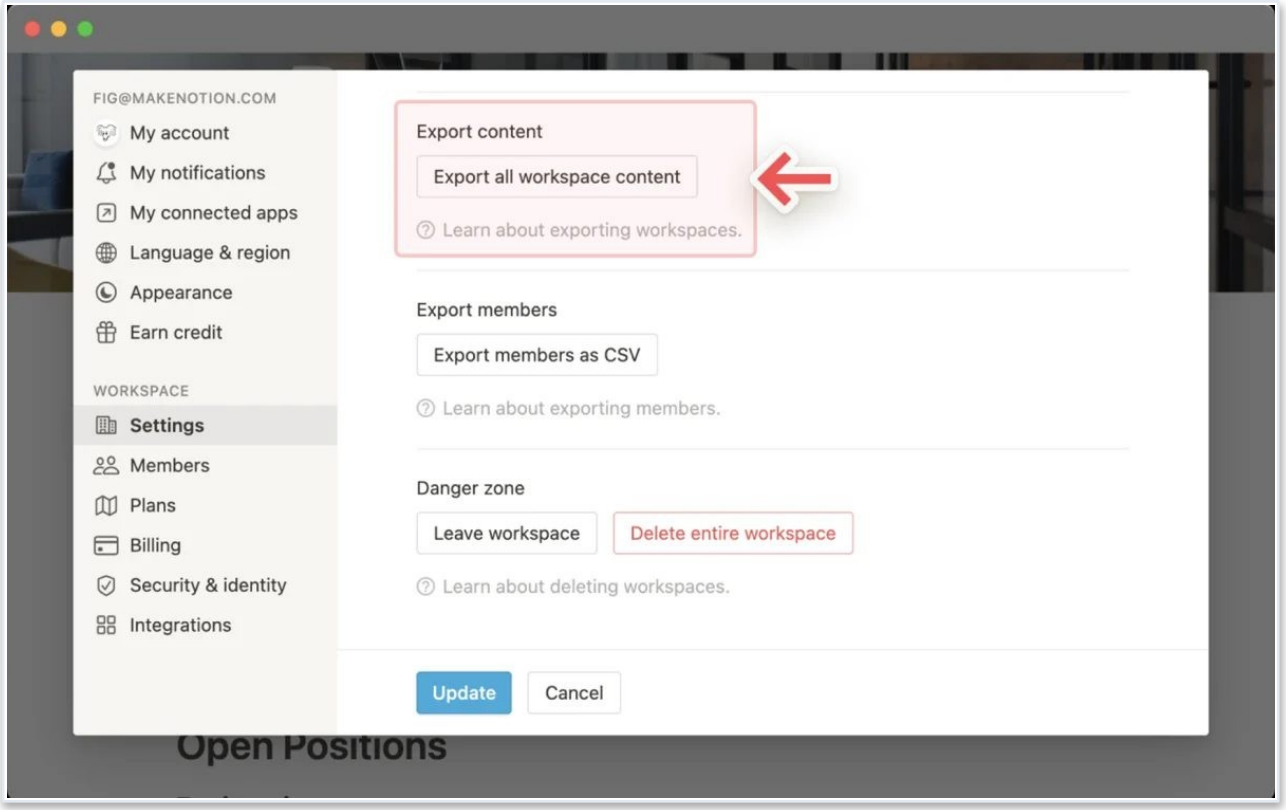

WHY IT MATTERS Automation platforms (Zapier, Make, n8n) call the same endpoints — knowing them lets you evaluate any plug-in's claims.

 © 2026 Tertiary Infotech Academy Pte Ltd

DATA INTEGRITY

Export Your Content

1 Per page

··· → Export as PDF, HTML or Markdown & CSV, with or without sub-pages.

2 Whole workspace

Settings → Export all workspace content (owners) — a ZIP with every database as CSV.

3 Backups and history

Notion keeps backups; page history and Trash (30 days) cover everyday mistakes.

4 Policy

Schedule a quarterly export, store it outside Notion, and record the date in the export checklist.

 © 2026 Tertiary Infotech Academy Pte Ltd

A6 · RECOMMEND WITH EVIDENCE

Recommending Plug-ins — Evaluation Criteria

1

Job to be done

Which content task does it remove or speed up? Name the workflow and the owner.

2

Data and permissions

What can it read or write? Prefer least-privilege capabilities and page-level connections.

3

Cost and plan

Free, per-user or per-task pricing, and whether it needs a Notion plan upgrade.

4

Maintenance

Who owns the connection, how are tokens rotated, what breaks when someone leaves?

5

Security and compliance

Vendor security page, data residency, SOC 2 — required for client data.

6

Exit path

Can you export and switch off without losing content? Avoid lock-in on core assets.

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 08 · HANDS-ON LAB · ADVANCED

Import, Embed, Connect Apps, Call the Notion API and Export

LAB 11 | K9 · A6 | 25 min

You import a Trello-style board export, embed Google Drive, Figma and Loom links, connect Slack and GitHub, create an internal integration and use its token to query the Content Calendar and create a page through the Notion API, evaluate the supplied integration catalogue to recommend plug-ins for Brightwave, and export the workspace as Markdown + CSV.

You will build

An imported board, embedded assets, connected apps, a working API integration that reads and writes a database, a plug-in recommendation table and a workspace export

Tools: Notion Import, embeds, Connections, Notion API (integration token), Export

ASSESSED K9 · A6

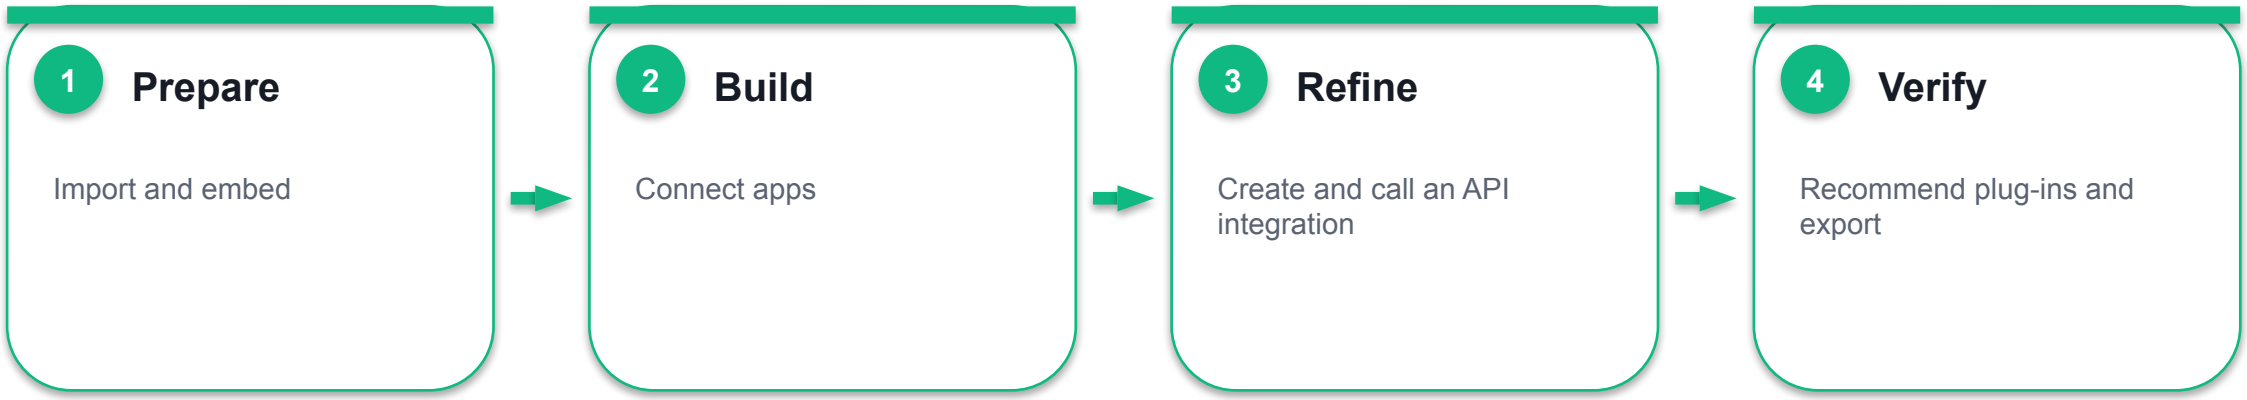

LEVEL Advanced

EVIDENCE Screenshots · lab README checklist

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 11 · WORKFLOW

How Lab 11 Runs

WHY IT MATTERS The shape of the work — the full click-by-click procedure is in the Learner Guide (Lab 11) and the lab's instruction PDF.

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 11 · ACCEPTANCE CHECK

Import, Embed, Connect Apps, Call the Notion API and Export

✅ Acceptance check

The Trello import shows as a board, the project page embeds three external assets, Slack and GitHub are connected, the API query prints the calendar rows and the API create call adds a Draft row, Recommended Integrations names three tools with justification, and a Markdown & CSV workspace export has been downloaded.

IF IT DOES NOT WORK

1. Re-read the step: most misses are the page menu (top right) versus the block handle (left of a block).
2. Check you are in the right page or teamspace — the sidebar shows the path.
3. Full click-by-click steps: Learner Guide and the lab's instruction PDF.

TOPIC 09 · LU4 · A7 · K8

Notion AI

What is Notion AI · Writer and Autofill · Q&A, Enterprise Search and the Notion Agent

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 09 · WHAT THIS TOPIC COVERS

Key Concepts — Notion AI

1

Your AI teammate inside Notion

Notion AI works in the pages, databases and connected apps you already use: it drafts, edits, summarises, translates, searches and builds.

2

Writer — draft and edit inline

Press Space on an empty line or highlight text: draft, continue writing, fix grammar, shorten, change tone, summarise, translate, brainstorm.

3

AI blocks

/AI block creates a block whose content is regenerated on demand — a living summary, key points or a custom output with specified context.

4

Autofill databases

An AI Autofill property fills summaries, keywords, translations or classifications for every row and can update as pages change.

5

Q&A, Enterprise Search and Research Mode

Ask questions across the workspace, Slack and Google Drive with citations; Research Mode produces reports on open-ended questions.

6

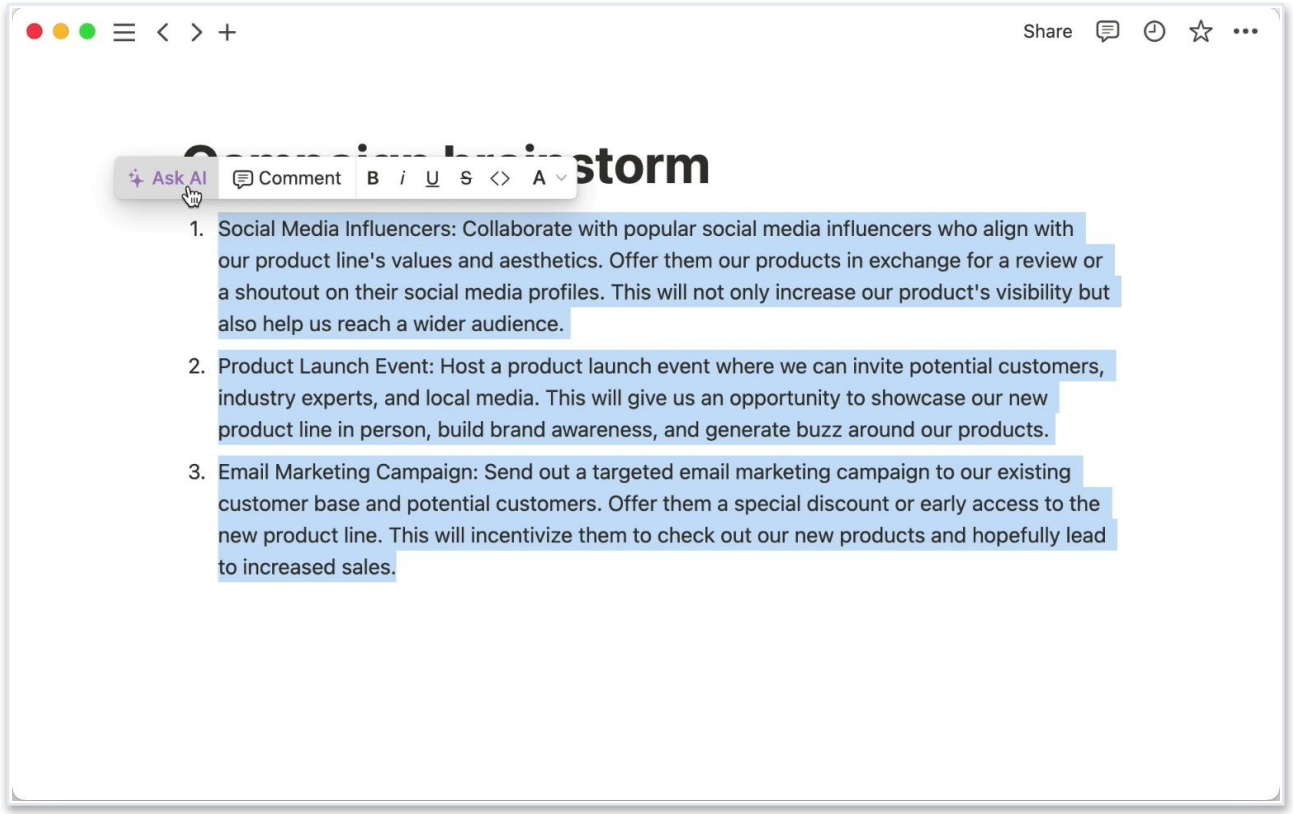

The Notion Agent and plans

The Agent takes on whole tasks (build a database, edit pages). Notion AI is included in Business and Enterprise; Free and Plus get trial responses.

© 2026 Tertiary Infotech Academy Pte Ltd

YOUR AI TEAMMATE

What Is Notion AI?

1 Built into the workspace

Works inside pages, databases and connected apps — no copy-paste to another tool.

2 What it does

Drafts and edits, summarises and translates, answers questions with citations, autofills databases, builds databases, transcribes meetings.

3 Models and data

Uses leading models (GPT and Claude families); customer data is not used to train them; encrypted in transit.

4 Availability

Included in Business and Enterprise; Free and Plus get complimentary trial responses.

 © 2026 Tertiary Infotech Academy Pte Ltd

NOTION AI · WRITER

Writer — Draft and Edit Inline

1

Draft from a prompt

Space on an empty line or /ai: outline, blog post, email, meeting agenda, job description.

2

Edit a selection

Improve writing, fix grammar, make shorter or longer, simplify, change tone, translate.

3

Continue and expand

Continue writing, explain this, find action items, summarise the page.

4

Review before accepting

Accept, discard or try again — the writer is responsible for the published text.

5

@-mention context

Mention pages or people in the prompt so the draft uses your workspace, not only world knowledge.

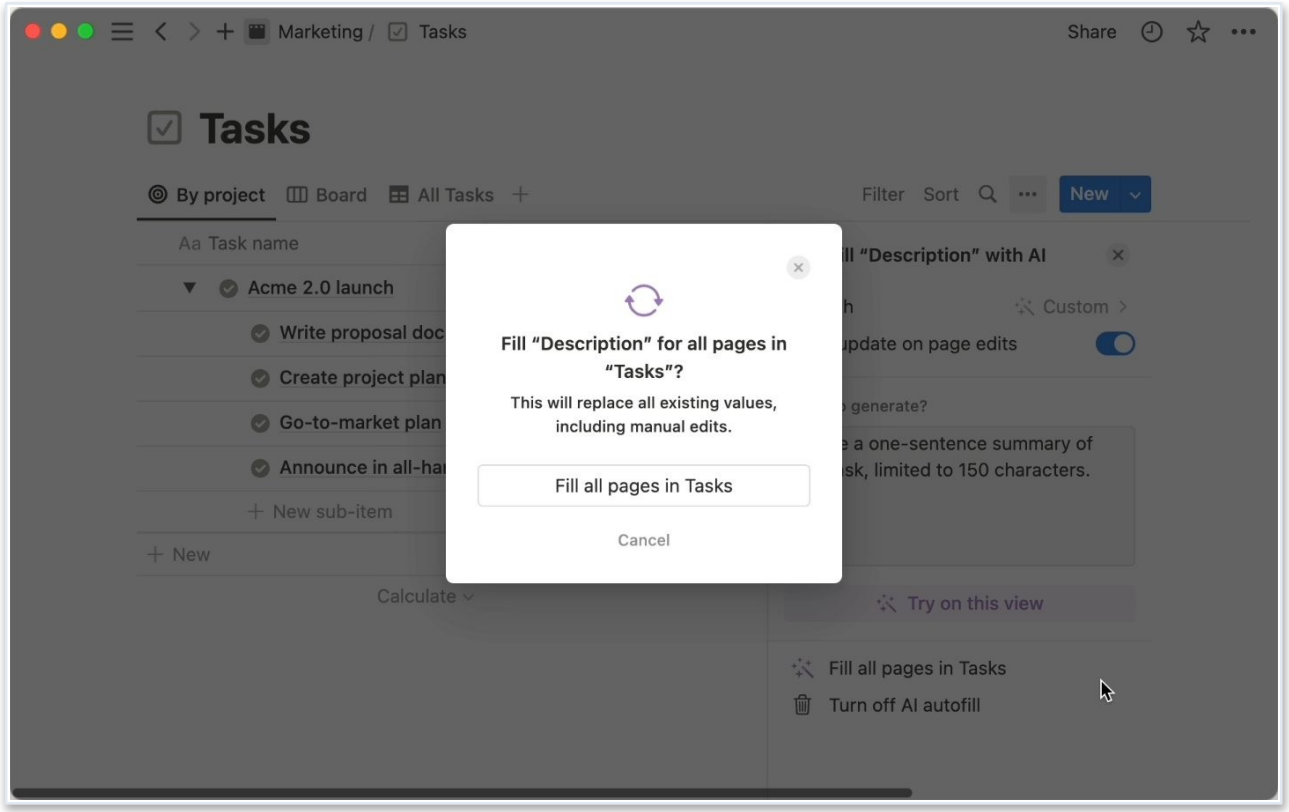

6

Translate whole pages

··· → Translate keeps the structure and produces a copy in the target language.

 © 2026 Tertiary Infotech Academy Pte Ltd

Autofill Databases with AI

1 AI properties

AI Summary, AI Key info, AI Translation, AI Custom autofill and AI-generated select values.

2 Fill every row

Update all fills existing rows; auto-update refreshes when the page changes.

3 Use cases

Sentiment of feedback, keywords of articles, one-line summaries of client briefs, status classification.

4 Formulas too

Ask AI to write or explain a formula in the formula editor.

 © 2026 Tertiary Infotech Academy Pte Ltd

Q&A, Enterprise Search, Research Mode and the Agent

Capability	What you ask	Where it looks	Output
Q&A / chat	'What does the policy say about expiry?'	Workspace pages you can access	Answer with citations
Enterprise Search	'What was decided on the launch date?'	Notion + Slack, Google Drive, GitHub connectors	Answer across apps
Research Mode	'Report on our Q3 content performance'	Workspace + web	Structured report
Notion Agent	'Build a task database for the campaign'	Workspace + connected apps	Creates and edits pages and databases
Custom Agents	Scheduled or triggered work, e.g. weekly updates	Workspace + apps	Runs autonomously (credits)
AI Meeting Notes	Transcribe this meeting	Audio	Transcript, summary, action items

RULE Notion AI only shows information the asking user already has permission to see.

 © 2026 Tertiary Infotech Academy Pte Ltd

FROM SENTENCE TO SYSTEM

Build a Database with AI

WHY IT MATTERS AI drafts the structure; the content manager still owns the model — check every property type before the team starts entering data.

 © 2026 Tertiary Infotech Academy Pte Ltd

A7 · GENERATE IDEAS

Ideas That Improve the Visitor Experience

1

Listen first

Autofill sentiment and key issue on visitor feedback; group by issue to see what hurts most.

2

Answer faster

An AI-built FAQ database published in the Help Centre deflects repeat questions.

3

Guide the visitor

A start-here page, breadcrumbs, table of contents and two-click navigation.

4

Keep it current

Verification expiry plus a Content Metrics chart of stale, low-view pages.

5

Speak their language

Translate key pages; keep terminology consistent with a glossary.

6

Prioritise transparently

Impact minus effort ranks ideas; publish the plan and the roadmap.

 © 2026 Tertiary Infotech Academy Pte Ltd

GOVERNANCE

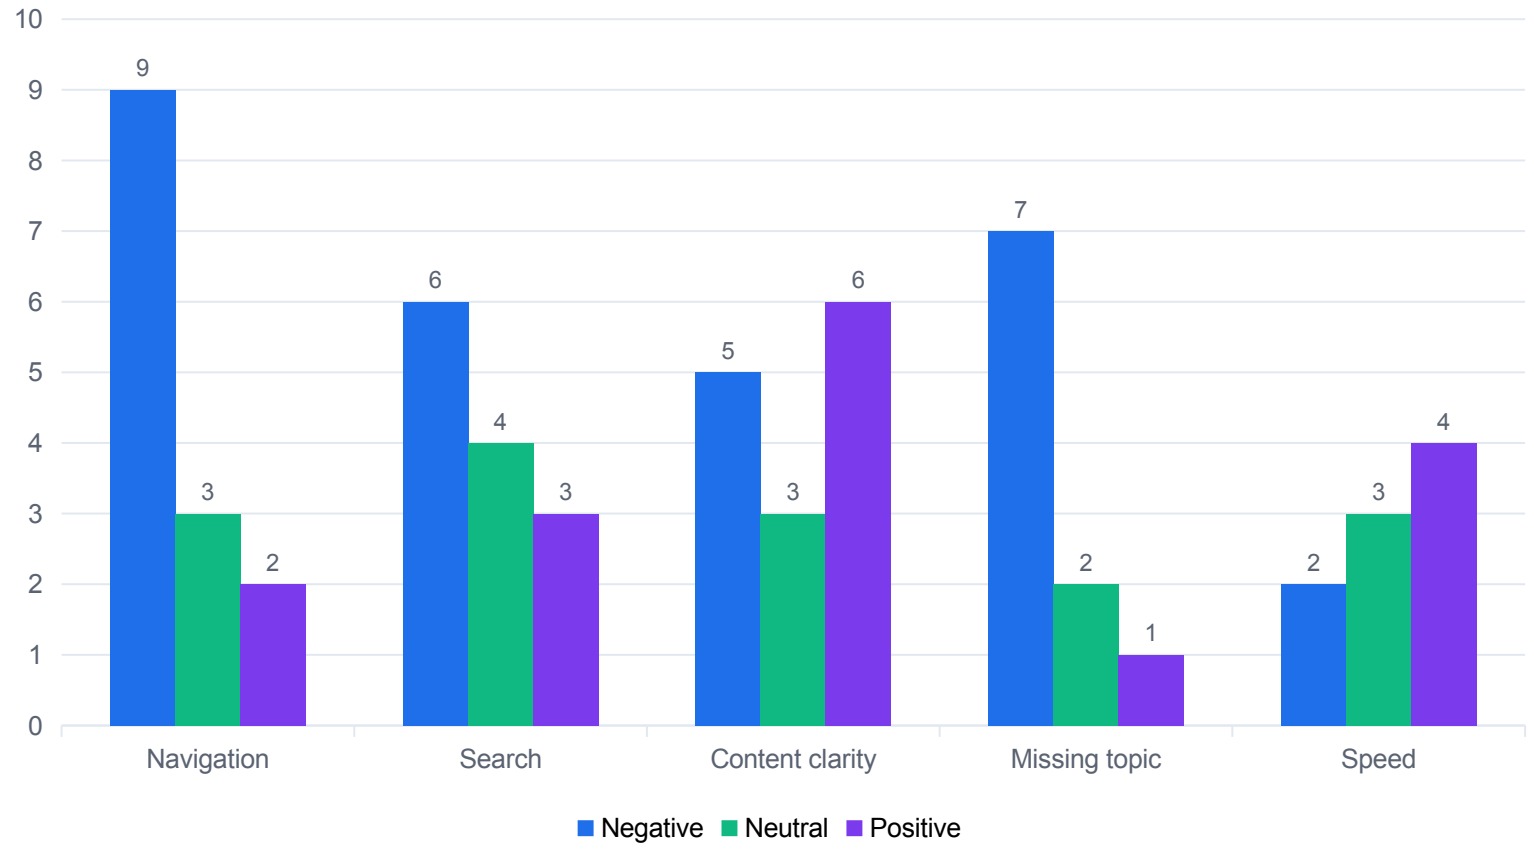

Notion AI Settings, Privacy and Plans

Setting or fact	Detail	Who controls it
AI Web Search	Enable web search; require confirmation for web requests	Workspace owner
Share data to improve Notion AI	Off by default — customer data is not used for training	Workspace owner
Model controls and usage	Choose allowed models; premium models spend Notion credits; per-member limits	Workspace owner / admin
AI Connectors	Slack, Google Drive, GitHub and others, subject to each user's permissions	Workspace owner
Security	TLS in transit; zero data retention for Enterprise, 30 days otherwise; SOC 2, ISO 27001, GDPR, HIPAA (Enterprise)	Notion
Pricing	Included in Business and Enterprise; trial responses on Free and Plus; Custom Agents use credits from May 2026	Plan

 © 2026 Tertiary Infotech Academy Pte Ltd

NATIVE CHART

Visitor Feedback Sentiment (Lab 12 Sample)

WHAT THE DATA SHOWS

Navigation and missing topics generate most negative feedback; content clarity is already positive. The improvement plan should start with the start-here page and the FAQ database, not with rewriting articles.

? Native PowerPoint chart · editable data · indicative teaching figures

 © 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 09 · HANDS-ON LAB · ADVANCED

Use Notion AI to Write, Autofill, Answer Questions and Improve the Visitor Experience

LAB 12 | K8 · A7 | 25 min

You use Notion AI to draft and edit Help Centre articles, add an AI block summary, autofill keywords and sentiment on the supplied visitor feedback database, ask Q&A questions across the workspace, build a FAQ database with AI, and turn the answers into a prioritised list of visitor-experience improvements for the public Help Centre.

You will build

AI-drafted and edited Help Centre content, an autofilled feedback database, Q&A answers with citations, an AI-built FAQ database and a ranked visitor-experience improvement plan

Tools: Notion AI (Writer, AI blocks, Autofill, Q&A / Enterprise Search, Build with AI)

ASSESSED K8 · A7

LEVEL Advanced

EVIDENCE Screenshots · lab README checklist

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 12 · WORKFLOW

How Lab 12 Runs

WHY IT MATTERS The shape of the work — the full click-by-click procedure is in the Learner Guide (Lab 12) and the lab's instruction PDF.

 © 2026 Tertiary Infotech Academy Pte Ltd

LAB 12 · ACCEPTANCE CHECK

Use Notion AI to Write, Autofill, Answer Questions and Improve the Visitor Experience

✅ Acceptance check

How to Request a Content Change was drafted with Writer and translated, the article carries two AI blocks, Visitor Feedback shows autofilled Sentiment and Key issue for every row, Q&A returns cited answers, the FAQ database was built with AI, and Visitor Experience Plan ranks ten improvements by the Priority formula with a management recommendation.

IF IT DOES NOT WORK

1. Re-read the step: most misses are the page menu (top right) versus the block handle (left of a block).
2. Check you are in the right page or teamspace — the sidebar shows the path.
3. Full click-by-click steps: Learner Guide and the lab's instruction PDF.

WRAP-UP

Course Summary & Next Steps

 © 2026 Tertiary Infotech Academy Pte Ltd

LEARNING OUTCOMES DELIVERED

What You Achieved

1

LO1 · Policies and permissions

A governed workspace: wiki, verified pages, owners, permissions, teamspaces and locks (Labs 1–3, 10).

2

LO2 · Post and update content

Structured, media-rich, style-compliant articles with navigation and synced components (Labs 4–6).

3

LO3 · Maintain web properties and assets

Relational databases for calendar, projects, tasks, clients and deliverables, with views, rollups, formulas and automations (Labs 7–9).

4

LO4 · Report, recommend, improve

Page analytics and a metrics dashboard, API-backed integrations and plug-in recommendations, and AI-generated visitor-experience ideas (Labs 10–12).

 © 2026 Tertiary Infotech Academy Pte Ltd

NEXT STEPS

Taking This Back to Work

1. **Start with the policy**
   Write the content management policy first; every structure decision follows from it.

2. **Four sections, then databases**
   Wiki, content, projects, public — then turn repeated pages into databases.

3. **Owners and verification**
   No page without an owner; no policy without an expiry date.

4. **Measure before you redesign**
   Read page analytics for a month before changing the navigation.

5. **Integrate deliberately**
   Recommend plug-ins against the six criteria; keep the API token out of pages.

6. **Let AI draft, keep humans accountable**
   Writer, Autofill and Q&A speed the work; a named person approves what is published.

 © 2026 Tertiary Infotech Academy Pte Ltd

CONTINUE THE JOURNEY

Recommended Follow-On Courses

1. **Search Engine Optimization (SEO) to Enhance Brand Awareness and Online Business**

LMS / TMS

lms-tms.tertiaryinfotech.com — courseware, attendance, assessment and TRAQOM survey

 © 2026 Tertiary Infotech Academy Pte Ltd

Final Assessment

	Written Assessment (WA)	Practical Performance (PP)
Format	Short-answer questions (SAQ)	Scenario-based practical tasks in Notion
What it tests	Underpinning knowledge K1–K9	Practical abilities A1–A7
Items	9 questions	5 tasks
Duration	1 hour	1 hour
Conditions	Open book, individual	Open book, individual
Submission	On the LMS	On the LMS, with screenshots as evidence

RULE Open book: slides, Learner Guide and your own lab work. 75% attendance is required; an appeal process is available.

 © 2026 Tertiary Infotech Academy Pte Ltd

ON ASSESSMENT DAY

Assessment Flow

1. TRAQOM survey — scan the QR code on the LMS
2. Assessment digital attendance — scan the SSG QR
3. Sit WA (SAQ) then PP — open book
4. Submit your answers on the LMS
5. Sign the Assessment Summary Record

Submit both papers on the LMS, then sign the Assessment Summary Record with your assessor.

 © 2026 Tertiary Infotech Academy Pte Ltd

Digital Attendance (Mandatory)

1. Trainer displays the SSG digital attendance QR code
2. Scan it with your phone camera (Singpass app)
3. Submit your attendance
4. Repeat for AM, PM and the assessment session

Attendance is taken digitally for every session of a WSQ-funded course; a minimum of 75% attendance is required for assessment and funding.
